**UNITED STATES DISTRICT COURT
WESTERN DISTRICT OF WASHINGTON
AT SEATTLE**

RYAN KARNOSKI, et al.,
Plaintiffs, and
STATE OF WASHINGTON,
Plaintiff-Intervenor,
v.
DONALD J. TRUMP, in his official capacity
as President of the United States, et al.,
Defendants.

Case No. 2:17-cv-01297-MJP
**DECLARATION OF VANESSA
BARSANTI IN SUPPORT OF LCR 37
JOINT SUBMISSION REGARDING
DOCUMENTS WITHHELD BY THE
GOVERNMENT AS NON-RESPONSIVE**
NOTE ON MOTION CALENDAR:
February 28, 2020

1 I, Vanessa Barsanti, swear under penalty of perjury under the laws of the United States to
2 the following:

3 1. I am counsel of record for Plaintiffs in this action, am over the age of 18, and am
4 competent to be a witness. I make this declaration in support of LCR 37 Joint Submission
5 Regarding Documents Withheld by the Government as Non-Responsive based on facts within
6 my personal knowledge.

7 2. Attached hereto as Exhibit 1 is an October 4, 2019 letter from counsel for Plaintiffs,
8 Vanessa Barsanti, to counsel for the Government, Andrew Carmichael.

9 3. On October 29, 2019, the Parties met and conferred and the Government stated that
10 it would not conduct a re-review of the withheld documents identified in Exhibit 1 other than the
11 specific exemplars identified by Plaintiffs. The Government stated that it would conduct a re-
12 review for responsiveness only of specific Bates numbers identified by Plaintiffs.

13 4. Attached hereto as Exhibit 2 is a November 4, 2019 email chain between counsel for
14 the Government, Andrew Carmichael, and counsel for Plaintiffs, Jordan Heinz and Vanessa
15 Barsanti, and an accompanying letter.

16 5. Attached hereto as Exhibit 3 is a November 26, 2019 letter from counsel for
17 Plaintiffs, Vanessa Barsanti, to counsel for the Government, Andrew Carmichael, and an
18 accompanying spreadsheet.

19 6. Attached hereto as Exhibit 4 is a December 2, 2019 email from counsel for the
20 Government, Andrew Carmichael, to counsel for the Plaintiffs, Jordan Heinz and Vanessa
21 Barsanti, and an accompanying spreadsheet.

22 7. Attached hereto as Exhibit 5 is a December 13, 2019 email from counsel for
23 Plaintiffs, Vanessa Barsanti, to counsel for the Government, Andrew Carmichael.

24 8. Attached hereto as Exhibit 6 is a January 17, 2020 email from counsel for the
25 Government, James Powers, to counsel for the Plaintiffs, Vanessa Barsanti, and an
26 accompanying spreadsheet.

27 9. Attached hereto as Exhibit 7 is a January 24, 2020 letter from counsel for Plaintiffs,
28 Vanessa Barsanti, to counsel for the Government, James Powers.

1 10. Attached hereto as Exhibit 8 is a July 2017 copy of the U.S. Department of Justice's
2 Specifications for Production of ESI and Digitized Images.

3 11. Plaintiffs' review of the metadata for the documents the Government withheld as
4 non-responsive revealed that several of the communications are amongst the members of the so-
5 called "Panel of Experts" (the "Panel") or those directly supporting the Panel. By way of
6 example only:

- 7 • USDOE00264742 is a PDF file titled "TG Procedures Memorandum" sent by Panel
8 member Mr. Anthony Kurta to various other military officials, including other Panel
9 members. TG is often used as shorthand for transgender by the military. The parent
10 email communication, USDOE00264741, is withheld for privilege.
- 11 • USDOE00080686 is a PDF file titled "Ruling-on-transgender-military-ban" sent by
12 Panel member Admiral William Moran to what appears to be his personal email
13 address. The parent email communication, USDOE00080685, is withheld for privilege.
- 14 • USDOE00113763 is a Word document titled "Coverage of GEN Milley and
15 Transgender" sent to Panel member General James McConville. The parent email
16 communication, USDOE00113762, is withheld for privilege.
- 17 • USDOE00072161 is a Word document titled "Agenda - TG Personnel Policy Work
18 Group 2 Oct 17" sent by Lieutenant Colonel Aaron Wellman, to several other military
19 personnel including Colonel Mary Krueger and Mr. Lernes Hebert. The parent email
20 communication, USDOE00072141, is withheld for privilege.

21 For each of these, the Government produced a slipsheet that reads, "Withheld for Non-
22 Responsiveness."

23 12. On August 17, 2018, the plaintiffs in *Doe v. Trump*, No. 17-cv-1597 (D.D.C.)
24 deposed Colonel Mary Krueger, who supported the Panel. A true and correct copy of the
25 transcript of this deposition is attached to this declaration as Exhibit 9.

26 13. Plaintiffs' review of the withheld documents' metadata revealed that the majority of
27 the withheld documents are attachments to communications the Government is withholding on
28 the basis of the deliberative process privilege.

1 14. I hereby certify that Plaintiffs, as the moving party, have complied with the
2 requirements of Local Civil Rule 37(2)(H).

3
4 I declare under the penalty of perjury that the foregoing is true and correct.

5

Re: *Karnoski et al. v. Trump et al.*, 2:17-cv-01297-MJP

Dear Drew:

I write regarding discovery deficiencies in the Department of Defense's ("DoD") productions. Specifically, the DoD appears to have selectively withheld nearly 15,000 documents from its productions on the basis of non-responsiveness. Under prevailing discovery standards, a party must produce all non-privileged documents in a family when it determines that a parent or child document is responsive. Further, these withheld documents do not appear to be non-responsive at all, either because the metadata indicates that they are responsive on their face, or because they are family members of responsive documents. Accordingly, Plaintiffs request that the DoD produce all family members of produced documents that have been withheld on the basis of non-responsiveness.

