ray

October 28, 2010

dear donald
as you know ray and i are divorcing, i will be willing to help you in any way possible to stop this monster. he made a lot of negative comments about you during our marriage. i plan on stopping him. contact me if i can help you in any way in your suit against him, believe me he hated your sexual preference

Donald Zarda

October 31, 2010

Hi Joanne, thank you for contacting me about this situation. I regret your involvement with Ray has ended up poorly as has mine. This is a sensitive case I'm sure you understand and as with any pending litigation, there's not much I'm allowed to say to anyone without speaking with my attorney first.

Bucket List
groupon.com

365 Things to do in Kansas City before you die.

I am not at all surprised by your remarks about Ray's behavior towards me. I felt it all along as you might imagine working alongside him daily, but I honestly felt that he could remain grounded enough to keep our relationship business first. Unfortunately, that didn't happen.

If it is possible, my attorney would like to contact you or I can give you his contact information if you prefer.

Thank you for coming forward and I am truly sorry to hear about what you are dealing with as well.

All the best,
Don

Joanne Maynard
dear Don

October 31, 2010

I have a feeling that anything i would say would not be taken seriously due to my law suite with ray. i just wanted you to know that there was negative feelings made by him. Ray tells everything to everybody, so i am sure someone else at the drop zone has heard his remarks. What i am really upset about and think is unfair is that at other times other customers have complained about tandem masters behavior but those people were not fired. also spreading the word to keep you from getting another job is awful, but that is what drop zone owners do. I wish you luck, and I am glad you just did not let this go. Ray thinks he is better than everyone else..... Joanne

Donald Zarda

November 9, 2010

Hi Joanne, I appreciate your concern and communication with me about what is happening. My attorney has asked that I relay you this message:

Dear Joanne,

I am Don's attorney and he has let me know that you contacted

Alex Funk

Tim Heaton

Steve Carrico

Chris-Alexander N...

Brian Yuen

Aja Niemann

...and a useful witness. First, information you provide could lead to the discovery of information from other witnesses that we may not find out about. Second, the fact that you have a dispute with Ray is a factor that would be weighed in considering credibility, but it is only that, a factor. Truth is filtered by experience. Just as you have a dispute with Ray as Don does, employees that Ray's attorney is likely to line up to testify for him (or against Don) may have their own agenda - they want to keep their jobs. Moreover, along that line, it is not the case that people in the workplace are going to line up and tell a story about what Ray said about gay people. They would fear exactly what Don suffered - loss of their job and blackballing within the professional skydiving community for suing a drop zone and alleged inappropriate behavior.

Marko Markovich stop being a vagina and take the cast off now

02 September 2009 at 21:51 · Comment

Christie M Armstrong Good boy. Don't fuck this up. Sure, you could... But, if something goes wrong, it would totally suck to have that ankle fucked up. Not worth the risk. You'd rather wait 14 days and jump regularly than screw it up and not jump again like you used to.

B) Video and assumption of risk agreement:

The student must view the waiver video and sign the waiver. Be careful to abide by all United Parachute Technologies & USPA provisions in the exemption, such as student's age, etc... If the video machine is out-of-order or the tape is lost, it is the same as if the aircraft is inoperative. NO ONE may make a Tandem jump without seeing the waiver video and signing the waiver.

STUDENT HARNESS ADJUSTMENT GUIDE

The Sigma / Vector Student Harness is quite a departure from previous tandem student harnesses. It was designed, with the help of a cardiologist, to safely contain the human body without cutting off normal blood flow. Disrupted blood flow is why almost all students on older student harnesses were uncomfortable, and why many got sick or even passed out.

A hip-hugging horizontal back and belt strap combination allows the main lift webs to be positioned, and held, more toward the front of the upper body than on other designs. This prevents the "squeezing" of the upper body and the inside of the upper legs which can cut off blood flow. It also automatically lifts the legs up and forward after opening, putting them in a safer position for landing.

The Student Harness was designed to comfortably and safely fit a wide range of body sizes. To accomplish this, it has **twelve** points of adjustment. This wide range of adjustment means that it is possible to give a tandem student a truly comfortable experience on their tandem skydive. However, **the harness must still be adjusted securely to fit the student's body to prevent them from falling out in extreme situations and unusual body positions.**

While fitting this harness on a tandem student is not difficult, it is different from other harnesses you may used in the past. The most important point to consider is the security of the student. You must insure that all straps are comfortably snug against the student's body.

Please use the following guide to keep your students safe and comfortable.

HARNESS ADJUSTMENT

Loosen the harness before donning.

Rotate the harness on the student's shoulders so the Top Attachment Snaps will be easy to hook up.

Adjust the chest strap loosely.

Adjust the Belt Strap so the main lift webs are positioned as shown. The Horizontal Back and Belt Straps should be tightened firmly around the hips.

Adjust the Main Lift Webs and Diagonals so the harness's Hip Junctions are resting squarely on the student's hips.

Tighten the Leg Straps.

Slide the Chest Strap vertically into the correct position and tighten.

R25

Installing the handle on the student harness

The secondary drogue release will be attached to the student as you hook them up in the aircraft prior to the jump. Follow these steps for ease of hook-up:

- 1) Attach right lower quick ejector, this allows freedom to move while connecting the drogue release handle. This also ensures that the student can not pull away from you, preventing possible damage to the drogue release assembly.
- 2) Attach handle to student harness as shown in Illustrations #2/4/63-64a.
- 3) Complete the hookup process by attaching the left side quick ejector, and both top snaps and locking pins.

#2/4-63

RIGHT: Domed ends of snaps are just under the handle, on top of main lift webbing. Handle lays on main lift web.

Handle placement for AFF transition

NOTE: When attaching handle to student harness, the housing **MUST** be routed **UNDER** the main lift web of the Tandem Instructor as shown in #2/4-64. If it is routed to the outside of the MLW, the housing could get in the way of drogue deployment.

WRONG: Domed side of snaps are on backside of main lift web. Handle sticks out beyond main lift web.
WARNING: If pulled in this configuration, the whole handle set-up could detach from the main lift web.

Fold up and Attach Snaps

Sdli Skydive LI Thanks Everyone--Unfortunately my pathetic X will not leave us alone, and continues to try to disrupt our lives---like dancing as close as she can get to me at dockers last Tuesday night, well that did not work. Barbara and I could not be happier !! as a matter of FACT this Wednesday 6-29-2001 will be the first --OF MANY ANNIVERSARY'S WE WILL SHARE--THAT IS THE FIRST NIGHT WE MET, AND I HAVE NEVER BEEN HAPPIER.

Doug Garr Ray, Meg and I will celebrate 32 years on Wed.

June 28 at 8:42am

Curt Kellinger why not give your EX some skydiving lessons?? LOL

June 29 at 8:23am

Jon-Eric Lohwasser i agree with curt lol
