VIDEOCONFERENCE DEPOSITION OF JOAN BARRETT, FSA, MAAA

Tolland, Connecticut
June 24, 2021
12:00 p.m. EDT

REPORTED BY:
JENNIFER HANSSEN, RPR
Certified Reporter
Certificate No. 50165

PREPARED FOR:
ASCII/CONDENSED

(Certified Copy)

1 Q. Okay. So did UnitedHealthcare prior to June of
2 2015 cover transgender healthcare benefits for its fully
3 insured clients?

4 A. Not across the board. They may have had a few
5 state mandates or riders, but they did not cover it
6 across the board.

7 Q. Did you advise UnitedHealthcare in your
8 employment there during the course of your employment
9 there that it should cover transgender healthcare
10 benefits for its fully insured clients?

11 A. No.

12 Q. During the course of your employment at
13 UnitedHealthcare, did you advise UnitedHealthcare that
14 covering transgender healthcare benefits for its fully
15 insured clients would result in immaterial cost
16 increases?

17 A. No.

18 Q. Do you know why UnitedHealthcare did not cover
19 transgender healthcare benefits during the course of
20 your employment there for its fully insured clients?

21 A. No, I don't know.

22 Q. In your opinion, was it unreasonable that
23 UnitedHealthcare did not cover transgender healthcare
24 benefits for its fully insured clients during the course
25 of your employment?

1 Q. Yes.

2 A. Okay. Yes, that's my understanding.

3 Q. If the State of Arizona removed that exclusion,
4 is it likely that the State of Arizona would realize an
5 increase in cost to the health plan?

6 A. Yes.

7 MS. COHAN: I'm going to mark now an
8 amended version of the Exhibit E to your report and that
9 will be Exhibit 3.

10 (Exhibit No. 3 was marked.)

11 Q. BY MS. COHAN: Can you see that document?

12 A. Yes.

13 Q. Can you explain to me what this Exhibit E
14 reflects?

15 A. It is references to documents that I relied on
16 in doing my report.

17 Q. How did you rely upon the report that you
18 authored from Boyden versus the State of Wisconsin?

19 A. To me, that was the anchor point of the
20 analysis. The methods used in the Williams report that
21 I reviewed was as good as I thought we could get at that
22 period of time in terms of an estimate so, to me, that
23 was the best source of data, the best source of truth
24 for the cost of the estimate.

25 Q. And if I understood you correctly earlier, your

1 MR. GARBACZ: That's all the questions I
2 have.

3 MS. COHAN: Okay.

4 MR. GARBACZ: Joan will want to take a
5 look at the transcript and make sure so I don't -- is
6 that -- how is that going to work this time? Are we
7 going to have that send around?

8 MS. COHAN: Are you requesting to read and
9 sign?

10 MR. GARBACZ: Yes.

11 MS. COHAN: Okay. Then we can have you
12 read and sign. That's fine.

13 MR. GARBACZ: By read and sign, I mean
14 Miss Barrett, yes.

15 MS. COHAN: Thank you very much, everyone.

Marie Frances Isaacson - 03/26/2021

26

1 Q. And what did you say in response to those
2 conversations?

3 A. Currently not covered by our plan.

4 Q. Did you tell them ADOA was exploring the
5 possibility of covering surgery for gender dysphoria?

6 A. I said we were researching it.

7 Q. And did you research it?

8 A. Yes.

9 Q. And I think the research took place around this
10 time, starting in September of 2015 and went through -- at
11 least through November of 2015. We can look at the
12 documents, and will, as time allows.

13 What did the research tell you about
14 coverage for gender dysphoria surgery?

15 A. I think the majority of our plans said that it
16 was not covered and, you know, confirmation that some
17 states did cover it.

18 Q. So were you looking to see whether other states
19 covered it to determine whether the ADOA should cover it?

20 A. I was researching what -- what existed as far as
21 in the benefits world, reached out to Mercer, reached out
22 to all of our health plans, trying to gather as much
23 information as possible about it to help inform a
24 decision.

25 Q. Well, one of the things that the ADOA health plan

Marie Frances Isaacson - 03/26/2021

29

1 Q. Could you tell us what they are?

2 A. Aetna, Cigna, Blue Cross Blue Shield of Arizona,
3 and UnitedHealthcare.

4 Q. Did any of those companies offer surgery --
5 surgery for gender dysphoria, on any of their commercial
6 plans or any plans at all?

7 A. You know, I know we received the emails, but I
8 don't remember what the response was.

9 Q. You don't remember whether you could have asked
10 Aetna, for example, whether they covered gender dysphoria
11 surgery and what answer they gave you?

12 A. I remember asking the question of all four plans.
13 I don't remember which -- what plan responded with what
14 answer.

15 Q. Okay. But you do remember that some of the plans
16 told you, yes, and we do cover gender dysphoria surgery?

17 A. My biggest recollection is that it was not
18 covered, the majority of the response was it was not
19 covered.

20 Q. Majority. So that -- Was there a minority that
21 did cover it?

22 A. I think so. I --

23 Q. Okay. Well, we can -- we can look at exhibits to
24 ferret that out.

25 Do you recall any states offering surgery

Marie Frances Isaacson - 03/26/2021

30

1 for gender -- gender dysphoria under their State plans?

2 A. Well, just based on the email from Chanelle that
3 we just looked at, those states do offer transgender
4 benefits. But I guess based on this I don't know whether
5 it's surgery or what the benefits are.

6 Q. Okay. Was one of the issues in determining
7 whether the plan offered by the Arizona Department of
8 Administration for employees of the State of Arizona,
9 which included the faculty and staff at -- at the
10 universities, based on the cost of that benefit?

11 A. I would say that in researching it that was one
12 of the items that we did research, was the cost of the
13 benefit.

14 Q. And you determined that the cost was de minimis,
15 didn't you?

16 A. As I recall there was a range of costs.

17 Q. And based on additions to premiums for those who
18 participated in the plan, what was the range? Cents per
19 premium.

20 A. I -- I know we just reviewed that last Sunday,
21 but I can't -- I don't remember what the range was.

22 Q. Well, it was as low as three cents. Do you
23 recall that?

24 A. I don't recall.

25 Q. Okay. But you recall that all the additions were

Marie Frances Isaacson - 03/26/2021

43

1 at which Mike Liburdi and you and others attended say that
2 they had discussed this matter with the governor?

3 A. Not that I recall.

4 Q. Did anyone there say that the governor had a
5 point of view on this issue?

6 A. Not that I recall.

7 Q. What position did Scott Bender have at the -- in
8 September of '16 at or around the time this meeting took
9 place?