The law is clear that a party must produce all non-privileged documents in a family when it determines that any one member of the family is responsive. The rule of completeness—Federal Rule of Evidence 106—requires this practice. *See* FED. R. EVID. 106 ("If a party introduces all or part of a writing or recorded statement, an adverse party may require the introduction, at that time, of any other part—or any other writing or recorded statement—that in fairness ought to be considered at the same time."). Courts have noted that "[t]he logic of this evidentiary rule extends backwards to discovery which often leads to a conclusion (or at least a presumption) that if something was attached to a relevant e-mail, it is likely also relevant to the context of the communication." *Abu Dhabi Commercial Bank v. Morgan Stanley & Co. Inc.*, No. 08 CIV. 7508 SAS, 2011 WL 3738979, at *5 (S.D.N.Y. Aug. 18, 2011), *adopted without objection*, 2011 WL 3734236 (S.D.N.Y. Aug. 24, 2011). This approach recognizes the practical importance of producing all documents in a family to provide the necessary context for each family member. *See Families for Freedom v. U.S. Customs & Border Prot.*, No. 10 CIV. 2705 SAS, 2011 WL 4599592, at *4 (S.D.N.Y. Sept. 30, 2011) ("Context matters. The attachments can only be fully understood

KIRKLAND & ELLIS LLP

Andrew E. Carmichael
October 4, 2019
Page 2

and evaluated when read in the context of the emails to which they are attached. That is the way they were sent and the way they were received. It is also the way in which they should be produced.”); *Doe v. Trump*, 329 F.R.D. 262, 275–76 (W.D. Wash. 2018) (“It is a rare document that contains only relevant information; and irrelevant information within an otherwise relevant document may provide context necessary to understand the relevant information.”)

Additionally, parties must “produce documents as they are kept in the usual course of business . . . or organize and label them to correspond to the categories in the request.” FED. R. CIV. P. 34(b)(2)(E)(i). The DoD has declined to approach its production via the latter option, and thus must comply with the former. Production of a parent e-mail without its corresponding child attachment, or vice versa, does not satisfy the “usual course of business” requirement. *See Abu Dhabi Commercial Bank*, 2011 WL 3738979, at *5 (“[T]he production of a parent e-mail along with its corresponding child attachment satisfies Rule 34’s ‘usual course of business’ requirement for parties who opt to produce documents in that manner.”).

Because each of these documents withheld for non-responsiveness is part of a family wherein the other members were either slipsheeted for privilege and/or produced, the DoD has already acknowledged that the documents are members of a responsive family, and thus are necessary for context and completeness. Accordingly, they must be produced.

Moreover, it is clear based on the e-mail subject and/or file name information available that a multitude of the DoD’s withheld documents are independently responsive and highly relevant to Plaintiffs’ discovery requests. Plaintiffs note just a few examples:

- R_USDOE00201727 (FW: Transgender Retention (UNCLASSIFIED));
- R_USDOE00203190 (FW: HOT -- Transgender statement (UNCLASSIFIED));
- R_USDOE00217133 (RAND Materials on Transgender Study Group);
- R_USDOE00234741 (FW: DRAFT DTM and DoDI for TG Service WG);
- USDOE00085588 (Info Memo to DepSecDef TG.docx); and
- USDOE00085632 (RE: TG #'s (UNCLASSIFIED)).

Even beyond the subject and/or file name information, in some instances members of the family that *have* been produced are so clearly responsive and relevant that it strains credulity how Defendants could claim the family member is non-responsive. For example, R_USDOE00217133 is a communication withheld for non-responsive that transmits two articles: 1) The Implications of Allowing Transgender Personnel to Serve Openly in the U.S. Military (R_USDOE0217135); and 2) Assessing the Implications of Allowing Transgender Personnel to Serve Openly

KIRKLAND & ELLIS LLP

Andrew E. Carmichael
October 4, 2019
Page 3

(R_USDOE0217141). Any communication relating to these articles that cover issues central to this litigation is unquestionably responsive.

Yet the improperly withheld documents are not limited to documents where the filename and/or e-mail subject are facially relevant. As just one example, the DoD produced an e-mail from Former U.S. Secretary of Defense Jim Mattis (USDOEE00134732_0001) with the subject line “FW: Draft article and more.” Though the subject line does not necessarily indicate that the communication relates to transgender military service, the entire body of the e-mail is responsive and highly relevant in that it includes notes regarding two individuals who have spoken on transgender issues—William Woodruff and Paul McHugh—and, in McHugh’s case, briefly summarizes his position. The e-mail also indicates that it included an attachment (USDOE00134733) titled “How not to deter a war.docx.” Despite the fact that the document was attached to an email that *only* contained information related to issues in this litigation, the DoD perplexingly withheld the attachment as non-responsive.

Because the DoD’s slipsheets for documents “Withheld as Non-Responsive” are non-privileged and are either independently responsive or attached to responsive family members, Plaintiffs request that the DoD produce all documents that were previously withheld on the basis of responsiveness alone and are part of responsive families.

* * * *

We look forward to your prompt response and availability to meet and confer.

Sincerely,

/s/ Vanessa Barsanti

Subject: RE: Karnoski, et al. v. Trump, et al.

Drew,

Thank you for this email and for speaking with us on Tuesday. I've summarized below our understanding of the parties' positions on the discovery disputes and issues that we discussed during Tuesday's call. If you believe the summary contains any material errors or omissions, or if the government wishes to discuss any of these issues further, please let us know as soon as possible.

1. The Department of Defense agrees to release all previously withheld communications with William Woodruff and expects to produce them by Friday, Nov. 1;

Yes. They were included in Friday's production.

2. Your client agrees to provide a complete list of the custodians whose documents it searched in connection with Plaintiffs' Requests For Production; the list will include the following information for each custodian:

- a. Custodian Name
- b. Title
- c. Department
- d. Terms Searched by Custodian
- e. Date Range Searched by Term Searched

I have asked the Military Services and the Coast Guard to provide additional information on these topics. I expect there to be some exceptions as there are several minor custodians that may not be included because they have very little if any relevance to the present litigation. For example, there was a collection at the Naval Academy based on the allegations in the related *Doe* litigation and information from that collection is not relevant to any issue in *Karnoski*

3. You will confirm whether you have collected documents from all custodians listed in categories (1) and (2) on page 2 of my September 27, 2019 letter. That is each member of the Panel of Experts and each leader(s), chair(s), or person(s) in charge of each working group that provided support to the PoE.

