## INTERESTS OF AMICI CURIAE

Amici States California, Colorado, Connecticut, Delaware, Hawai‘i, Illinois, Maine, Maryland, Massachusetts, Michigan, Minnesota, Nevada, New Jersey, New Mexico, New York, North Carolina, Oregon, Rhode Island, Vermont, Washington, and the District of Columbia strongly support the right of transgender people to live with dignity, be free from discrimination, and have equal access to healthcare.<sup>1</sup> Discrimination and exclusion on the basis of transgender status cause tangible economic, emotional, and health harms such as increased risk of suicide and substance abuse. To prevent these injuries, many of the amici States have adopted laws and policies aimed at combatting discrimination against transgender people who seek to access healthcare—including policies that guarantee non-discriminatory coverage of gender-affirming medical care for transgender minors. These policies rely on evidence-based standards of care and are crafted to ensure that the amici States do not impinge on decisions made between physicians and their patients. The amici States’ experience demonstrates that our laws and policies not only improve health outcomes for our transgender residents, they do so at little cost to the public fisc. More generally, amici States have a profound interest in the proper application of the Equal Protection Clause to protect all Americans against

---

<sup>1</sup> Amici States submit this amicus brief pursuant to the Federal Rule of Appellate Procedure 29(a) and Eighth Circuit Rule of Practice 29(a) in support of Plaintiffs-Appellees.

unconstitutional discrimination in any form and to especially remedy the stigma and discrimination that transgender Americans have experienced for many years.

Amici States have a strong interest in advocating for the well-being of their residents, including teenage residents receiving gender-affirming medical care who often travel to, attend schools in, or work in Arkansas. Without this necessary healthcare access, our residents risk forgoing needed care when visiting Arkansas or must return home to obtain such care. Both alternatives cause detrimental impacts to our residents and our state programs. Families visiting Arkansas deserve to have confidence that teens receiving gender-affirming medical care can continue to do so if, for example, they are hospitalized for an injury or need a prescription refilled. Finally, a reduction in services in one State often causes people to seek services in other States.

## **ARGUMENT**

Arkansas Act 626 is an aberration that harms, not protects, transgender minors.<sup>2</sup> Arkansas' total ban on gender-affirming healthcare for transgender youth not only ignores broad medical consensus from established medical groups and organizations, it also oversteps by interfering in medical decisions that providers reach with their individual patients and their families. The experience of amici

---

<sup>2</sup> Arkansas Act 626 of 2021, <https://www.arkleg.state.ar.us/Acts/FTPDocument?path=%2FACTS%2F2021R%2FPublic%2F&file=626.pdf&ddBienniumSession=2021%2F2021R>.

States demonstrates that ensuring equal access to healthcare helps us all without disrupting doctor-patient decisions and without imposing significant costs to amici.

The amici States therefore urge this Court to affirm the preliminary injunction.

## **I. DISCRIMINATION AGAINST TRANSGENDER PEOPLE SIGNIFICANTLY HARMS AMICI STATES AND THEIR RESIDENTS**

Transgender people face significant barriers to receiving both routine and transition-related care, including lack of adequate insurance coverage, provider ignorance about the health needs of transgender people, and outright denial of services.<sup>3</sup> Denial of access to medically necessary care has serious consequences for transgender residents and public health generally. Transgender people with gender dysphoria<sup>4</sup> often suffer from severe distress due to the stigma associated with their gender identity.<sup>5</sup> Among transgender people, there are higher rates of

<sup>19</sup> *See* Morning Consult & The Trevor Project, *How COVID-19 is Impacting LGBTQ Youth*, *supra* note 3, at 20.

them.” Alabama Amicus at 29. Amici States’ laws protect their transgender minors by increasing their access to healthcare, not by denying it. To prevent the tangible economic, emotional, and health consequences of excluding individuals from needed healthcare, many of the amici States have worked to ensure that their residents, including transgender adolescents, have access to gender-affirming healthcare and to allow doctors to practice medicine in adherence both to well-accepted medical standards and to our anti-discrimination laws. These laws also protect state residents without harm to the public fisc.