10 A. Plan administration manager.

11 Q. And did he report to you?

12 A. Yes.

13 Q. Let's turn to Tab 26. We'll mark that, if it
14 hasn't been marked, as ABOR [Exhibit 102](#). And if you will
15 go to Bates Page Number 119501 of that exhibit, which is
16 the last -- or the first, the first email in this string.
17 You'll see an email from Nicolette Schultz to Jill
18 Metzinger, with a copy of Christina Corieri.

19 See that?

20 A. Yes.

21 Q. It doesn't appear that you got a copy of that
22 email when it was sent in September of 2016. And I'm
23 looking to see whether you were copied on any of the other
24 emails, but I'm not sure that you were.

25 Do you recall seeing this string of emails

Marie Frances Isaacson - 03/26/2021

46

1 all the different vendors but I don't know if this was one
2 or not.

3 The one that we just went over with Nickie,
4 I do remember that one specifically.

5 Q. Okay. Well, what I want to get at in this email
6 is, in the second email, on Page 5656, where Eveleth Ray
7 at Aetna writes to Scott Bender reporting from Aetna
8 legal, in the first sentence under that, quote, generally,
9 employer self-funded plans are not affected.

10 Did you know what that meant?

11 A. I'm assuming that it means that self-funded plans
12 are not impacted, based on Aetna legal.

13 Q. Impacted by some federal law? Impacted by what?

14 A. I'm just looking at -- It just says the final
15 rule, so I'm assuming that's what he's referring to.

16 Q. Okay. And the ADOA plan is at least partially
17 self-funded; is that correct? Or is it totally
18 self-funded?

19 A. It is totally self-funded.

20 Q. Okay. So let's go to --

21 A. Or it was.

22 Q. Hmm? What?

23 A. I said, or it was. I'm not sure what's happening
24 now.

25 Q. Well, as they used to say, the times they are

Marie Frances Isaacson - 03/26/2021

60

1 Q. Do you recall what was the occasion to write this
2 down?

3 A. I don't. May have been training. I'm not sure.

4 Q. You don't recall who -- if this is notes from a
5 telephone conversation or notes from a meeting? Do you
6 recall that?

7 A. It could be. I -- I don't know. I don't
8 remember.

9 Q. Do you know --

10 A. It could be training. It could be a phone
11 conversation.

12 Q. So on the right-hand side in the middle it
13 says[as read]: AHCCCS, A-H-C-C-C-S, equals hormone
14 therapy for others. Why not cover it?

15 So hormone therapy was not covered in
16 October of 2015; right?

17 A. That's right.

18 Q. Wasn't covered till January 1, 2017.

19 But do you mean by this that AHCCCS covered
20 hormone therapy as of October 2015?

21 A. I don't know what I meant by it.

22 Q. Okay. Do you know independently whether AHCCCS
23 covered hormone therapy?

24 A. I don't.

25 Q. Was it important to you to know what AHCCCS

Marie Frances Isaacson - 03/26/2021

61

1 covered?

2 A. I -- I was looking at everything. Like I said,
3 all the plans, other states, what was AHCCCS doing,
4 just -- just gathering information.

5 Q. So AHCCCS stands for Arizona Healthcare Cost
6 Containment System. Which is the Arizona implementation
7 of Arizona Medicaid; correct?

8 A. Yes.

9 Q. And the wheel has come full circle because that's
10 how I met your husband. I think. At least we had a heavy
11 involvement in that program at one time.

12 You will see a reference to -- underneath
13 that -- Section 1557, impos [sic] recipients of
14 discrimination on -- Maybe you can read that for me.

15 A. [As read]: Section 1557 equals imposes
16 recipients of discrimination on -- Not a very good
17 notetaker, I guess.

18 Do you want me to keep reading?

19 Q. Yeah, I -- I want you to interpret for me. The
20 next sentence I think says [as read]: Blanket disallow
21 not allowed equals transgender.

22 Does that refresh your recollection as to
23 what the -- what you meant by that and what you heard?

24 A. I'm -- I'm reading the blanket disallow not
25 allowed.

Marie Frances Isaacson - 03/26/2021

100

1 Q. Is it typical for the health plans to come to the
2 ADOA recommending that coverage be extended for treatment?

3 A. I -- I would say it's typical that the health
4 plans come to DOA with various recommendations: what to
5 cover, what not to cover, changes to make.

6 Q. How often would you say, in your time working at
7 ADOA, this happened?

8 A. That they recommended changes?

9 Q. Yes.

10 A. We met -- we met regularly. We met -- I -- I
11 can't remember how often. Quarterly at least with the
12 health plans. I can't say that each of those meetings
13 resulted in recommendations of change. It was more how
14 the -- how the plan was doing, a review of -- of the plan
15 and utilization.

16 Q. So continuing to focus on this gastric sleeve for
17 bariatric surgery, do you recall the outcome of that
18 inquiry?

19 A. It was added as a benefit.

20 Or I should say, to be clear, extended a
21 benefit. So for the type of surgery.

22 Q. Does that make a difference, whether a benefit is
23 being added or extended?

24 A. I just wanted to be clear. It wasn't new, it was
25 just an extension of the type of surgery we would cover.

Marie Frances Isaacson - 03/26/2021

119

1 cover it or not.

2 A. Correct.

3 Q. And then the -- these managers would then do
4 research about the cost of that coverage?

5 A. I think it was reversed. I think they would have
6 done the research first and then brought it to me.

7 Q. And there could have been other -- other research
8 along with that, including, you know, considering what
9 other states are covering?

10 A. Maybe.

11 Q. And then you would bring that information to the
12 director's office?

13 A. Right.

14 Q. And what would happen after that?

15 A. Then it was presented to the governor's office.
16 It was all part of the contribution strategy discussion,
17 and any changes in the plan and whether or not there
18 needed to be a change in the contribution strategy.

19 Q. So for any change to the plan it was ultimately
20 presented to the governor's office at some point.

21 A. At some point, yes.

22 Q. Were there any changes to the plan you can make a
23 decision on by yourself?

24 A. Not that I recall. I mean -- Not that I recall,
25 no.

Marie Frances Isaacson - 03/26/2021

120

1 Q. Were there any changes to the plan that the
2 director's office can make themselves?

3 A. You know, there -- As an example, a pharmacy
4 change, to change from one type of drug to a different
5 drug to save money, that would be recommended by the
6 pharmacy benefit manager. And that -- that wasn't,
7 though, a contribution strategy discussion. That was --
8 that could have been midyear. And that -- I would have
9 brought that to the director's office and they would make
10 a determination as to whether or not the governor's office
11 would be notified of that. I'm not sure when they did or
12 didn't notify the governor's office of those types of
13 decisions.

14 For plan design and the contribution
15 strategy the governor's office was always involved.

16 Q. So to be clear, yes, there were some decisions
17 that the director's office can make themselves.

18 A. I -- I don't know because I don't know every
19 decision that was run by the governor's office or not.

20 Q. But do you know whether the governor -- the
21 director's office could make a decision, for example, on
22 pharmacy benefits by themselves?