Yes. DoD and the Military Services are working on this now.

4. You confirmed that you have not collected from all individuals listed in categories (3) and (4) on page 2 of my September 27, 2019 letter, which are the authors/reviewers of the February 2018 Memorandum and the Report and Recommendations.

I confirmed that there was not a collection from Department of Justice attorneys (such as myself). As to DoD and the Military Services, we are not answering this question based on the same privilege objections we have asserted in Interrogatories 16-19. Therefore, I suggest that we postpone further discussions on this issue until after the Court rules on Plaintiffs' pending motion as the Court's ruling may resolve the issue.

5. With regards to each of the RFPs identified in my September 27 letter on pages 4-5 under the header "Records Requiring Targeted Collections" (RFP Nos. 11, 12, 16-17, 26, 36, and 47-54), you indicated that you will provide information regarding whether your client has searched for these records;

We will provide additional information regarding DoD's and the Military Services' search and collection of documents responsive to (RFP Nos. 11, 12, 16-17, 26, 36, and 47-54).

6. Beyond what's stated above, your client will not perform any additional collections or searches to identify documents responsive to Plaintiffs' document requests. Your client will not make searches across all custodians consistent with respect to search terms and date ranges, and it will not run any of the additional search terms requested by Plaintiffs;

That is correct. DoD and the Military Services believe that their collection, searches and production of materials in this and the related litigation already go well beyond what the case law and the Federal Rules require and except where noted in my October 30, 2019 email (below) will not agree to conduct additional collections or searches. We note that the original search and collection process in this case took approximately 8 months and was extremely costly in time, money and manpower resources. The additional collections and searches you propose (nearly a year after the original search and collection process concluded) would likely take months to complete, would cost a significant amount of additional resources, and would likely provide no additional relevant information.

7. With respect to Plaintiffs' October 7 letter re: production of third-party communications, your client agrees to identify the individuals it believes are not third parties and divide Plaintiffs' list into those that are third parties and those that are not. You intend to share these lists with Plaintiffs and inform Plaintiffs whether Defendants will waive their claims of privilege over communications with third parties. Please provide this information by November 8;

Please see attached correspondence regarding Plaintiffs' October 7, 2019 letter.

8. You agreed to review the specific examples of non-responsive slipsheets provided in Plaintiffs' September 27 letter, but your client will not conduct a broader review to ensure all responsive documents have been produced. Please provide the results of your review by November 8;

DoD and the Military Services will review the specific examples of non-responsive slipsheets provided in Plaintiffs' September 27 letter. DoD and the Military Services previously reviewed all documents in their collection for responsiveness as detailed in the Declaration of Robert Easton, *see* Dkt. 371-2, Dkt. 381-1, and the draft declarations from the Military Services I provided to you on Monday, October 28, 2019. DoD and the Military Services will not conduct a re-review of all documents it previously determined were non-responsive as that process would be extremely burdensome—likely taking several months to complete—and would likely provide no additional relevant information to Plaintiffs. If DoD and the Military Services release additional documents pursuant to its review of the specific examples you have provided, I expect them to be in the November 22, 2019 production.

9. The parties have agreed that neither side will move to compel or move for a

protective order regarding Interrogatory Nos. 16-19 until after the Court rules on Plaintiffs' pending motion regarding the deliberative process privilege. With respect to Defendants' responses to the other interrogatories at issue in Jordan Heinz's September 27 letter, your client stands on their objections and does not plan to amend its responses to Plaintiffs' interrogatories.

That is correct. Also please see bullet 4 above.

10. Your client will not consent to use the expedited procedure set forth in Local Rule 37(a)(2) to resolve the parties' remaining disputes.

That is correct.

Thank you,

Vanessa Barsanti

Counsel for Plaintiffs

Re: Your Letter of October 7, 2019 in *Karnoski v. Trump*, No. 17-1297

Dear Vanessa,

I write in response to your letter of October 7, 2019, which purports to challenge DoD's withholding of "communications with and documents shared with several third parties" under the deliberative process or attorney-client privileges. Your letter notes 14 individuals and also incorporates an Exhibit A, which contains hundreds of names and email addresses. Your letter does not refer to any specific privilege log entries nor does it contain any details about particular documents to which you object to Defendants' invocation of privilege. For the reasons set forth below, Defendants will not undertake an unduly burdensome review of the entries identified in Exhibit A.

To begin, Plaintiffs appear to have made no serious effort to narrow this dispute before transmitting their letter. Exhibit A purports to contain entries from the privilege log "that appear to represent communications with third parties" but even a cursory review by undersigned counsel indicates that this is not true as to numerous entries. For example, Exhibit A contains references to no less than: the current and most recent former Secretaries of Defense ("Esper, Mark T." and "Jim Mattis jim Mattis@jimmattis.com"), two DOJ counsel of record in this case ("Brinton Lucas" and "Ryan Parker"), and numerous attendees at meetings of the Panel of Experts, all of whom have been previously identified in Defendants' discovery responses. Defendants need not undertake a burdensome review of the hundreds of entries in Exhibit A where Plaintiffs appear not to have made even a passing effort to consult, for example, Defendants' responses to Plaintiffs' interrogatories to determine whether the individuals they have supposed are third parties are, in fact, employees or officials of the Department of Defense or Military Services.

Even if Defendants undertook this review, it is unclear what doing so would accomplish where Plaintiffs have provided no information about the particular privilege log entries they challenge. A one-size-fits-all analysis with respect to the deliberative process privilege and third party communications is not possible. Instead, for example, information generated by third parties may be protected by the privilege where it is solicited by the agency as part of its deliberative process. *See, e.g., Public Citizen, Inc. v. Dep't of Justice*, 111 F.3d 168, 171 (D.C. Cir. 1997) (“If it is to effectively deliberate, an agency may need or want to enlist the help of outside experts skilled at unravelling the knotty complexities of problems outside their ken.” (citation and alterations omitted)); *Ryan v. Dep't of Justice*, 617 F.2d 781, 789 (D.C. Cir. 1980) (“Such consultations [with outside consultants] are an integral part of [an agency’s] deliberative process”); *National Institute of Military Justice v. Department of Defense*, 512 F.3d 677, 681 (D.C. Cir. 2008). Even if Defendants were to confirm that particular entries in Exhibit A correspond to third parties that would be of little consequence without Plaintiffs pointing to specific privilege log entries to provide Defendants a basis to determine the context for the assertion of privilege. Additionally, as to persons that were previously employed by DoD, the date of the document is essential, as it would determine whether the individual was part of the agency at the time the privileged document was transmitted.