**A. Amici States Have Longstanding Anti-Discrimination Laws Guaranteeing Access to Gender-Affirming Medical Care**

Several amici States explicitly prohibit insurers from excluding transition-related care from their insurance policies. These protections increase access to healthcare for our residents by barring discriminatory health insurance coverage that contravenes both best medical practice and legal standards prohibiting discrimination on the basis of gender identity.<sup>20</sup> Of particular concern are barriers

---

<sup>20</sup> As in *Bostock v. Clayton County*, 140 S. Ct. 1731, 1741–42 (2020), it is unnecessary for this Court to even define “sex” or “gender” in order to conclude that the Arkansas statute discriminates on the basis of sex, gender, and transgender status. *Accord United States v. Virginia*, 518 U.S. 515, 532–33 (1996) (state laws that discriminate on the basis of “sex” and “gender” are subject to heightened scrutiny); *Grimm v. Gloucester Cnty. Sch. Bd.*, 972 F.3d 586, 608 (4th Cir. 2020) (applying heightened scrutiny where the challenged policy “cannot be stated without referencing sex.”).

to healthcare erected against transgender patients for care that is otherwise accessible to others.

In California, for instance, longstanding laws and regulations ensure that transgender patients are not denied or limited coverage for care that is ordinarily available. California’s Medicaid program (“Medi-Cal”) has prohibited transition-related exclusions from its coverage since 2001.<sup>21</sup> In 2012, the California Insurance Commissioner adopted regulations prohibiting private insurers from denying coverage for “services related to gender transition . . . including but not limited to hormone therapy” if the same services are available when unrelated to gender transition and also from requiring a premium based on the insured’s identity as a transgender person.<sup>22</sup> These rules apply regardless of the beneficiary’s age.

---

<sup>21</sup> See Cal. Dep’t of Health Care Servs., All-Plan Letter 16-013, Ensuring Access to Medi-Cal Services for Transgender Beneficiaries (Oct. 6, 2016), <http://www.dhcs.ca.gov/formsandpubs/Documents/MMCDAPLsandPolicyLetters/APL2016/APL16-013.pdf> (reminding Medi-Cal managed care health plans that they must provide covered services to all Medi-Cal beneficiaries, including transgender beneficiaries, and including surgery, pursuant to Cal. Health & Safety Code §1365.5); see also *J.D. v. Lackner*, 80 Cal. App. 3d 90, 95 (1978) (recognizing that “sex reassignment surgery” may be medically necessary and ordering Medi-Cal to grant the treatment); *id.* (“We do not believe, by the wildest stretch of the imagination, that such surgery can reasonably and logically be characterized as cosmetic.”).

<sup>22</sup> Cal. Code Regs. tit. 10 § 2561.2, subd. (a), <http://www.insurance.ca.gov/01-consumers/110-health/60-resources/upload/CDI-Gender-Nondiscrimination-Regulations.pdf>.

Other amici States are equally committed to ensuring transgender people are treated with dignity and respect when accessing healthcare, and that they are not denied the care they need. For example, on November 30, 2015, the Minnesota Departments of Commerce and Health confirmed that health plans subject to their jurisdiction may not exclude coverage for treatment for gender dysphoria when medically necessary.<sup>23</sup> Many of amici States’ laws, regulations, and healthcare bulletins likewise prohibit insurers from discrimination in the provision of healthcare.<sup>24</sup> Taken together, these protections reflect our core commitment to

Rev. Code § 48.43.0128(3) (for health plans issued on or after January 1, 2022, Washington forbids insurers from “deny[ing] or limit[ing] coverage for gender-affirming treatment” when it is medically necessary and “prescribed in accordance with accepted standards of care” and from “apply[ing] categorical cosmetic or blanket exclusions to gender-affirming treatment”).

<sup>33</sup> McPherson, Bulletin 13-IB-01-30/15, *supra* note 32, at 4.

with accepted standards of care.”<sup>34</sup> And in California, the State encourages health insurance companies to evaluate coverage criteria for gender-affirming care in order “to avoid needlessly delaying and interfering with medical care recommended by a patient’s doctor.”<sup>35</sup>

**C. Ensuring Access to Gender-Affirming Medical Care Has Improved Health Outcomes for Transgender People, Including Minors**

Amici seek to protect the decisions made between teenagers, their families, and their doctors based on widely-accepted medical practices. Amici States’ policies not only ensure that residents have access to these best practices, they have also improved health outcomes for transgender people—including transgender minors—at minimal cost to States.

Since 2012, at least 24 States and the District of Columbia have prohibited health insurance discrimination against transgender people.<sup>36</sup> These laws are motivated by the goal of promoting good medical practices and increasing equity in access to healthcare.