23 A. I don't know the answer to that.

24 Q. Was there anyone else beyond the director's
25 office and the governor's office who was involved in

Marie Frances Isaacson - 03/26/2021

195

1 plan excludes that the ADOA receives multiple claims for
2 it to cover, does the ADOA then assess whether to cover
3 that procedure?

4 A. Not if it's excluded, no.

5 Q. So must there be some other external factor that
6 causes the ADOA to consider whether to maintain an
7 exclusion or not?

8 A. As I mentioned before, the medical directors from
9 the plans come forward with ideas. That is one way that a
10 recommendation comes forward.

11 Q. So if the medical directors came forward with
12 a -- a treatment that they thought was medically
13 necessary, would that factor into the ADOA's decision of
14 whether to cover that treatment?

15 A. Yes, I -- I guess it would.

16 Q. What are the origins of the exclusions in
17 general?

18 A. My understanding is that when the State went
19 self-insured they took the plan design that was in place
20 and adopted that as their plan design.

21 Q. When did the State go self-insured?

22 A. I -- I don't remember exactly. Maybe 2000 -- I
23 don't know the time frame, honestly.

24 Q. Were you then employed by the State?

25 A. I was.

Marie Frances Isaacson - 03/26/2021

197

1 secretary.

2 MR. CURTIS: I concur, Paul.

3 Q. BY MR. WALL: So Ms. Isaacson, was the -- did the
4 State's plan go self-insured sometime between 2002 and
5 2009?

6 A. Closer to 2002, I would say.

7 Q. And I believe you said that the State adopted the
8 plan design that had been in place. Is that right?

9 A. Yes. That's my understanding.

10 Q. Where did that plan design originate?

11 A. I believe it was Cigna, but I don't know.

12 Q. Do you know if the plan's exclusion of
13 transgender benefits was in place when the State went to a
14 self-insured plan?

15 A. I believe it was.

16 Q. So when you became the benefits director the plan
17 excluded transgender benefits.

18 A. Yes.

19 Q. Would you turn for me, please, to Tab 40 of that
20 binder.

21 THE COURT REPORTER: And mark it as an
22 exhibit?

23 MR. WALL: Yes, ma'am.

24 Q. BY MR. WALL: So Ms. Isaacson, this is a very
25 long document so I won't ask you to review it. But do you

Marie Frances Isaacson - 03/26/2021

200

1 exclusion of transgender benefits in 2016, is this what
2 you have -- is this what you have in mind when we talk
3 about that topic?

4 A. Yes.

5 Q. And is this the language you believe was in place
6 when the plan went self-funded?

7 A. I believe so.

8 Q. You don't recall any other version of this
9 exclusion prior to 2016, do you?

10 A. No.

11 Q. Do you know the original rationale for this
12 exclusion, Ms. Isaacson?

13 A. I think the State -- My understanding is the
14 State just adopted the plan that was the fully insured
15 plan design.

16 Q. Did the State undertake any review of the plan
17 design when it adopted it?

18 A. I was not involved in that decision. I don't
19 know.

20 Q. Did the ADOA undertake any review while you were
21 the benefits director of the plan design?

22 A. Those -- Yes.

23 Q. Did it -- did it review -- How did it go about
24 that review?

25 A. Based on recommendations on an annual basis

Marie Frances Isaacson - 03/26/2021

331

1 A. 800 million for the medical side.

2 Q. And -- and you are saying that 3.6 out of
3 800 million is significant?

4 A. Seems significant.

5 Q. I'm sorry?

6 A. It seems significant.

7 Q. Did you consider the cost in -- increase in
8 premium per employee to be significant that it set out
9 there in the last bullet?

10 A. No.

11 Q. Under the plan, the premiums would have been
12 raised to cover the costs. Isn't that the way it's done?

13 A. Yes, that is the way it's done.

14 Q. So ultimately it's the people who receive the
15 benefits, the employees who are covered, who will pay the
16 cost.

17 A. And the State.

18 Q. Well, how --

19 A. The State agencies.

20 Q. How does the State end up paying it if the
21 employees are paying the extra cost by an increase in the
22 premium?

23 A. It's a split. The contribution strategy is a
24 split between what the State pays and what the employee
25 pays.

38

1 problems, but yes.

2 Q. And lots of huddles also --

3 A. Right.

4 Q. -- sounds like.

5 Do you typically interact with insurers in
6 your role?

7 A. So you are using a term and I don't know how
8 you're using it. We refer to them as carriers. We are a
9 self-insured program. So what we purchase from a carrier,
10 which is what you probably would call an insurer, and --
11 and I'll use UnitedHealthcare as an example.

12 We have a contract with UnitedHealthcare
13 that pays on a per member, per month administrative basis.
14 Access to UnitedHealthcare's network of providers and
15 access to their claims processing systems, which is -- You
16 know, those are -- those are extremely complicated and
17 robust systems, okay? We -- The actual claims that are
18 incurred by our members are paid out of what's called the
19 special Employee Health Insurance Trust Fund. And it's
20 a -- it's a State fund that accumulates all the premiums
21 that -- that, you know, State employees, the State
22 agencies, the retirees, and COBRA people pay into the --
23 into this fund, and then from that fund we pay the claims
24 as they are submitted to us by the carrier, okay?

25 So we are not actually insured by anyone.

Paul Shannon, Videotaped - 06/25/2021

39

1 And we do not maintain any -- any other kind of stop-loss
2 insurance. We are fully self-insured and all the claims
3 are our responsibility to pay. But we use the systems
4 that are provided by the carrier to do that.

5 Q. I see.

6 So you mentioned UHC being one of the
7 carriers. Is Aetna another carrier?

8 A. Aetna and Cigna were carriers up until
9 January 1st of this year. They did -- we did a
10 procurement, a very lengthy procurement to do a new
11 medical carrier contract, and Aetna and Cigna were not
12 successful. Blue Cross and UnitedHealthcare were, were
13 successful.

14 Q. So the current carriers are UnitedHealthcare and
15 Blue Cross Blue Shield of Arizona?

16 A. That's correct.

17 Q. Any others?

18 A. We have other carriers for dental insurance. We
19 have a fully insured dental product. We have a life
20 insurance. We have vision insurance. And those are also
21 fully insured. We have short-term disability insurance;
22 we have long-term disability insurance which are also
23 fully insured.

24 Q. But for medical benefits, UHC and Blue Cross?

25 A. That's correct.

Paul Shannon, Videotaped - 06/25/2021

98

1 Q. In response to telling coworkers at the ADOA that
2 you had been named a defendant in this lawsuit, did anyone
3 respond with a comment or a sentiment about transgender
4 rights or individuals?