Nonetheless, as to the 14 individuals identified in your letter itself, Defendants will investigate further and provide additional information about their identities, which may be of use in determining whether you intend to dispute any particular privilege assertions by Defendants. I note that at least one of the individuals identified in your letter, Dave Gruber, is an employee of the Department of Defense, identified as such in Defendants’ interrogatory responses.

We will be in touch as soon as practicable with additional information about the 13 other individuals identified in your letter.

Sincerely,

/s/

Andrew E. Carmichael

Re: Document Productions of Communications Withheld as Non-Responsive in
Karnoski et al. v. Trump et al., 2:17-cv-01297-MJP

Dear Drew:

I write regarding the Department of Defense's ("DoD") refusal to re-review documents in its productions that have been withheld as non-responsive despite their inclusion in a family of responsive documents. As detailed in my October 4 letter, it is inappropriate to withhold documents in a family based on responsiveness when at least one member of the family is responsive. Defendants have declined to re-review the withheld records despite Plaintiffs' concerns regarding the clear relevance of the associated metadata. While Plaintiffs do not believe the burden can or should be on them to identify responsive documents based on the limited data available to them, in the spirit of cooperation, Plaintiffs have narrowed the approximately 15,000 documents withheld for non-responsiveness and ask that, consistent with the parties' conversations during meet and confers, the DoD re-review the smaller subset identified in Exhibit A.

Though Plaintiffs reserve their right to challenge the withholding of documents based on non-responsiveness that are not on Exhibit A, those included in the exhibit contain more obvious indicia that they are likely to be responsive:

- Numerous entries contain either email subject lines or attached file names that expressly reference the DoD's policies relating to transgender personnel or gender dysphoria. Many of these entries use the abbreviation "TG" as a substitute for the descriptor "transgender."
- Many entries contain metadata that references sex or gender reassignment surgery, procedures related to reassignment surgery, or gender marker changes. These entries often use the abbreviation "SRA" for reassignment surgery.

KIRKLAND & ELLIS LLP

Andrew E. Carmichael
November 26, 2019
Page 2

- Several entries contain metadata that references exceptions to policy (ETP) and specifics service members' requests that ETPs be granted. The nature of the non-responsive slipsheet family and language in the metadata evidence that these ETPs refer to the DoD's policy on transgender personnel.

Please indicate by December 2 whether the DoD will consent to re-reviewing this limited subset of its documents withheld for non-responsiveness within a responsive family. We are available to meet and confer at your convenience.

Sincerely,

/s/ Vanessa Barsanti

Vanessa Barsanti

Vanessa,

I did a large sampling of the documents listed on Exhibit A to Plaintiffs' November 26th letter. Every document I looked at with an "R" before the Bates Number (*e.g.*, "R_USDOE00181828") and the vast majority (I would estimate over 95%) of the documents with the extension .msg in the file name were Outlook delivery or read receipts (*i.e.*, an automatic receipt generated by Microsoft Outlook upon the delivery or receipt of an email). These delivery and read receipts are not responsive to any discovery request and are plainly irrelevant to Plaintiffs' claims. Usually the document ID number for the actual email either numerically proceeds or follows the delivery or read receipt and does not appear on your chart. This indicates that the actual email with substantive content was produced to Plaintiffs (or, if applicable, withheld for privilege), whereas the non-responsive delivery and read receipts were not.

I then removed all of the documents that began with an "R" before the Bates Number or have an .msg extension in the file name from your spreadsheet, which took the total down to 614. The revised spreadsheet is attached. Of these 614 documents, the vast majority appear to be discussions between medical professionals regarding individualized treatment of a service member for gender dysphoria (most often from the Navy production) which we do not believe are responsive to any of Plaintiffs' discovery requests.

If Plaintiffs are still interested in pursuing a review of such documents, I propose that they pick a random row number on the attached spreadsheet. Then we can get DoD and the Military Services to re-review the following 50 rows from that number and provide more explanation as to why each of those 50 documents was deemed non-responsive. For example, if Plaintiffs pick the number 351, DoD and/or the Military Services would re-review documents in rows 351 through 400 and provide additional explanations. Once you review the additional explanations, we can meet and confer again to determine our respective positions on reviewing the remaining documents.

Happy to discuss this in more detail on a call tomorrow.

Best regards,

Drew

Drew,

While plaintiffs do not agree with your assertions that read receipts and records related to the medical treatment of a service member for gender dysphoria reviewed by a custodian the Department of Defense collected from in relation to the Ban are irrelevant, plaintiffs do agree that at this time it would be helpful for the defendants to provide more information regarding a subset of these withheld documents and/or produce them if re-review determines that they are responsive. Rather than picking 50 in order, we propose a random sampling. I am attaching a revised version of the spreadsheet you sent narrowed down to plaintiffs' proposed 50 documents. Please confirm that defendants will re-review these and provide additional information and/or produce them if responsive.

Vanessa Barsanti

Subject: [EXT] RE: Karnoski, et al. v. Trump, et al. - Non-Responsive Slipsheets

Vanessa,

I did a large sampling of the documents listed on Exhibit A to Plaintiffs' November 26th letter. Every document I looked at with an "R" before the Bates Number (*e.g.*, "R_USDOE00181828") and the vast majority (I would estimate over 95%) of the documents with the extension .msg in

the file name were Outlook delivery or read receipts (*i.e.*, an automatic receipt generated by Microsoft Outlook upon the delivery or receipt of an email). These delivery and read receipts are not responsive to any discovery request and are plainly irrelevant to Plaintiffs' claims. Usually the document ID number for the actual email either numerically proceeds or follows the delivery or read receipt and does not appear on your chart. This indicates that the actual email with substantive content was produced to Plaintiffs (or, if applicable, withheld for privilege), whereas the non-responsive delivery and read receipts were not.