California, for example, covers gender-affirming healthcare for the well-being of its transgender residents. But it does so with little effect on the public fisc.

---

<sup>34</sup> Wash. Rev. Code § 48.43.0128(3).

<sup>35</sup> Press Release, Cal. Dep’t of Ins., *supra* note 27.

<sup>40</sup> *Id.* (citing Haas study).

costs associated with suicide, but prevent significant numbers of transgender insureds from losing their lives.”<sup>41</sup>

Similarly, in 2013, the Commonwealth of Massachusetts Group Insurance Commission found that the benefits of gender-affirming medical treatment outweigh the costs, noting that “these additional expenses hold good value for reducing the risk of negative endpoints—HIV, depression, suicidality, and drug abuse.”<sup>42</sup> While this study did not include adolescents, it acknowledged findings that “young adults experience alleviation of gender dysphoria and improvement in psychological functioning following gender reassignment.”<sup>43</sup>

Studies have overwhelmingly shown that mental health for transgender minors drastically improves when they have access to early treatment. A 2021 survey of nearly 12,000 transgender and nonbinary youth found that, for youth under the age of 18, use of gender-affirming hormone therapy was associated with 39 percent lower odds of recent depression and 38 percent lower odds of attempting suicide in the past year compared to youth who wanted, but did not

receive, such therapy.<sup>44</sup> In short, removing discriminatory barriers to healthcare improves health outcomes for transgender residents, especially minors, and does so at little cost to States.

### **III. ARKANSAS’ LAW INSTITUTES AN UNCONSTITUTIONAL BAN THAT DISCRIMINATES BASED ON SEX AND IGNORES MEDICAL CONSENSUS AS WELL AS DECISIONS MADE BETWEEN DOCTORS AND THEIR PATIENTS**

Arkansas’ law is an aberration that violates the Equal Protection Clause. It is the only state law that constitutes a total ban on medical treatment “related to gender transition.”<sup>45</sup> This ban oversteps into medical decisions made between doctors and patients, in the face of overwhelming medical consensus that the banned care is medically necessary for some individuals with gender dysphoria. The ban likewise singles out adolescents for discrimination based on their transgender status.<sup>46</sup> Under heightened as well as rational basis standards of

---

<sup>44</sup> Amy E. Green et al., *Association of Gender-Affirming Hormone Therapy With Depression, Thoughts of Suicide, and Attempted Suicide Among Transgender and Nonbinary Youth*, XXX J. of Adolescent Health 1, 1 (2021), [https://www.jahonline.org/article/S1054-139X\(21\)00568-1/fulltext](https://www.jahonline.org/article/S1054-139X(21)00568-1/fulltext); see also Jack L. Turban et al., *Access To Gender-Affirming Hormones During Adolescence and Mental Health Outcomes Among Transgender Adults* 17(1) PLOS One 1, 8 (2022), <https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0261039> (“After adjusting for demographic and potential confounding variables, access to [gender-affirming hormones] during adolescence (ages 14–17) was associated with lower odds of past-month severe psychological distress [...], past-year suicidal ideation [...], past month binge drinking [...], and lifetime illicit drug use [...] when compared to access to [gender-affirming hormones] during adulthood.”).

<sup>45</sup> See generally *Healthcare Law and Policies*, *supra* note 36.

<sup>46</sup> See generally JA 911–55 (Turban Decl.).

review, this law is unconstitutional. Rather than protecting youth, the Arkansas law targets a vulnerable population and fails to achieve its stated purpose. Arkansas has failed to demonstrate that its law is substantially related to advancing the health and wellbeing of transgender youth, as required under intermediate scrutiny. Arkansas has similarly failed to satisfy the rational basis standard because its law actually undermines its stated interest in the health and wellbeing of minors.