5 A. I don't recall any conversations about that.

6 Q. Did you have a conversation with Scott Bender
7 specifically about sending information to you so that you
8 could better understand what happened when the decision
9 was made to maintain the exclusion in 2016?

10 A. I think my conversations with Scott Bender at
11 that point were to try to understand the validity of the
12 lawsuit and our exposure under the law to the allegations
13 of the lawsuit.

14 Q. So did you -- So why would Scott Bender have been
15 sending you this exchange with the governor's office?

16 A. You'd have to ask Scott that.

17 Q. Did you ask him to send you information about the
18 decision that was made in 2016?

19 A. I don't recall asking him to -- about how the
20 decision was made.

21 MS. SHEETS: I think we should take a
22 ten-minute break here and go off the record.

23 THE VIDEOGRAPHER: Off the record at
24 11:23 a.m.

25 (Recess.)

Paul Shannon, Videotaped - 06/25/2021

124

1 the ADOA. So at a high level, I'll just ask you, what, in
2 your experience, typically goes into a consideration when
3 the ADOA is deciding whether to cover a benefit?

4 A. Well, the first and most obvious would be if
5 there's some law that compels the benefit to be provided
6 or prohibits a benefit from being provided.

7 The second and more -- much more common way
8 is that annually we meet with the medical directors from
9 our carriers and ask them for advice on how to change our
10 benefit plan. And that's -- that would be around the cost
11 effectiveness and -- and clinical effectiveness of
12 particular treatments or -- or medications. And those
13 medical directors will typically give us the advice of how
14 they are -- you know, how they believe those benefits
15 should be added or deleted.

16 Q. Do you -- Well, so I heard cost effectiveness,
17 clinical effectiveness, and the legal aspects of when
18 something's prohibited or required. Are there other
19 considerations that you can think of that the ADOA
20 typically considers in making these decisions?

21 A. I can't think of any, no.

22 Q. Does the ADOA, in your experience, always take
23 into account those three categories of information: the
24 cost effectiveness, the clinical effectiveness, and the
25 law?

Paul Shannon, Videotaped - 06/25/2021

128

1 reserves to fund those because we had made no plan design
2 decisions or benefit design decisions that would -- that
3 would account for those costs.

4 Q. And so when you are dealing with an issue where
5 there is no or very little historical data on how that
6 benefit will be used would you put more weight on the cost
7 analysis in that instance where there's less data, or
8 less?

9 A. Well, I -- You know, that's why I mentioned the
10 reserve, is that I -- At some point you have to -- you
11 have to move into the future, right? I mean, the plan
12 continues. And -- and what will be will be. Just because
13 you have a cost estimate doesn't mean that's how much it's
14 going to cost, right? That -- or cost projection. That's
15 a projection. You hope it's accurate. If you make
16 mistakes that are -- that are significantly wrong, then
17 you correct for that going forward and hopefully you learn
18 from -- from those errors or -- or misjudgments. And --
19 and those errors -- you know, learning from those errors
20 will help you avoid making them in the future.

21 Q. When you are considering -- and by you I mean
22 the -- When the ADOA is considering whether or not to add
23 a new benefit or extend a benefit, does it always consider
24 the cost as a factor?

25 A. I believe that we try and make sure all of our

Paul Shannon, Videotaped - 06/25/2021

129

1 estimates include an understanding of what the cost will
2 be.

3 Q. But there are some benefits where cost is not the
4 driving factor; right?

5 A. Cost -- I don't know that that's true. Cost is
6 always a factor when you are -- when you are dealing with
7 public moneys, okay?

8 Cost is also a factor in that we need to,
9 you know, weigh the -- the -- the projected cost of a
10 benefit versus the utility of that benefit in maintaining
11 the health of our -- of our members or in -- in providing
12 a generous enough benefit that we're competitive in the
13 job market in recruiting and retaining employees. It's
14 more complicated than it would appear. Sometimes spending
15 money on one thing, like a wellness program, can
16 actually -- which has an expense, can actually decrease
17 the expenses on the -- on the health insurance side
18 because you have healthier employees who need less medical
19 treatment.

20 So -- so I don't think we ever make
21 decisions without the -- without understanding the
22 implications of cost.

23 Q. And when you're taking cost into consideration
24 and making decisions about adding or extending benefits is
25 there a -- an instance you can think of of cost being

Paul Shannon, Videotaped - 06/25/2021

138

1 you know, covered -- you know, covered procedures and --
2 and drugs. But I can't remember ever saying, you know,
3 we're not going to do that because it costs too much or --
4 or we have to do this because, you know, people are going
5 to die if we don't. That -- that -- I don't remember that
6 happening that way.

7 Pharmaceuticals are a little bit different
8 because we take the -- the advice of the medical -- the
9 pharmacists that -- that are with our pharmacy benefit
10 manager. And typically we will follow their
11 recommendations on those just because, you know, getting
12 more into that -- making decisions about that is beyond
13 our expertise in -- you know, as administrators. We rely
14 on medical professionals and pharmaceutical professionals
15 to make those recommendations.

16 Q. And when you are making decisions about medical
17 benefits that are not pharmaceuticals, do you look to
18 experts from your fully insured book of business carriers?

19 A. Right. That's -- that's the medical directors
20 meeting that I referred to earlier. That's when they
21 provide those recommendations.

22 Q. And how often do those medical director meetings
23 happen?

24 A. Once per year.

25 Q. Do you attend those meetings?

Paul Shannon, Videotaped - 06/25/2021

224

1 Q. When did you counsel him about it?

2 A. To that point, it was at some -- at some point in
3 the past. It was before the pandemic, because it was in
4 person. And I haven't seen Michael in person since before
5 March 13th, 2020.

6 Q. And to be clear, you -- your testimony today is
7 that you never heard Michael Meisner make personal --
8 Excuse me. You've never heard Michael Meisner make a
9 statement of a personal view that he might have on
10 coverage of transgender benefits; is that right?

11 A. I can't recall any statement that way, no.

12 Q. Can you recall a statement by anyone at the ADOA
13 that would express a personal view on whether transgender
14 benefits should be covered?

15 A. Honestly, no.

16 Q. What about anyone from the governor's office?

17 A. No.

18 Q. You never heard any conversations with people
19 from the governor's office expressing a view about whether
20 transgender benefits should be covered?

21 A. No.

22 Q. Have you ever discussed the subject with
23 Christina Corieri?

24 A. No.

25 Q. Are you aware of Ms. Corieri's personal views on

Paul Shannon, Videotaped - 06/25/2021

231

1 Q. You have seen during that time a lot of benefits
2 added to the ADOA plan; right?

3 A. Well, I've watched medical technology advance
4 and -- and -- and, you know, treatments be added. But I
5 would say in general the -- the plan has not been as
6 generous over time as one would have hoped. In fact, in
7 many ways it's become less generous. The premiums are
8 higher, the deductibles are higher, the cost sharing is
9 higher. So it's sort of a mixed bag about whether or not
10 it's more generous or not.