I then removed all of the documents that began with an "R" before the Bates Number or have an .msg extension in the file name from your spreadsheet, which took the total down to 614. The revised spreadsheet is attached. Of these 614 documents, the vast majority appear to be discussions between medical professionals regarding individualized treatment of a service member for gender dysphoria (most often from the Navy production) which we do not believe are responsive to any of Plaintiffs' discovery requests.

If Plaintiffs are still interested in pursuing a review of such documents, I propose that they pick a random row number on the attached spreadsheet. Then we can get DoD and the Military Services to re-review the following 50 rows from that number and provide more explanation as to why each of those 50 documents was deemed non-responsive. For example, if Plaintiffs pick the number 351, DoD and/or the Military Services would re-review documents in rows 351 through 400 and provide additional explanations. Once you review the additional explanations, we can meet and confer again to determine our respective positions on reviewing the remaining documents.

Happy to discuss this in more detail on a call tomorrow.

Best regards,

Drew

Vanessa,

I write to follow up on a couple of discovery issues ongoing between the parties. First, I have attached correspondence in response to your December 13 letter regarding purported third parties on Defendants' privilege logs. Second, I have attached comments from Defendants concerning the 50 documents marked non-responsive that Plaintiffs randomly selected.

Thanks,
Jim

Re: *Karnoski et al. v. Trump et al.*, 2:17-cv-01297-MJP

Dear Jim:

I write in response to your January 17 email providing more information regarding the sampling of 50 non-responsive slipsheets. The information provided by Defendants further validates Plaintiffs' concern—these documents have been improperly withheld.

As detailed in Plaintiffs' October 4, 2019 letter, even if a non-privileged family member of a responsive document is not responsive, because of its association with a responsive document it must be produced. Federal Rule of Evidence 106, colloquially the rule of completeness, requires it. As does Federal Rule of Civil Procedure 34, which mandates that documents be produced "as they are kept in the usual course of business."

Apart from clear law requiring the production of non-privileged non-responsive family members in an otherwise responsive family, these documents do not appear to be non-responsive at all. Per Drew's December 2 email, "the vast majority (I would estimate over 95%) of the documents with the extension .msg in the file name were Outlook delivery or read receipts." To the extent a witness denies reading or viewing a message, read receipts are relevant evidence relating to that contention. Defendants must produce these messages.

Drew's December 2 email also states that of the remainder of the documents, "the vast majority appear to be discussions between medical professionals regarding individualized treatment of a service member for gender dysphoria." Yet Defendants did not collect from medical professionals in relation to their individualized treatment. They collected from the Panel of Experts and those directly supporting the Panel. This is plainly evident with one look at the

KIRKLAND & ELLIS LLP

James Powers
January 24, 2020
Page 2

metadata for these documents. For example, senders and recipients of the messages related to the withheld documents include Panel members such as Mr. Anthony Kurta, General James McConville, and Admiral William Moran. Colonel Mary Krueger, who testified in her deposition that she “supported the panel of experts” is amongst the senders and recipients. 04/17/18 Krueger Dep. Tr. at 57:16. As is Mr. Lernes Hebert, who provided a December 15, 2017 declaration in this matter stating that he was “responsible for overseeing the human resource policies impacting the sustainment of the all-volunteer-force for the Department of Defense...” and opined on the implementation of transgender accessions. Dkt. No. 107. The list goes on. Furthermore, the majority of these of withheld documents are attachments to communications withheld for deliberative process privilege (“DPP”). If these attachments were part of communications that Defendants assert are shielded by DPP because they reflect the internal processes related to the Ban then it is difficult to see how the attachments could be irrelevant. In light of the context in which these documents were sent and the individuals involved in the review of them, the only logical conclusion is that they were considered in connection with the formation of the Ban.

But one need not even infer from the metadata or privilege calls the relevance of the documents being withheld. The information provided by Defendants on the sampling of 50 reveals all too clearly that relevant records are being withheld. By way of example only, USDOE00151943 is an email attaching an endocrinology presentation regarding the treatment of transgender individuals. Defendants have consistently put the medical treatment of transgender service members at issue in this litigation—both with respect to cost and impact to readiness and lethality. The substance of an email conveying a military presentation regarding the medical treatment of transgender individuals is plainly relevant to both the claims and defenses in this litigation. USDOE00253403 and USDOE00253405 both contain information known to the military about the cost of a hysterectomy in the private sector and are part of communications that Defendants themselves describe on their privilege log as relating to “the formulation of the transgender policy.” Similarly, USDOE197075 is a document detailing insurance policy coverage for transgender individuals and is part of a communication described by Defendants as including “deliberations regarding the formulation of the transgender policy” on their log. If this was considered as part of the formulation of the Ban then it is plainly relevant.

Plaintiffs first raised this issue 16 weeks ago. Defendants’ delay tactics with respect to these documents can go on no longer. Please indicate by Wednesday, January 29 whether you will agree to produce these documents. Otherwise we will seek assistance from the Court.

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

Collection of Electronically Stored Information (ESI)

Careful consideration should be given to the methodology, implementation and documentation of ESI collection to ensure that all responsive data and metadata are preserved in the collection process.

1. Specification Modifications

Any modifications or deviations from the Production Specifications may be done only with the express permission of the government and these modifications or deviations should be communicated to the government and approved by the government in written form. Any responsive data or documents that exist in locations or native forms not discussed in these Production Specifications remain responsive and, therefore, arrangements should be made with the government to facilitate their production.

2. Production Format of ESI and Imaged Hard Copy

Responsive ESI and imaged hard copy shall be produced in the format outlined below. All ESI, except as outlined below in sections 5 – 20, shall be rendered to TIFF image format, and accompanied by a Concordance® Image Cross Reference file. All applicable metadata/database (see section 3 below) shall be extracted and provided in Concordance® load file format.

a. Image File Format: All images, paper documents scanned to images, or rendered ESI, shall be produced as 300 dpi single-page TIFF files, CCITT Group IV (2D Compression). Images should be uniquely and sequentially Bates numbered and unless otherwise specified, Bates numbers should be an endorsement on each image.

