2. If You fail to produce a document or provide information requested on the grounds that such document or information is no longer in Your possession, custody, or control, You shall state what disposition was made of that document or information, including, when applicable, the circumstances of any loss or destruction of such document or information.

3. Each document requested should be produced in its entirety without deletion or redactions, except as subject to applicable privileges, regardless of whether You consider the entire document to be responsive to these requests or relevant to the claims.

1 8. Each Request for Production set forth herein is a request for the original (or
2 copy when the original is not available) of the final version of such document(s), as well
3 as non-identical copies by reason of notations or markings.

4 9. More than one Request for Production set forth herein may call for
5 production of the same document. The presence of such duplication is not intended and
6 shall not be interpreted to narrow or limit in any way the scope of each individual Request
7 for Production set forth herein.

8 10. The documents or tangible things produced in response hereto shall be
9 segregated and clearly marked or labeled so as to correspond to the specific production
10 request to which such documents or tangible things are responsive and are being produced.
11 Alternatively, such documents or tangible things shall be produced as they are kept in the
12 usual course of business, including the production of files from which such documents or
13 tangible things are taken.

14 11. Information shall not be withheld merely because such information is stored
15 electronically (e.g., word processing files, electronic mail, databases, accounting
16 information, and spreadsheets).

17 12. In addition to physical documents or objects, each Request for Production set
18 forth herein specifically calls for the production of electronic or magnetic data responsive
19 to the Request, including data that has been deleted.

20 13. Each Request for Production set forth herein calls for the following methods
21 of production:

- 22 a. *Hard Copy Documents.* (i) All black and white hard copy documents will be
23 scanned and produced in electronic form. The hard copy documents shall be
24 converted to a single page TIFF images and produced following the same
25 protocol set forth herein or otherwise agreed to by the parties. (ii) Images of
26 all file labels, file headings, and file folders associated with any hard copy
27 document will be produced with the images of the hard copy documents. (iii)
28

Document breaks for paper documents shall be based on Logical Document Determination (or “LDD”) rather than on physical document breaks. (iv) The database load file shall include the following fields: BEGBATES, ENDBATES, BEGATTACH, ENDATTACH, CUSTODIAN, REDACTED, and CDVOLUME.

- b. *Metadata Fields and Processing.* Each of the metadata and coding fields set forth in Exhibit 3 that can be extracted shall be produced for that document. The parties are not obligated to manually populate any of the fields in Exhibit 3 if such fields cannot be extracted from a document, with the exception of the following: BEGBATES, ENDBATES, BEGATTACH, ENDATTACH, and CUSTODIAN. The parties will make reasonable efforts to ensure that metadata fields automatically extracted from the documents are correct.
- c. *TIFFs.* Single page Group IV TIFFs should be provided, at least 300 dots per inch (dpi). Single page TIFF images should be named according to the unique bates number, followed by the extension “.TIF”. Original document orientation should be maintained (*i.e.*, portrait to portrait and landscape to landscape).
- d. *Text Files.* For each document originating in electronic format, a separate text file containing the full text of each document should be provided with a file with the TIFF images and a file with the document metadata. Text of native files should be extracted directly from the native file. The text file should be named according to the unique bates number, followed by the extension “.TXT.” The parties agree that the full text and/or OCR of any document will not be contained within a database load file, but rather as a standalone file with each text file containing the text for an entire single document.