11 Q. But Mr. Shannon, I guess my question is, in your
12 opinion has this decision by the ADOA to maintain the
13 exclusion for gender reassignment surgery been treated
14 differently than other decisions that you have seen made
15 over years?

16 A. As I mentioned earlier, there hasn't been a
17 decision to exclude it, there's been a decision to not
18 include it. Because we don't include all of the possible
19 benefits that we could offer.

20 Q. And has the decision by the ADOA to not include
21 gender reassignment surgery in your opinion been different
22 than the process that the ADOA goes through when it
23 decides what to do about other benefits?

24 A. No.

25 MS. SHEETS: We have no further questions.

Paul Shannon, Videotaped - 06/25/2021

243

1 A. That's correct.

2 Q. And I'm wondering where -- what led you to
3 believe that there is a stigma associated with being
4 transgender.

5 A. My experience with the popular culture. But also
6 more specifically, that's literally the -- that's
7 literally the medical definition of gender dysphoria.

8 Q. What -- what do you believe is the medical
9 definition of gender dysphoria?

10 A. Gender dysphoria is the feeling of -- the ill
11 feelings that a transgender person feels from the society
12 around them.

13 Q. Do you believe that every transgender person
14 suffers from gender dysphoria?

15 A. I don't believe that, no. Every -- every would
16 mean every single individual feels that.

17 Q. So what in the popular culture led you to believe
18 that there was a negative stigma associated with being
19 transgender?

20 A. Well, in my lifetime transgender individuals have
21 been assaulted on the street and beaten up for being
22 transgender. So that's -- that's one, you know, glaring
23 example.

24 Q. Have you had any conversations with anybody where
25 somebody has expressed a negative or adverse reaction to

Paul Shannon, Videotaped - 06/25/2021

244

1 transgender people?

2 A. Yes. Although those conversations have
3 diminished over time as transgender people have been more
4 accepted into society.

5 Q. Were any of those conversations with anybody
6 employed by ADOA?

7 A. No.

8 Q. What about the Arizona governor's office?

9 A. No.

10 Q. Have you ever spoken with any transgender
11 employee of the State of Arizona, as far as you know?

12 A. As far as I know I don't know of any transgender
13 employees -- you know, with the exception of Dr. Toomey, I
14 don't know of any transgender individuals employed by the
15 State.

16 Q. And you have never spoken with Dr. Toomey; right?

17 A. No.

18 MR. YOST: That's all the questions I have.

19 MR. CURTIS: State defendants do not have
20 questions on redirect. I suppose, Victoria, if you have
21 redirect questions for what ABOR asked.

22 MS. SHEETS: We do not.

23 MR. CURTIS: Okay.

24 MS. SHEETS: But I just want to thank you,
25 Mr. Shannon, for being here today and taking the time.

Scott Bender, Videotaped - 03/31/2021

37

1 plan changes, what does that work entail?

2 A. It's varied. On the union side all changes had
3 to be negotiated, and I was part of the team that put
4 together various proposals, and actually made proposals
5 in one organization to the -- to the local union, which
6 was the Teamsters. And on the nonunion side just sort of
7 evaluating what's -- what's happening in the marketplace;
8 obviously with the battle for talent, you want to keep
9 your employee benefits as rich as possible, yet still
10 affordable.

11 Q. Was there a process that you had for assessing
12 whether to implement or change the health plan?

13 A. It was more informal. Based on -- on budget
14 and what we felt we needed to offer to our employees to
15 maintain competitiveness, we would propose changes to
16 copays or deductibles or cost sharing, you know, the
17 amount that you pay through your paycheck for your
18 employee benefits. We would make those proposals each
19 year, do the evaluation of what that's going to cost. It
20 was a fairly small organization, so I think there was
21 around 2,500 active employees. So it was not as robust
22 as the State, as you can imagine. But that -- there was
23 no definitive process; it was more informal.

24 Q. So when you would propose changes to copays or
25 deductibles, for example, what work would you do to

Scott Bender, Videotaped - 03/31/2021

1 evaluate that proposed change?

2 A. You would determine what is your claims
3 experience, what the impact would be to the -- to the
4 organization. What would the impact be to the employees,
5 you know, what portion of the -- the increase, if you
6 will, would be borne by both sides. And that was
7 reviewed by management, they determined, you know, what
8 their -- their tolerance for any level of change. At
9 some --

10 Q. And would you measure that impact to employees
11 or the organization through an analysis of cost?

12 A. Yes.

13 Q. And would your analysis of cost, would that be
14 informal or a formal analysis?

15 A. It was data. So I would say formal. You know,
16 you take your -- your claims experience and you include
17 sort of an expected trend. And then, based on whatever
18 changes that you're proposing, you sort of extrapolate
19 what is -- what is the cost impact going to be.

20 Q. Would you involve an actuary?

21 A. No actuary. There was a finance manager.

22 Q. And so why did you -- why did you need an
23 actuary? Let me clarify. Is there a reason you relied
24 on your finance manager rather than an actuary?

25 A. We didn't have an actuary on staff. And,

Scott Bender, Videotaped - 03/31/2021

41

1 A. Yes, I had staff and I was responsible for
2 managing the program.

3 Q. So let's start with your management of the
4 staff. When you're managing staff in the benefits
5 department, and we'll keep it to the Dial company, how
6 did that work? Did you -- did you, say, assign
7 assignments to members of your staff to investigate?

8 A. Yes. They typically managed member issues,
9 day-to-day work managing eligibility files, making sure
10 that it was processed properly.

11 Q. Would that staff manage, say, a proposed change
12 to the health plan?

13 A. Not necessarily manage it. I guess they would
14 assist in the implementation of that.

15 Q. Would that -- that would have still fallen to
16 you as being responsible for managing?

17 A. Right.

18 Q. So aside from a cost analysis, and we're --
19 let's -- we're still talking about changes to a health
20 plan, what other information might you gather or did you
21 gather in that role to help you evaluate a proposed
22 change to the plan?

23 A. In that role, it was more -- half the
24 organization was unionized, so your hands were sort of
25 tied there. The others were simply determining what --

Scott Bender, Videotaped - 03/31/2021

42

1 what trends are in the marketplace, what could you do
2 from a wellness perspective to get people to take better
3 care of themselves. You know, what -- what are some
4 emerging trends, for example. So sort of flipped over
5 every rock to figure out, you know, what is the future,
6 where do you want to be, and then set forth and
7 implement.

