Planned Parenthood

Subject: Stop discrimination against patients

Dear Planned Parenthood,

I'm writing about the proposed rule that allows providers and other health care workers to deny access to basic health care services, including -- though certainly not limited to -- transgender health services, abortion, and even birth control. This rule, coupled with the newly created "Conscience and Religious Freedom" division within the Office of Civil Rights, would turn the office charged with protecting people throughout the country from discrimination into an office that gives health care workers a license to discriminate against people, simply because of who they are or the services they seek.

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care.

Sincerely,
Mr. William Moody

All human beings deserve to be treated as human. Race, religion, sexual orientation or any other "qualifiers" should not determine who gets access to health services. Any available and legal health services should not be restricted because of those qualifiers either. Please rethink passing this rule.

Sincerely,
Miss Kimberly Phillips

I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care. Stop trying to take away peoples rights to there body and health. California i thought was a free country with the rights to do as they please, why is it on your agenda to hurt and tear people lives apart. How much more harm do you want to do, of course your not living through these conditions that others may live. Sorry for not being in a well established family, not having the funds, not learning about sex education, not having all the same opportunities as you might have. All you do is think for your own kind better your own people, we should care for are fellow human beings. Why should you have control other other peoples lives? We dont have a government system just a bunch of people thinking they own this country, dont let your ego get to your head.. just know that your role will once be gone, it wont last forever. And lastly life is way to short to be worry about what others are doing with their body and life decisions. step back and see things in a different light. Family, Dreams, Kindness, Enjoying life are my goals in life.

Sincerely,
Ms. Serena Bernal

Dear Planned Parenthood,

I'm writing about the proposed rule that allows providers and other health care workers to deny access to basic health care services, including -- though certainly not limited to -- transgender health services, abortion, and even birth control. This rule, coupled with the newly created "Conscience and Religious Freedom" division within the Office of Civil Rights, would turn the office charged with protecting people throughout the country from discrimination into an office that gives health care workers a license to discriminate against people, simply because of who they are or the services they seek.

If this rule is adopted, it would result in people not getting the care they need -- from people living with HIV seeking treatment to women seeking safe, legal abortions to LGBTQ patients getting basic care for themselves or their families.

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care.

Sincerely,
Mr. Richard Moyer

Taking the Hippocratic Oath, to do no harm, removes any religious convictions from any and every health care scenario. Religion has no place in any hospital department, in pharmacy, in doctors' offices, in EMS. If one's field of employment is health care, one needs to leave religion at home.

This is an egregious attempt to promote discrimination and restrict access to health care, particularly for vulnerable communities that already have trouble accessing it. I urge you to withdraw this dangerous and shameful proposed rule and instead focus your office on protecting access to care.

All major religions teach that we should care for "the least of these". How does one use one's religion as a basis to deny services?

Sincerely,
Mrs. Virginia Hartley