- i. All TIFF file names shall include the unique Bates number burned into the image. (See paragraph 21, below, regarding Bates number instructions.)
- ii. All TIFF image files shall be stored with the “.tif” extension.
- iii. Images shall be OCR’d using standard COTS products.
 1. An exception report shall be provided when limitations of paper digitization software/hardware or attribute conversion do not allow for OCR text conversion of certain images. The report shall include the DOCID or Bates number(s) corresponding to each such image.
 - a. All pages of a document or all pages of a collection of documents that comprise a folder or other logical grouping, including a box, shall be delivered on a single piece of media.
 - b. No image folder shall contain more than 2000 images.

b. Concordance® Image Cross Reference file: Images should be accompanied by a Concordance® Image Cross Reference file that associates each Bates number with its corresponding single-page TIFF image file. The Cross Reference file should also contain the image file path for each Bates numbered page.

- i. Image Cross Reference Sample Format:

```
ABC00000001,OLS,D:\DatabaseName\Images\001\ ABC00000001.TIF,Y,,,
ABC00000002,OLS,D:\DatabaseName\Images\001\ ABC00000002.TIF,,,,
ABC00000003,OLS,D:\DatabaseName\Images\001\ ABC00000003.TIF,,,,
```

July 2017

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

ABC00000004,OLS,D:\DatabaseName\Images\001\ ABC00000004.TIF,Y,,,

c. Concordance® Load File: Images should also be accompanied by a “text load file” containing delimited text that will populate fields in a searchable, flat database environment. The file should contain the required fields listed below in section 3.

- i. Text delimited load files are defined using the standard Concordance delimiters. For example:

<i>Field Separator</i>	¶ or Code 020
<i>Text Qualifier</i>	þ or Code 254

- ii. This load file should also contain hyperlinks to applicable native files, such as Microsoft Excel or PowerPoint files.
- iii. There should be one line for every record in a collection.
- iv. The load file must contain a header listing the metadata/database fields contained within. For example, if the data file consists of a First Page of a Record (BegDoc#), Last Page of a Record (ending Bates / ENDDOC#), DOCID, DOCDate, File Name, and a Title, then the structure may appear as follows:

þBEGDOCþ¶þENDDOCþ¶þDOCIDþ¶þDOCDATEþ¶þFILENAMEþ¶þTITLEþ

d. The extracted/OCR text should be provided for each document as a separate single text file. The file name should match the BEGDOC# or DOCID for that specific record and be accompanied by the .txt extension.

e. Directory and folder structure: The directory structure for productions should be:

CaseName\LoadFiles

CaseName\Images < For supporting images (can include subfolders as needed, should not include more than 2,000 files per folder)

CaseName\Natives <Native Files location (can include subfolders as needed, should not include more than 2,000 files per folder)

CaseName\Text <Extracted Text files location (can include subfolders as needed, should not include more than 2,000 files per folder)

July 2017

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

3. Required Metadata/Database Fields

A “✓” denotes that the indicated field should be present in the load file produced. “Other ESI” includes data discussed in sections 5 – 20 below, but does not include email, email repositories (section 11), “stand alone” items (section 12), and imaged hard copy material (section 9). Email, email repositories, and “stand alone” materials (section 12) should comply with “Email” column below. Imaged hard copy materials should comply with the “Hard Copy” column.

Field name	Field Description	Field Type	Field Value	Hard Copy	E-mail	Other ESI
COLLECTION SOURCE	Name of the Company/Organization data was collected from	Text	160	✓	✓	✓
SOURCE ID (BOX #)	Submission/volume/box number	Text	10	✓	✓	✓
CUSTODIAN	Custodian/Source - format: Last, First or ABC Dept.	Text	160	✓	✓	✓
AUTHOR	Creator of the document	Text	500			✓
BEGDOC#	Start Bates (including prefix) - No spaces	Text	60	✓	✓	✓
ENDDOC#	End Bates (including prefix) - No spaces	Text	60	✓	✓	✓
DOCID	Unique document Bates # or populate with the same value as Start Bates (DOCID = BEGDOC#)	Text	60	✓	✓	✓
PGCOUNT	Page Count	Number	10	✓	✓	✓
GROUPID	Contains the Group Identifier for the family, in order to group files with their attachments	Text	60		✓	✓
PARENTID	Contains the Document Identifier of an attachment's parent	Text	60		✓	✓
ATTACHIDS	Child document list; Child DOCID or Child Start Bates	Text – semicolon delimited	Unlimited	✓	✓	✓

Field name	Field Description	Field Type	Field Value	Hard Copy	E-mail	Other ESI
NATIVE LINK	Relative file path location to the native file	Text	Unlimited		✓	✓
FOLDER ID	Complete E-mail folder path (e.g. Inbox\Active) or Hard Copy container information (e.g. folder or binder name)	Text	Unlimited	✓	✓	
PARAGRAPH REQUEST NUMBER	Subpoena/request paragraph number to which the document is responsive. Use semicolon to delimit multiple entries.	Text – semicolon delimited	Unlimited	✓	✓	✓
MD5 HASH	MD5 Hash value (used for deduplication or other processing) (e-mail hash values must be run with the e-mail and all of its attachments)	Text	Unlimited		✓	✓
MESSAGEHEADER	E-mail header. Can contain IP address	Text	Unlimited		✓	
ATTACHMCOUNT	Number of attachments (any level child document) associated with a ParentID	Text	10		✓	
FILE TYPE	Identifies the application that created the file Type of file, not to be confused with file extension	Text	160		✓	✓
COMMENTS	Identifies whether the document has comments associated with it	Text	10		✓	✓
MESSAGE TYPE	Exchange Message class or equivalent	Text	60		✓	
EXTENDED PROPERTIES	For PDFs Only	Text	600		✓	✓

July 2017

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

4. Search, De-Duplication, Near-Duplicate Identification, E-mail Conversation Threading and Other Culling Procedures

De-duplication of exact copies within a custodian’s data may be done at the family level, but all file paths and custodians must be provided for each duplicate document in an exception report in .csv format. The recipient shall not use any other procedure to cull, filter, group, separate or de-duplicate, or near-deduplicate, etc. (i.e., reduce the volume of) responsive material before discussing with and obtaining the written approval of the government. All objective coding (e.g., near duplicate ID or e-mail thread ID) shall be discussed and produced to the government as additional metadata fields. The recipient will not employ analytic software or technology to search identify, or review potentially responsive material, including but not limited to technology assisted review (TAR) or predictive coding, without first discussing with the government.