8 Q. Would you consult with -- for that particular
9 plan, did you have a dedicated network provider or
10 multiple?

11 A. We had multiple. It was more based on regions.

12 Q. Do you recall who those network providers were?

13 A. Gosh, there was a bunch. United Healthcare,
14 Aetna. There were some regional ones, Penn State
15 Geisinger, in Pennsylvania. There's the John Deere
16 Network, in Ft. Madison, Iowa. Kaiser Permanente, in
17 California.

18 Q. What about Blue Cross Blue Shield?

19 A. I don't recall them being a provider at Dial.

20 Q. And what about Cigna?

21 A. They were not a medical provider. They were a
22 disability carrier for us.

23 Q. So at least when you were working with the Dial
24 Soap company, you were working with United Healthcare and
25 Aetna; is that right?

Scott Bender, Videotaped - 03/31/2021

56

1 going to pay what.

2 Q. Is who is going to pay what the most important
3 factor for the Arizona health plan?

4 A. It is an extremely important factor.

5 Q. Are there any other factors that are more
6 important?

7 A. Than the cost?

8 Q. Yes.

9 A. Well, you need to make sure you have sufficient
10 coverage, a sufficient number of providers.

11 Q. So when you say "sufficient coverage" or
12 "number of providers," what exactly do you mean?

13 A. The State of Arizona has employees in all parts
14 of the state, and even some out of state. You need to
15 ensure that everybody has sufficient access to the
16 doctors that they need. Even if you live in a rural
17 area, you still need to have some level of access.

18 Q. So, for instance, the Arizona -- the --
19 Arizona's health plan has four network providers; is that
20 right?

21 A. Up until this year, yes, that was correct.

22 Q. And what happened this year?

23 A. We were under the process of redesigning the
24 health plans for the last two years, and that involved
25 moving to a different type of network arrangement; it

Scott Bender, Videotaped - 03/31/2021

58

1 Q. So just in terms of setting out the important
2 factors, there's cost and sufficient coverage -- I'm
3 sorry, actually, before you answer that, I need you to
4 give a verbal answer, Mr. Bender. So in terms of the
5 most important factors for the ADOA, there's cost.

6 Correct?

7 A. Yes.

8 Q. Coverage?

9 A. Yes.

10 Q. And is there anything else?

11 A. And when I say "coverage," I mean that covers
12 all different kinds of things, network adequacy,
13 primarily. I think those are the two most important
14 factors.

15 Q. What about the best interests of the members?

16 A. It's a factor.

17 Q. But it's not as important a factor as cost and
18 coverage?

19 A. In my opinion, probably not.

20 Q. And when you say your opinion, what about for
21 the ADOA?

22 A. I can't speak for the ADOA.

23 Q. But in your work with the ADOA, you haven't
24 seen it as -- you haven't seen it prioritized as high a
25 factor as cost and coverage?

Scott Bender, Videotaped - 03/31/2021

71

1 BY MR. WALL:

2 Q. So, Mr. Bender, before we took a break, we were
3 talking about the involvement of the governor's office
4 with respect to proposed changes to the plan.

5 Do you recall that conversation?

6 A. Yes.

7 Q. So I believe you said that the governor's
8 office is involved whenever there is a major change to
9 the plan?

10 A. That's correct. And also annually to approve
11 the contribution strategy.

12 Q. What counts as a major change?

13 MR. CURTIS: Object to the form of the
14 question.

15 THE WITNESS: Significant plan design, where we
16 might be eliminating a type of plan or adding a type of
17 plan that occurred for 2021.

18 BY MR. WALL:

19 Q. So a significant plan design would entail, you
20 know, a change in the number of network providers?

21 A. Not necessarily. That's as the result of a
22 procurement process. But a significant change with
23 regard to whether you offer a PPO-style plan or eliminate
24 a PPO-style plan, which we have done, and adopt more
25 value-based network contracting arrangements. And they

Scott Bender, Videotaped - 03/31/2021

81

1 Q. So no, you have not seen any other factors at
2 work?

3 A. No.

4 Q. You also mentioned that the governor's office
5 is involved -- I think you said in two other instances,
6 but let me make sure I understand -- the governor's
7 office is involved in the annual approval of the State
8 health plan?

9 A. Yes, they -- we work with them on the
10 contribution strategy.

11 Q. So this is what I want to clarify. Is the
12 governor's office involved as the part of an annual
13 review of the plan or only when there are changes to the
14 contribution strategy?

15 A. Both. So if there's significant proposals like
16 we initiated for 2021, they were involved in that
17 process. And they were involved in the annual
18 contribution strategy, our recommendations for what we
19 think we should do to control the cost of the -- the
20 health plans.

21 Q. What could cause a change in a contribution
22 strategy for the State's health plan?

23 A. What could cause a change? Gosh, any number of
24 factors. We only have a small -- well, we have an
25 insufficient budget to manage the plan as it is today.

Scott Bender, Videotaped - 03/31/2021

98

1 of it yet, would the governor's office be likely to get
2 involved in that process?

3 A. I doubt it. I know that there are lobbyists
4 all over the Capitol, you know, that try to assert
5 influence for various different things, but typically any
6 plan design change or coverage of benefits comes from us.

7 Q. So the governor's office is typically not
8 involved in the process of evaluating the plan change?

9 A. Before we do, no.

10 Q. The governor's office gets involved once the
11 ADOA has done its research on the plan change and
12 presented the change to it?

13 A. Correct.

14 Q. So, Mr. Bender, you mentioned earlier that
15 everyone has an opinion that you -- that you -- that
16 everyone has an opinion in these layers of leadership; is
17 that right?

18 A. Yes.

19 Q. Have you ever heard any opinions about
20 transgender benefits?

21 A. No.

22 Q. Are you familiar with transgender benefits --

23 A. Yes.

24 Q. -- and what they entail?

25 A. Yes, I am.

Scott Bender, Videotaped - 03/31/2021

101

1 not as -- it's certainly not advantageous from an
2 administrative standpoint, but it also reduces -- it
3 increases your costs, because you don't have as many
4 employees in each program. It's based on volume. You
5 pay administrative fees based on the number of people you
6 cover. The more people you cover, the less the rate.

7 Q. So when was the last time that the State
8 undertook a redesign of the plan.

9 A. This -- well, I want to say probably in -- I
10 believe it was when the State went self-insured from a
11 fully insured program. And that would have been in the
12 2008-2009 time frame, I believe. Well before my time.

13 Q. And, Mr. Bender, I believe you testified that
14 the State was undergoing this redesign over the last two
15 years?

16 A. Yes, it took approximately two years from the
17 start of our discussions around the plan redesign to
18 actual implementation in the effective date of those
19 changes.

20 Q. So when did that process start?

21 A. I want to say it started late 2018 or early
22 2019 is my guess.

23 Q. As you will have probably surmised, this is
24 something I do to help orientate people: Do you know if
25 that started before or after Christmas 2018?