- e. *Database Load Files.* An ASCII delimited data file (.txt, .dat, or .csv) that can be loaded into commercially acceptable database software (e.g., Concordance). The first line of each text file must contain a header row identifying each data field by name. Each document within the database load file must contain the same number of fields as identified in the header row.
- f. *Cross-Reference Image File Registration.* An image load file that can be loaded into commercially acceptable production software (e.g., Opticon, iPro). Each TIFF in a production must be referenced in the corresponding image load file. An exemplar load file format is below.
- ABC0000001,PROD001,\\IMAGES\001\ABC0000001.tif,Y,,,2
 ABC0000002,PROD001,\\IMAGES\001\ABC0000002.tif,,,,
 ABC0000003,PROD001,\\IMAGES\001\ABC0000003.tif,Y,,,1
- g. *Bates Numbering.* All images must be assigned a unique and sequential Bates Number. Each party agrees to use the same Bates Numbering format through its entire production unless a new Bates format is necessary, at which point the party using the new Bates Numbering format will inform the other party of the change.
- h. *Protective Order Designations.* Any document(s) determined by the producing party to fall within the scope of a protective order shall have the appropriate level of designated language (i.e., CONFIDENTIAL, ATTORNEYS' EYES ONLY, OUTSIDE COUNSEL RESTRICTED, etc.) afforded by the protective order endorsed on each TIFF image of said document(s).
- i. *Native File Productions.* The parties agree that when producing a native file, they will include a TIFF image as a placeholder for the file to represent the file in the production set. The TIFF image placeholder for a native file should be branded with a unique Bates number and state "See Native Document" on

the TIFF image. The native file should then be renamed to match the Bates number assigned to the document with its original file extension. The filename field produced in the production load file that reflects the original metadata should maintain the original file name. If a native file falls within the scope of a protective order (*see* paragraph (h), above), then the appropriate designation is to be included in the filename along with the assigned Bates number (*i.e.*, ABC000001_CONFIDENTIAL.xls).

j. *Microsoft Office files, WordPerfect, and other standard documents (e.g., Google Docs and PDF documents).* MS Office files, WordPerfect, other standard documents, such as PDF documents, will be converted to single-page TIFF images and produced consistent with the specifications herein. If the document contains comments or tracked changes, then the TIFF images shall be generated to include the comments or track changes contained in the file.

k. *Email and attachments.* E-mail and attachments should be converted to single-page TIFF images and produced consistent with the specifications provided herein. Attachments shall be processed as separate documents, and the text database load file shall include a field in which the producing party shall identify the production range of all attachments of each e-mail.

l. *Microsoft PowerPoint and other Presentation Files.* The parties shall process presentations (*e.g.*, MS PowerPoint, Google Presently) to include hidden slides and speaker's notes by imaging in a way that both the slide and the speaker's notes display on the TIFF image.

m. *Spreadsheets.* The parties shall produce spreadsheets (*e.g.*, MS Excel, Google Trix) in native format where available. *See paragraph (i) above.* If a spreadsheet requires redaction, the parties will use native file redaction applications (*e.g.*, Blackout).

- 1 n. *Good Cause for Additional Native Files.* If good cause exists to request
2 production of specified files in native format, then the party may request such
3 production and provide an explanation of the need for native file review.
- 4 o. *Other Documents or Data.* If production of certain structured or other
5 electronic data that is not easily converted to static TIFF images, such as
6 databases, CAD drawings, GIS data, videos, audio files, websites, social
7 media, then the parties will meet and confer to discuss an appropriate form
8 of production.
- 9 p. *Social media and other web-based content.* The production of social media
10 or other web-based content should be converted to single-page TIFF images
11 and produced consistent with the specifications provided herein. If the social
12 media and/or web-based content cannot be produced in single-page TIFF
13 images, then the parties shall meet and confer to discuss a form of production.
14 Further, the parties will also confer regarding the specific web location of the
15 social media or other web-based content and agree upon the available
16 metadata that can be produced therewith.
- 17 q. *Color Documents.* Parties will produce documents in black and white, unless
18 to do so would alter or obscure the substance of the document. A party may
19 request that a reasonable number of documents be produced in a color format
20 upon review of the other party's production.in single page JPEG format.
- 21 r. *Redactions.* In the event that a document requires redaction, the parties agree
22 the native file, if applicable, will be excluded from the production. In
23 addition, any redacted text will be omitted from the full text and/or OCR, and
24 any corresponding metadata fields from the production. The TIFF image will
25 readily identify the redactions.
- 26 s. *Production Media.* Documents and electronically stored information ("ESI")
27 shall be produced on optical media (CD or DVD), external hard drives, or
28

1 via an FTP site, or similar, readily accessible electronic media.