5. Hidden Text

All hidden text (e.g. track changes, hidden columns, mark-ups, notes) shall be expanded and rendered in the image file. For files that cannot be expanded the native files shall be produced with the image file.

6. Embedded Files

All non-graphic embedded objects (Word documents, Excel spreadsheets, .wav files, etc.) that are found within a file shall be extracted and produced. For purposes of production, the embedded files shall be treated as attachments to the original file, with the parent/child relationship preserved.

7. Image-Only Files

All image-only files (non-searchable .pdfs, multi-page TIFFs, Snipping Tool and other screenshots, etc., as well as all other images that contain text) shall be produced with OCR text and metadata/database fields identified in section 3 for “Other ESI.”

8. Encrypted Files

Any data (whether individual files or digital containers) that is protected by a password, encryption key, digital rights management, or other encryption scheme, shall be decrypted prior to processing for production.

- a.** The unencrypted text shall be extracted and provided per section 2.c. The unencrypted files shall be used to render images and provided per sections 2.a and 2.b. The unencrypted native file shall be produced pursuant to sections 10-20.
- b.** If such protected data is encountered but unable to be processed, each file or container shall be reported as an exception in the accompanying Exception Report (pursuant to section 26) and shall include all available metadata associated with the data, including custodian information.

9. Production of Imaged Hard Copy Records

All imaged hard copy material shall reflect accurate document unitization including all attachments and container information (to be reflected in the PARENTID, ATTACHID, BEGATTACH, ENDATTACH and FOLDERID).

July 2017

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

- a.** Unitization in this context refers to identifying and marking the boundaries of documents within the collection, where a document is defined as the smallest physical fastened unit within a bundle. (e.g., staples, paperclips, rubber bands, folders, or tabs in a binder).
- b.** The first document in the collection represents the parent document and all other documents will represent the children.
- c.** All imaged hard copy documents shall be produced as 300 dpi single-page TIFF files, CCITT Group IV (2D Compression). All documents shall be produced in black and white TIFF format unless the image requires color. An image requires color when color in the document adds emphasis to information in the document or is itself information that would not be readily apparent on the face of a black and white image. Images identified as requiring color shall be produced as color 300 dpi single-page JPEG files.
- d.** All objective coding (e.g., document date or document author) should be discussed and produced to the government as additional metadata/database fields.

10. Production of Spreadsheets and Presentation Files

All spreadsheet and presentation files (e.g. Excel, PowerPoint) shall be produced in the unprocessed “as kept in the ordinary course of business” state (i.e., in native format), with an associated placeholder image and endorsed with a unique Bates number. *See* section 20 below. The file produced should maintain the integrity of all source, custodian, application, embedded and related file system metadata. No alteration shall be made to file names or extensions for responsive native electronic files.

11. Production of E-mail Repositories

E-mail repositories, also known as e-mail databases (e.g., Outlook PST, Lotus NSF, etc.), can contain a variety of items, including: messages, calendars, contacts, tasks, etc. For purposes of production, responsive items shall include the “E-mail” metadata/database fields outlined in section 3, including but not limited to all parent items (mail, calendar, contacts, tasks, notes, etc.) and child files (attachments of files to e-mail or other items) with the parent/child relationship preserved. Our preferred format for e-mail productions is PST. E-mail should NOT be provided in X400 or X500 format. E-mail databases from systems other than Microsoft Exchange shall be produced after consultation with and written consent of the government about the format for the production of such databases.

12. Production of Items Originally Generated in E-mail Repositories but Found and Collected Outside of E-mail Repositories, i.e., “Stand-alone” Items

Any parent e-mail or other parent items (e.g., calendar, contacts, tasks, notes, etc.) found and collected outside of e-mail repositories (e.g., items having extensions .msg, .htm, .mht, etc.), shall be produced with the “Loose E-mail” metadata fields outlined in section 3, including but not limited to any attachments, maintaining the family (parent/child) relationship.

13. Production of Instant Messenger (IM), Voicemail Data, Audio Data, Video Data, etc.

The responding party shall identify, collect, and produce any and all data which is responsive to the requests which may be stored in audio or video recordings, cell phone/PDA/Blackberry/smart phone data, tablet data, voicemail messaging data, instant messaging, text messaging, conference call data, video/audio conferencing (e.g., GoTo Meeting, WebEx), and related/similar technologies. However, such data, logs, metadata or other files related thereto, as well as other

July 2017

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

less common but similar data types, shall be produced after consultation with and written consent of the government about the format for the production of such data.

14. Production of Social Media

Prior to any production of responsive data from social media (e.g., Twitter, Facebook, Google+, LinkedIn, etc.) the producing party shall first discuss with the government the potential export formats before collecting the information, to ensure it is collected and produced in a way that preserves the original metadata, has a clear chain of custody, and provides as much information as possible regarding the source and history of each individual communication.

Social media platforms offer different functions, forms of content, and capability for downloading accounts. Because of these differences, prior to collection of social media data, the producing party must discuss with the government the available export and production methods and formats that the producing party is considering. Unless the government agrees to an alternative in writing, regardless of the social media platform, productions of social media content must meet the following general requirements: (1) separate (2) searchable (3) static images of (4) each responsive posting on the social media platform, (5) all related content (e.g., comments, likes, share or re-transmittal information, images, videos, linked documents and content), and (6) associated metadata (e.g., user name(s), date, and time of all posts, comments, likes, share or re-transmittals).

These general requirements are in addition to any more specific requirements in a particular request (e.g., geolocation data), and the producing party must ask the government about any perceived conflict between these requirements and another source of specifications or requirements. If available from the social media platform or through social media data processing software, files that facilitate interactive review of the data (i.e., html files) as well as load files in .csv format must be produced with the associated content.