Alabama’s brief argues that Arkansas’s law is justified because its alleged purpose is to protect children from purported negative health outcomes that result from gender-affirming care, stating that a state’s power “is likely at its zenith when it acts to protect children.” Alabama Amicus at 25 (citing *Bellotti v. Baird*, 443 U.S. 622, 634 (1979)). But even *Bellotti* acknowledges that “[t]he child is not the mere creature of the state.” *Bellotti*, 443 U.S. at 637; *contra* Alabama Amicus at 28–29 (“[I]t was the responsibility of the Arkansas legislature to determine the best way to help children suffering from gender dysphoria . . . .”). States, of course, have authority to regulate the medical profession.<sup>47</sup> Yet, it is an aberration for a

---

<sup>47</sup> In support of the Arkansas law, several of Defendants’ amici share anecdotal experiences of providers administering gender-affirming care to their or their children’s alleged detriment. *See, e.g.*, Amicus Briefs of Yaacov Sheinfeld et al. and Keira Bell et al. As Plaintiffs-Appellees explain, the rushed provision of care without evaluation would be inconsistent with prevailing protocols. Plaintiffs-Appellees’ Br. at 44. Instead of banning a medical practice based on well-established medical consensus because of the actions of providers who act beyond protocol—which would be an overreach—amici States rely on their regulators and

State to totally ban a medical practice for specific treatment contexts (e.g., banning transgender minors from accessing gender-affirming medical care) where the treatments are known to be effective and where the same treatments have otherwise been broadly permitted (e.g., cisgender minors remain able to access treatments such as breast reduction for a teenage cisgender girl to alleviate back pain or for a teen cisgender boy to get treatment for gynecomastia).<sup>48</sup>

Evidence in the record—and Amici States’ own experience—overwhelmingly show that transgender youth who are affirmed in their identities and have access to gender-affirming healthcare experience improved health

---

licensing boards to address inappropriate conduct by their providers in order to prevent harm to their residents. Indeed, Alabama references the opioid crisis, which resulted in States adopting legislation to curb the amount of opioids that physicians could prescribe in order to address a well-documented public health crisis, but not completely ban their distribution. *See* Alabama Amicus at 24 (citing Nat’l Conf. of State Legislatures, Prescribing Policies: States Confront Opioid Overdose Epidemic (June 30, 2019), <https://www.ncsl.org/research/health/prescribing-policies-states-confront-opioid-overdose-epidemic.aspx> (“State lawmakers are crafting innovative policies . . . to address this public health crisis while also ensuring appropriate access to pain management.”)).

<sup>48</sup> *See, e.g., Breast Reduction Surgery*, Mayo Clinic, <https://www.mayoclinic.org/tests-procedures/breast-reduction-surgery/about/pac-20385246> (last visited Jan. 11, 2022) (discussing breast reduction surgery for teenagers); *Enlarged Breasts in Men (Gynecomastia)*, Mayo Clinic, <https://www.mayoclinic.org/diseases-conditions/gynecomastia/symptoms-causes/syc-20351793> (last visited Jan. 11, 2022) (discussing gynecomastia in men and boys).

outcomes.<sup>49</sup> Indeed, research demonstrates that transgender youth who are supported and affirmed in their gender and have access to medical care report better mental health outcomes.<sup>50</sup> Alabama amici’s arguments to the contrary largely mischaracterize the scientific literature and the record below.<sup>51</sup>

---

<sup>49</sup> See, e.g., JA 915–17 (Turban Decl. ¶ 13 (discussing eight studies of gender-affirming pubertal suppression linked to favorable mental health outcomes)); JA 917–19 (Turban Decl. ¶ 14 (discussing six studies of gender-affirming hormone replacement therapy linked to favorable mental health outcomes)); see also Padula et al., *supra* note 42, at 400; Zaker-Shahrak, *supra* note 7, at 10–11.

<sup>50</sup> See Dominic J. Gibson et al., *Evaluation of Anxiety and Depression in a Community Sample of Transgender Youth*, 4(4) J. Am. Med. Ass’n Open 1, 1–2 (2021), <https://jamanetwork.com/journals/jamanetworkopen/fullarticle/2778206> (finding “no significant group differences in self-reported depressive symptoms, self-reported anxiety symptoms, or parent reported depressive symptoms” among “socially transitioned transgender youth, their siblings, and age- and gender-matched control participants” ages eight to fourteen); Lily Durwood et al., *Social Support and Internalizing Psychopathology in Transgender Youth*, 50 J. of Youth and Adolescence 841 (2021), <https://link.springer.com/article/10.1007%2Fs10964-020-01391-y> (“Parents who reported higher levels of family, peer, and school support for their child’s gender identity also reported fewer internalizing symptoms.”); Kristina R Olson et al., *Mental Health of Transgender Children Who Are Supported in Their Identities*, 137(3) Pediatrics 1, 1 (2016), <https://pubmed.ncbi.nlm.nih.gov/26921285> (“Socially transitioned transgender children who are supported in their gender identity have developmentally normative levels of depression and only minimal elevations in anxiety, suggesting that psychopathology is not inevitable within this group.”).

