Planned Parenthood

Subject: Stop discrimination against patients

Dear Planned Parenthood,

I'm writing about the proposed rule that allows providers and other health care workers to deny access to basic health care services, including -- though certainly not limited to -- transgender health services, abortion, and even birth control. This rule, coupled with the newly created "Conscience and Religious Freedom" division within the Office of Civil Rights, would turn the office charged with protecting people throughout the country from discrimination into an office that gives health care workers a license to discriminate against people, simply because of who they are or the services they seek.

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care.

Sincerely,
Ms. Jeanette Housner

Dear Planned Parenthood,

I'm writing about the proposed rule that allows providers and other health care workers to deny access to basic health care services, including -- though certainly not limited to -- transgender health services, abortion, and even birth control. This rule, coupled with the newly created "Conscience and Religious Freedom" division within the Office of Civil Rights, would turn the office charged with protecting people throughout the country from discrimination into an office that gives health care workers a license to discriminate against people, simply because of who they are or the services they seek.

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

This proposal will promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. There is already the right to not provide certain services because of religious objections, but it is a responsibility of health care workers to find patients those resources which they refuse to provide. Allowing health care workers to completely disregard and refuse normal medical services to patients based upon personal beliefs this will create a worsening of access to care and will ultimately lead to worse health outcomes.

I urge you to withdraw this dangerous proposed rule and instead focus your office on protecting access to care.

Sincerely,
Dr. Adam Colton

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care. When laws to protect civil rights are perverted to instead promote discrimination under the guise of "religious freedom", it not only hurts those it is meant to help, it is also a disservice to the community at large, creating blurred lines between protecting civil rights and protecting discriminators from prosecution. This is a clear violation of not only civil rights law, but of the Constitution, and damages the ability of religious minorities to maintain real religious freedom. Please, don't let your office be hijacked by those who would destroy civil rights for all by using their perverted version of the law to allow, even encourage, wholesale discrimination.

Sincerely,
Mrs. Cathy Polakoff

I'm writing about the proposed rule that allows providers and other health care workers to deny access to basic health care services, including -- though certainly not limited to -- transgender health services, abortion, and even birth control. This rule, coupled with the newly created "Conscience and Religious Freedom" division within the Office of Civil Rights, would turn the office charged with protecting people throughout the country from discrimination into an office that gives health care workers a license to discriminate against people, simply because of who they are or the services they seek.

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

Do no harm. This is the most basic tenet of providing health care. To deny care to anyone who seeks and needs it would call to question the morality of the caregiver. To deny care is to deny that a person cares. This power does not apply to healthcare workers, and is simply an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care. Health and social services for all. That's your job. Do it.

Sincerely,
Ms. Aimee Youmans

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

Several members of our family work in the health care professions, and they are dedicated to serving all patients. We are absolutely opposed to any rule that would allow health care workers to refuse care to anyone on the basis of religious beliefs. If someone feels unable to serve patients without such discrimination, they should not be going into the health care professions.

Sincerely,
Mr. George Alderson

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

To discriminate against people seeking medical care is abhorrent and immoral. If one's religious beliefs or sense of moral judgment prevents one from providing care, then that person should not be in the healthcare field. I find this appalling.

Sincerely,
Ms. Susan Rapoport