- 2 t. *Encryption.* Industry-standard encryption tools and practices must be used
3 when transferring data between parties. Passwords must be at least 8
4 characters with a mix of character sets and sent in a separate communication
5 from the encrypted data.

6 Among other places, You shall search for electronic documents stored on all servers,
7 networks, hard drives, desktop computers, notebook computers, personal digital devices,
8 all back-up storage media or devices, and with any third-party cloud providers. Each
9 responsive Document shall be produced in its entirety. In producing documents, if an
10 identical copy appears in more than one Person's files, You shall either (1) produce each
11 copy or (2) provide the names of each Custodian in the "Custodian" field.

12 14. Documents not otherwise responsive to these requests shall be produced if
13 such documents concern the documents that are responsive to the requests or if such
14 documents are attached to documents called for by these requests and constitute routing
15 slips, transmittal memoranda, letters, emails, comments, evaluations, or similar materials.

16 15. Your response to these Requests for Production should not be delayed if they
17 cannot be fully complied with by the date set for the presentation of documents for any
18 reason, including, but not limited to, the assertion of any privilege, interposition of any
19 objection, ongoing investigation, or current unavailability of documents. All available
20 documents should be produced on the date set for presentation, and any unavailable
21 documents should be produced as soon as they become available.

22 16. These Requests for Production are deemed to be continuing in nature so as
23 to require that You supplement Your response if You obtain or discover additional
24 information or documents between the time of the initial response and the time of hearing
25 or trial herein. This paragraph shall not be construed to alter any obligation to comply with
26 all other instructions in these Requests for Production.

1 17. Plaintiff hereby expressly reserves the right to supplement these Requests for
2 Production and to propound new requests, to the extent permitted by applicable law and
3 rules.

4 18. In construing any request, instruction or definition, the singular form of a
5 word shall include the plural and the plural form of a word shall include the singular.

6 19. The connectives “and” and “or” shall be construed disjunctively or
7 conjunctively as necessary to bring within the scope of the request all documents that might
8 otherwise be construed to be outside of its scope.

9 20. The terms “all” and “each” shall be construed as all and each, as necessary

Federal Rule of Civil Procedure 45 (c), (d), (e), and (g) (Effective 12/1/13)**(c) Place of Compliance.**

(1) For a Trial, Hearing, or Deposition. A subpoena may command a person to attend a trial, hearing, or deposition only as follows:

- (A) within 100 miles of where the person resides, is employed, or regularly transacts business in person; or
- (B) within the state where the person resides, is employed, or regularly transacts business in person, if the person
 - (i) is a party or a party's officer; or
 - (ii) is commanded to attend a trial and would not incur substantial expense.

(2) For Other Discovery. A subpoena may command:

- (A) production of documents, electronically stored information, or tangible things at a place within 100 miles of where the person resides, is employed, or regularly transacts business in person; and
- (B) inspection of premises at the premises to be inspected.

(d) Protecting a Person Subject to a Subpoena; Enforcement.

(1) Avoiding Undue Burden or Expense; Sanctions. A party or attorney responsible for issuing and serving a subpoena must take reasonable steps to avoid imposing undue burden or expense on a person subject to the subpoena. The court for the district where compliance is required must enforce this duty and impose an appropriate sanction—which may include lost earnings and reasonable attorney's fees—on a party or attorney who fails to comply.

(2) Command to Produce Materials or Permit Inspection.

(A) *Appearance Not Required.* A person commanded to produce documents, electronically stored information, or tangible things, or to permit the inspection of premises, need not appear in person at the place of production or inspection unless also commanded to appear for a deposition, hearing, or trial.

