Subject: Stop discrimination against patients

Dear Planned Parenthood,

I'm writing about the proposed rule that allows providers and other health care workers to deny access to basic health care services, including -- though certainly not limited to -- transgender health services, abortion, and even birth control. This rule, coupled with the newly created "Conscience and Religious Freedom" division within the Office of Civil Rights, would turn the office charged with protecting people throughout the country from discrimination into an office that gives health care workers a license to discriminate against people, simply because of who they are or the services they seek.

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care.

Sincerely,  
Miss Amanda Tucker

Part of a job, especially ones in customer service, health care, etc., is providing a service to those you may not necessarily agree with, but who need your help. Allowing people to pick and choose who they serve based on whether or not they agree with them is a slippery slope, upon which many people will no doubt be hurt.

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care.

It is the obligation of any health care provider to provide appropriate health care to ANYONE that needs it. If that is not the belief of the health care provider then they should not be in that business. It is unconscionable to allow health care to be withheld because of the belief system of the provider.

This is clearly unconstitutional. Freedom of Religion means others cannot be forced to adhere to my religious views. If we allow such discrimination, we open the door to creating an oppressive religious government like the ones we've had to fight in the middle east. Based on history, there is no reason to believe that a Christian controlled government would be any kinder or less violent than a Islam controlled one. Our government was specifically designed to oppose actions like these.

Sincerely,

Affordable and safe health care is an absolute right for each and every American. Please protect access for ALL Americans, as well as insuring that the individual has full body autonomy. "First do no harm" is the pledge doctors take. If a person can't keep their personal feelings out of the care of another individual, they need to seek a different vocation. If I am responsible enough to walk into a gun store, and purchase a lethal weapon, then by damn, I am responsible enough to know what I can and can't do with my body, mind and soul. Please protect my body autonomy, as well as keeping access to affordable and safe health care like you currently protect the second amendment.

Health care should be provided to people no matter their backgrounds, beliefs, or circumstances. Allowing health care workers to discriminate against their patients is disgraceful and not what America should stand for. The Department of Health and Human Services should seek to ensure a healthy public, not attempt to limit access to health care and services for the benefit of those in positions of power. This is obviously a discriminatory move, blatantly putting those most in need in our society at risk.

Sincerely,  
Miss Karly Richardson

I'm writing about the proposed rule that allows providers and other health care workers to deny access to basic health care services, including -- though certainly not limited to -- transgender health services, abortion, and even birth control. This rule, coupled with the newly created "Conscience and Religious Freedom" division within the Office of Civil Rights, would turn the office charged with protecting people throughout the country from discrimination into an office that gives health care workers a license to discriminate against people, simply because of who they are or the services they seek.

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care.

Sincerely,  
Mr. Ray Gibson