Scott Bender, Videotaped - 03/31/2021

103

1 the other was Segal.

2 Q. And could you spell "Segal" for -- I don't know
3 if it's like the bird or if it's like --

4 A. It's s-e-g-a-l.

5 Q. And during that process with the two consulting
6 firms, did -- does the ADOA examine every aspect of the
7 plan?

8 A. I would say probably so. I -- that process was
9 focused more on the overall structure of the program, as
10 opposed to any specific exclusions or other things, if
11 you will.

12 Q. But did the ADOA review the plan exclusions
13 during that process?

14 A. I don't recall if we did or not, but we
15 typically review our exclusions each year with our
16 medical director community.

17 Q. And what is that medical director community?

18 A. So at least once a year the medical directors
19 from the four health plans, Blue Cross, United, Cigna,
20 and Aetna, we would host a meeting with them, and in
21 advance provide them with here's our plan design, here's
22 our list of exclusions for the benefit programs, and they
23 would go through and evaluate those versus their book of
24 business and how we compare, and we would consider any
25 recommendations they have from that. And then just talk

Scott Bender, Videotaped - 03/31/2021

104

1 through any emerging trends in the marketplace, you know,
2 what kind of drugs are hitting -- are coming down the
3 pipeline that we need to be aware of from a cost
4 perspective. So it was more just an open sharing of
5 information and ideas rather than an analysis of our
6 plan.

7 Q. Would you typically take those medical
8 directors' recommendations?

9 A. Sometimes, yes. It depends on -- on cost and
10 things like that. The dental plans were also included in
11 those analyses.

12 Q. So when you say "sometimes," is it more often
13 than not?

14 A. I couldn't say. I don't know if it's 50/50 or,
15 you know, all one way or the other.

16 Q. And I think you said the ADOA looked at its
17 plan exclusions with this medical director community
18 every year. Correct?

19 A. That's right.

20 Q. So has the ADOA looked at the plan's exclusion
21 of gender reassignment surgery every year that you've
22 been employed there?

23 A. I believe so, yes. That's listed in the
24 exclusions, so yes, it would have been reviewed.

25 Q. So starting at the beginning, again, of your

Scott Bender, Videotaped - 03/31/2021

116

1 her on. Gosh, I can't remember. It was right when I
2 started. We had conversations with her on something.
3 I'm sorry, I don't remember. And I know that she was
4 involved in the discussion in our redesign of our new
5 wellness program, and what the governor's office would be
6 interested in from the perspective of a new vendor and
7 what kind of capabilities they wanted for the wellness
8 program, but my -- my interaction with her is very
9 limited.

10 Q. Have you ever interacted with her with respect
11 to the plan's coverage of transgender benefits?

12 A. I have not, no.

13 Q. So I think I understand now, you know, the
14 structure of who reports to who. I'd like to understand
15 it better, the decision-making process at the ADOA. So
16 with respect to the plan's exclusion, a change to a plan
17 exclusion, a removal of a plan exclusion, which is what
18 is at issue in this case, how would you first
19 learn -- how would it come to the ADOA's attention a
20 proposal about removing a plan exclusion?

21 A. I'm trying to -- could you rephrase your
22 question? I think -- this is not something that happens
23 often.

24 Q. Sure. Well, let me ask you about that. How
25 often does -- is a proposal to remove a plan exclusion,

Scott Bender, Videotaped - 03/31/2021

117

1 how often does that occur?

2 A. Not very frequently.

3 Q. Twice a year?

4 A. No, not even that often.

5 Q. Once every two years?

6 A. I'd say that's probably more -- more likely.

7 And, typically, it's done in conjunction with change in
8 law that we have to, you know, cover something in
9 particular.

10 Q. Was the removal of the plan's exclusion of 3-D
11 mammography the last plan exclusion you dealt with?

12 A. No, it was the -- the clinical cancer trial.
13 And that was something that we had to cover. 3-D
14 mammography was more of a change in medical coverage
15 guidelines.

16 Q. So what do you mean it -- what do you mean by
17 it was a "change in medical coverage guidelines"?

18 A. The vendors themselves determine what is
19 considered a medically necessary service. As I
20 mentioned, Aetna was the first organization to make the
21 determination that 3-D mammography was an appropriate
22 service and not experimental. They had seen enough
23 evidence to determine that that is something that should
24 be covered. And they were covering it on their -- on
25 their medical guidelines. And slowly, but surely, the

Scott Bender, Videotaped - 03/31/2021

158

1 Q. And other considerations around the plan's
2 exclusion of transgender benefits -- let me clarify.
3 Were other considerations about the plan's exclusion or
4 the removal of that exclusion around transgender benefits
5 more clear?

6 A. Could you rephrase that?

7 Q. Sure. Was there any question about the cost of
8 covering transgender benefits amongst your team?

9 A. Oh, yes.

10 Q. What were those questions?

11 A. The -- determining the actual impact, we had
12 queried all of our -- all four of the health plans to
13 give us sort of their estimate as to what it would be to
14 our health plan. You know, if we were to implement these
15 things, what would the -- the annual cost be to -- to the
16 State of Arizona.

17 And the -- the responses were fairly all over
18 the place, to put it bluntly. They were very
19 wide-ranging. And, in addition, I know our actuary went
20 and did sort of his own benchmarking, if you will, just
21 by looking at, within his industry, doing some research
22 as to cost impact for transgender benefits. And the cost
23 impacts were all over the place.

24 So it was very difficult to determine exactly
25 what that would be, but the worst-case scenario was

Scott Bender, Videotaped - 03/31/2021

159

1 extremely expensive.

2 Q. What would you consider as "extremely
3 expensive"?

4 A. I think one estimate that we saw was upwards of
5 \$20 million. And that was the extreme outlier, but
6 certainly something to pay attention to.

7 Q. And when you say "our actuary," you're
8 referring to Mr. Meisner?

9 A. That's right.

10 Q. And when did you see that estimate?

11 A. It would have been sometime in 2016.

12 Q. So aside from cost, was there a consensus
13 amongst the network providers of whether to extend
14 coverage for transgender benefits?

15 A. There was consensus as to what they were doing
16 on their fully insured book of business.

17 Q. And what was that consensus?

18 A. They were going to cover it.

19 Q. So each of the then four network providers were
20 going to pro -- were -- uh, let me restate that.

21 So each of the four network providers were
22 going to cover transgender benefits?

23 A. For their fully insured book of business, yes.
24 Self-insured plans had the option to add that benefit.

25 Q. Did the ADOA request that the network providers

Scott Bender, Videotaped - 03/31/2021

167

1 or deleted the exclusions and absorbed the costs
2 associated with that, for sure.

3 BY MR. WALL:

4 Q. So if the ADOA had removed the exclusion listed
5 in paragraph 16, would there have been any other question
6 about the ADOA's compliance with Section 1557?