(B) *Objections.* A person commanded to produce documents or tangible things or to permit inspection may serve on the party or attorney designated in the subpoena a written objection to inspecting, copying, testing, or sampling any or all of the materials or to inspecting the premises—or to producing electronically stored information in the form or forms requested. The objection must be served before the earlier of the time specified for compliance or 14 days after the subpoena is served. If an objection is made, the following rules apply:

- (i) At any time, on notice to the commanded person, the serving party may move the court for the district where compliance is required for an order compelling production or inspection.
- (ii) These acts may be required only as directed in the order, and the order must protect a person who is neither a party nor a party's officer from significant expense resulting from compliance.

(3) Quashing or Modifying a Subpoena.

(A) *When Required.* On timely motion, the court for the district where compliance is required must quash or modify a subpoena that:

- (i) fails to allow a reasonable time to comply;
- (ii) requires a person to comply beyond the geographical limits specified in Rule 45(c);
- (iii) requires disclosure of privileged or other protected matter, if no exception or waiver applies; or
- (iv) subjects a person to undue burden.

(B) *When Permitted.* To protect a person subject to or affected by a subpoena, the court for the district where compliance is required may, on motion, quash or modify the subpoena if it requires:

- (i) disclosing a trade secret or other confidential research, development, or commercial information; or

(ii) disclosing an unretained expert's opinion or information that does not describe specific occurrences in dispute and results from the expert's study that was not requested by a party.

(C) *Specifying Conditions as an Alternative.* In the circumstances described in Rule 45(d)(3)(B), the court may, instead of quashing or modifying a subpoena, order appearance or production under specified conditions if the serving party:

- (i) shows a substantial need for the testimony or material that cannot be otherwise met without undue hardship; and
- (ii) ensures that the subpoenaed person will be reasonably compensated.

(e) Duties in Responding to a Subpoena.

(1) Producing Documents or Electronically Stored Information. These procedures apply to producing documents or electronically stored information:

(A) *Documents.* A person responding to a subpoena to produce documents must produce them as they are kept in the ordinary course of business or must organize and label them to correspond to the categories in the demand.

(B) *Form for Producing Electronically Stored Information Not Specified.* If a subpoena does not specify a form for producing electronically stored information, the person responding must produce it in a form or forms in which it is ordinarily maintained or in a reasonably usable form or forms.

(C) *Electronically Stored Information Produced in Only One Form.* The person responding need not produce the same electronically stored information in more than one form.

(D) *Inaccessible Electronically Stored Information.* The person responding need not provide discovery of electronically stored information from sources that the person identifies as not reasonably accessible because of undue burden or cost. On motion to compel discovery or for a protective order, the person responding must show that the information is not reasonably accessible because of undue burden or cost. If that showing is made, the court may nonetheless order discovery from such sources if the requesting party shows good cause, considering the limitations of Rule 26(b)(2)(C). The court may specify conditions for the discovery.

(2) Claiming Privilege or Protection.

(A) *Information Withheld.* A person withholding subpoenaed information under a claim that it is privileged or subject to protection as trial-preparation material must:

- (i) expressly make the claim; and
- (ii) describe the nature of the withheld documents, communications, or tangible things in a manner that, without revealing information itself privileged or protected, will enable the parties to assess the claim.

(B) *Information Produced.* If information produced in response to a subpoena is subject to a claim of privilege or of protection as trial-preparation material, the person making the claim may notify any party that received the information of the claim and the basis for it. After being notified, a party must promptly return, sequester, or destroy the specified information and any copies it has; must not use or disclose the information until the claim is resolved; must take reasonable steps to retrieve the information if the party disclosed it before being notified; and may promptly present the information under seal to the court for the district where compliance is required for a determination of the claim. The person who produced the information must preserve the information until the claim is resolved.

(g) Contempt.

The court for the district where compliance is required—and also, after a motion is transferred, the issuing court—may hold in contempt a person who, having been served, fails without adequate excuse to obey the subpoena or an order related to it.