15. Production of Structured Data

Prior to any production of responsive data from a structured database (e.g., Oracle, SAP, SQL, MySQL, QuickBooks, etc.), the producing party shall first identify the database type and version number, provide the database dictionary and any user manuals, or any other documentation describing the structure and/or content of the database and a list of all reports that can be generated from the database. The list of reports shall be provided in native Excel (.xls or .xlsx) format.

16. Production of Structured Data from Proprietary Applications

Prior to any production of structured data from proprietary applications (e.g., proprietary timekeeping, accounting, sales rep call notes, CRMs, SharePoint etc.) the producing party shall first provide the database dictionary and a list of all reports that can be generated from the structured database. The list of reports shall be produced in native Excel (.xls or .xlsx) format.

17. Production of Photographs with Native File or Digitized ESI

Photographs shall be produced as single-page JPEG files with a resolution equivalent to the original image as they were captured/created. All JPEG files shall have extracted metadata/database fields provided in a Concordance® load file format as outlined in section 3 for “Other ESI.”

July 2017

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

18. Production of Images from which Text Cannot be OCR Converted

An exception report shall be provided when limitations of paper digitization software/hardware or attribute conversion do not allow for OCR text conversion of certain images. The report shall include the DOCID or Bates number(s) corresponding to each such image.

19. Production of ESI from Non-PC or Non-Windows-based Systems

If responsive ESI is in non-PC or non-Windows-based Systems (e.g., Apple, IBM mainframes, and UNIX machines, Android device, etc.), the ESI shall be produced after discussion with and written consent of the government about the format for the production of such data.

20. Production of Native Files (When Applicable Pursuant to These Specifications)

Production of native files, as called for in these specifications, shall have extracted metadata/database fields provided in a Concordance® load file format as defined in the field specifications for “Other ESI” as outlined in section 3.

ESI shall be produced in a manner which is functionally usable by the government. The following are examples:

- a. AutoCAD data, e.g., DWG and DXF files, shall be processed/converted and produced as single-page JPG image files and accompanied by a Concordance® Image formatted load file as described above. The native files shall be placed in a separate folder on the production media and linked by a hyperlink within the text load file.
- b. GIS data shall be produced in its native format and be accompanied by a viewer such that the mapping or other data can be reviewed in a manner that does not detract from its ability to be reasonably understood.
- c. Audio and video recordings shall be produced in native format and be accompanied by a viewer if such recordings do not play in a generic application (e.g., Windows Media Player).

21. Bates Number Convention

All images should be assigned Bates numbers before production to the government. Each Bates number shall be a standard length, include leading zeros in the number, and be unique for each produced page. The numbers should be endorsed on the actual images at a location that does not obliterate, conceal, or interfere with any information from the source document. Native files should be assigned a single Bates number for the entire file which will represent the native document in the load/dat file. The load/dat file will include a reference to the native file path and utilize the NATIVELINK metadata field). The Bates number shall not exceed 30 characters in length and shall include leading zeros in the numeric portion. The Bates number shall be a unique number given to each page (when assigned to an image) or to each document (when assigned to a native file). If the parties agree to a rolling production, the numbering convention shall remain consistent throughout the entire production. There shall be no spaces between the prefix and numeric value. If suffixes are required, please use “dot notation.” Below is a sample of dot notation:

PREFIX0000001	PREFIX0000003
PREFIX0000001.001	PREFIX0000003.001
PREFIX0000001.002	PREFIX0000003.002

July 2017

Specifications for Production of ESI and Digitized (“Scanned”) Images (“Production Specifications”)

22. Media Formats for Storage and Delivery of Production Data

Electronic documents and data shall be delivered on any of the following media:

- a. CD-ROMs and/or DVD-R (+/-) formatted to ISO/IEC 13346 and Universal Disk Format 1.02 specifications; Blu-ray.
- b. External hard drives (USB 3.0 or higher, Firewire or eSATA, formatted to NTFS format specifications) or flash drives.
- c. Storage media used to deliver ESI shall be appropriate to the size of the data in the production.
- d. Media should be labeled with the case name, production date, Bates range, and producing party.

23. Virus Protection and Security for Delivery of Production Data

Production data shall be free of computer viruses. Any files found to include a virus shall be quarantined by the producing party and noted in a log to be provided to the government. Password protected or encrypted files or media shall be provided with corresponding passwords and specific decryption instructions. No encryption software shall be used without the written consent of the government.

24. Compliance and Adherence to Generally Accepted Technical Standards

Production shall be in conformance with standards and practices established by the National Institute of Standards and Technology (“NIST” at www.nist.gov), U.S. National Archives & Records Administration (“NARA” at www.archives.gov), American Records Management Association (“ARMA International” at www.arma.org), American National Standards Institute (“ANSI” at www.ansi.org), International Organization for Standardization (“ISO” at www.iso.org), and/or other U.S. Government or professional organizations.

25. Read Me Text File

All deliverables shall include a “read me” text file at the root directory containing: total number of records, total number of images/pages or files, mapping of fields to plainly identify field names, types, lengths, and formats. The file shall also indicate the field name to which images will be linked for viewing, date and time format, and confirmation that the number of files in load files matches the number of files produced.

26. Exception Report

An exception report, in .csv format, shall be included, documenting any production anomalies utilizing the electronic Bates number (DOCID or control numbering) assigned during the collection, processing, and production phases.

27. Transmittal Letter to Accompany Deliverables

All deliverables should be accompanied by a transmittal letter including the production date, case name and number, producing party name, and Bates number range produced.

[REDACTED]

BY MS. LAPORTE:

Q. So, Colonel Krueger, I want to fast forward now to the time after President Trump issued his tweets in July of 2017. And I think a few months after that, were you involved in a process that at a high level we can call the "panel of experts"?

A. So I supported the panel of experts. The panel of experts was made up of, from the Army, the Undersecretary or acting Undersecretary, the Vice and the Sergeant Major of the Army. So in the very beginning there were a couple meetings they allowed what we call "back seaters," and I was one of those. But that very quickly stopped.

[REDACTED]