<sup>51</sup> Compare Alabama Amicus at 10–15 (citing to United Kingdom, Sweden, and Finland studies) with JA 951–55 (Turban Decl. ¶¶ 53–58 (highlighting inaccuracies and deficiencies in same studies, including lack of peer review)); see, e.g., JA 920 (Turban Decl. ¶ 17 (refuting Defendants’ criticisms of de Vries et al. study)); JA 921–24 (Turban Decl. ¶ 19 (addressing Defendants’ experts’ assertions regarding health risks of gender-affirming care)); JA 926–27 (Turban Decl. ¶ 24

Finally, Alabama asserts that gender-affirming medical interventions are inappropriate because some pre-pubertal children’s identity as transgender “does not inevitably continue into adulthood.” Alabama Amicus at 16 (quoting WPATH standards). This argument takes studies of children and misapplies them to teenagers.<sup>52</sup> No medical treatment is provided to transgender youth until they have reached a specific stage of puberty.<sup>53</sup> Adolescents—i.e., minors who have begun puberty<sup>54</sup>—with persistent gender dysphoria after reaching this stage almost always persist in their gender identity in the long-term whether or not they were

---

(addressing Defendants’ experts’ assertions regarding gender-affirming care and social transition)); JA 927–31 (Turban Decl. ¶¶ 25–30 (addressing Defendants’ experts’ assertions regarding “detransition”)); JA 934–37 (Turban Decl. ¶¶ 34–37 (addressing Defendants’ experts’ assertions regarding gender-affirming surgery)); JA 937–40 (Turban Decl. ¶¶ 38–39 (addressing Defendants’ experts’ assertions regarding informed consent)); JA 941–46 (Turban Decl. ¶¶ 41–45 (addressing Defendants’ experts’ assertion regarding “sex ratios” and “social contagion”)); JA 946–47 (Turban Decl. ¶¶ 46–47 (explaining medical and ethical deficiencies with attempts to change adolescents’ gender identities through talk therapy)); JA 949–51 (Turban Decl. ¶¶ 49–52 (explaining that Defendants’ experts’ criticisms of diagnosing gender dysphoria based on patient-reported symptoms are “true of nearly all psychiatric conditions”)).

<sup>52</sup> JA 924–25 (Turban Decl. ¶¶ 21–22).

<sup>53</sup> JA 105 (Adkins Decl. ¶ 47 (treatment for gender dysphoria begins at Tanner Stage 2 of puberty)); *see generally*, Mickey Emmanuel & Brooke R. Bokor, Nat’l Ctr. for Biotechnology Info., Tanner Stages (Dec. 18, 2020) <https://www.ncbi.nlm.nih.gov/books/NBK470280/> (defining Tanner Stages).

<sup>54</sup> JA 924 (Turban Decl. ¶ 21).

provided gender-affirming medical care.<sup>55</sup> This is supported by Alabama amici’s own evidence, including the fact that most adolescents prescribed puberty-delaying medication go on to initiate hormone replacement therapy. Alabama Amicus at 18 (“[T]he persistence of gender dysphoria into adulthood appears to be much higher for adolescents.”).

Amici States have taken seriously their obligation to protect transgender adolescents by respecting the decisions reached between these patients, their doctors, and their parents. The Arkansas law is unconstitutional, and puts the well-being and lives of transgender minors at risk.

### CONCLUSION

The district court’s order granting a preliminary injunction should be affirmed.

RE: 21-2875 Dylan Brandt, et al v. Leslie Rutledge, et al

Dear Counsel:

The amicus curiae brief of the State of California and 20 Other States has been filed. If you have not already done so, please complete and file an Appearance form. You can access the Appearance Form at [www.ca8.uscourts.gov/all-forms](http://www.ca8.uscourts.gov/all-forms).

Please note that Federal Rule of Appellate Procedure 29(g) provides that an amicus may only present oral argument by leave of court. If you wish to present oral argument, you need to submit a motion. Please note that if permission to present oral argument is granted, the court's usual practice is that the time granted to the amicus will be deducted from the time allotted to the party the amicus supports. You may wish to discuss this with the other attorneys before you submit your motion.

Michael E. Gans  
Clerk of Court