7 A. From a compliance standpoint, no. If we
8 voluntarily opted in, there's no compliance issue.

9 Q. So why didn't the ADOA remove the exclusion for
10 all transgender benefits under the plan?

11 A. Can you rephrase?

12 Q. Why didn't the ADOA remove the plan's exclusion
13 of transgender benefits, inclusive of gender reassignment
14 surgery?

15 A. I believe there are several reasons, one being
16 cost and the other being we didn't feel it was required
17 for us to include -- or to eliminate the exclusion for.

18 Q. So the ADOA did not remove the plan's exclusion
19 of gender reassignment surgery because of cost, and it
20 didn't feel it was required to remove that exclusion?

21 A. Those are both reasons. I think, primarily, is
22 we weren't required to, and if we're not required to,
23 then we weren't interested in taking on additional costs
24 in a plan that's already under water.

25 Q. The ADOA's primary reason for not removing the

Scott Bender, Videotaped - 03/31/2021

286

1 the decision maker?

2 A. I -- I couldn't do so, definitively. I don't
3 know if she decided that or not.

4 Q. And you testified earlier that you think that
5 Marie is a bit conservative --

6 A. Uh-huh.

7 Q. -- is that right?

8 A. I would say so.

9 Q. Did she ever express any opposition to
10 providing coverage for gender reassignment surgeries, in
11 ADOA's health insurance plan to you?

12 A. No, I never heard her express a personal
13 opinion about it, other than really what are we required
14 to do.

15 Q. And so she was neutral about her own personal
16 view on the issue?

17 A. If she wasn't neutral, she hid it very well,
18 and, you know, played it close to the vest, so -- you
19 know, I didn't get any violent reaction one way or the
20 other.

21 Q. And you testified that Michael Meisner is quite
22 a bit more conservative than --

23 A. Right.

24 Q. -- Marie. Right?

25 A. Right.

Kelly Sharritts - 04/22/2021

45

1 know what the exact trickle was. But Marie reached out to
2 our department -- or to our team to look into it.

3 Q. Do you remember around when Marie Isaacson
4 reached out to your team to look into coverage of this
5 exclusion?

6 A. It was, I would say, mid to late 2015.

7 Q. Do you remember how long you had been working at
8 the ADOA when you were first approached about this issue?

9 A. I would say roughly six months. Somewhere in
10 that range.

11 Q. Now -- Oh, before we move on, do you remember
12 learning about the history of how this exclusion first
13 came to exist in the ADOA plan?

14 A. I don't recall knowing how it started. I just
15 was looking at does it stay.

16 Q. Did you know how long it had been part of the
17 ADOA plan?

18 A. I don't recall that answer.

19 Q. Did it seem like something that had just been
20 added, from the conversations you were having?

21 A. I wouldn't be able to infer that. I don't know.

22 Q. And when Marie Isaacson reached out to your team
23 to assess whether the ADOA should maintain this exclusion
24 as written in the 2016 plan, what specifically did you
25 take her to be asking for?

Kelly Sharritts - 04/22/2021

56

1 And it was states that were covering it, to
2 understand why they were covering it, if they felt it was
3 required and discrimination not to, and what sources they
4 had to support that so we could look at those same
5 sources, and what the cost impact to their plan was by
6 doing it.

7 Q. But this was not a step that the ADOA usually
8 took in the course of deciding whether to maintain an
9 exclusion; right?

10 A. Correct. In my time there, I will clarify that.

11 Q. You mentioned some insurers: UnitedHealthcare,
12 Aetna, Blue Cross Blue Shield. Was it typical to reach
13 out to them when making a decision like this?

14 A. Yes.

15 Q. Do you remember reaching out to them in this
16 instance?

17 A. I don't know if I specifically reached out, but
18 our team reached out to get their opinion and their
19 information on it.

20 Q. Who on your team would have been responsible for
21 reaching out to insurers?

22 A. I believe it would have been Chanelle. I believe
23 she is the one who was -- had the relationship with them.
24 I forget her actual title and role -- or her team. I
25 think Yvette reported to her. So they probably would have

Kelly Sharritts - 04/22/2021

78

1 THE WITNESS: Yes.

2 And on the second page behind the charts is
3 where I have the information -- inflation estimates from
4 the Milliman's health cost index --

5 Q. BY MS. SHEETS: Do you remember --

6 A. -- (indecipherable due to simultaneous
7 crosstalk).

8 Go ahead.

9 Q. Do you remember whether Michael Meisner was
10 involved in putting together these numbers?

11 A. I believe I -- I believe he helped me with the
12 inflation number. But I believe that's all he helped me
13 with on this.

14 Q. Do you remember why you put this analysis
15 together?

16 A. To understand the cost impact if we were to cover
17 it. Would it hurt the plan? Would we have to get
18 additional funding? Could it impact taxes or premiums
19 that employees were paying? What that -- what it meant
20 financially to cover it.

21 Q. And did anyone ask you to put this cost analysis
22 together?

23 A. It would have been Marie asking me to understand
24 the cost impacts.

25 Q. And would Marie Isaacson have asked anyone else

Kelly Sharritts - 04/22/2021

90

1 A. Yes.

2 Q. And do you remember what the conclusion was on
3 the first question of whether or not the ADOA was required
4 to cover transgender benefits?

5 A. I believe from the documents that we looked at
6 today that Mercer had come back and said that there was
7 not a -- it did not fall under the -- the -- Can't think
8 of the word. That we weren't required to. That it wasn't
9 legally required. That we weren't being discriminatory by
10 not covering it, therefore there wasn't a requirement to
11 have to. Things evolved I think, as we saw from that
12 email that Marie sent, that HCC or HHS was trying to push
13 that that law was clarifying that it was discriminatory.
14 I think at the end of the day it was resolved that it was
15 a grey area and no one really had a clear answer on yes or
16 no. And we believed, since others were not, it wasn't
17 something that was a clear black-and-white we had to do
18 it.

19 Q. You say others were not. Do you mean other state
20 plans were not covering transgender benefits?

21 A. Correct. There were state plans out there not
22 covering it.

23 Q. Did Ms. Isaacson -- Let me rephrase.

24 In approaching this analysis where the first
25 question was, are we required to cover this or not, is

Kelly Sharritts - 04/22/2021

91

1 that approach unique to this exclusion?

2 A. No. Only in the sense that when other things
3 would come up, like dental plans and seeing your dentist
4 every six months, are you required to have that coverage
5 or not, it was more of what's required in the standard
6 treatment in the field. And we would get that advice from
7 UHC and Aetna and Blue Cross and the other health plans
8 and their physicians on what was typically required and
9 should be done and we should be doing. This was more
10 specific to is it discriminatory to not. And so, what is
11 our legal obligation on the discrimination front on
12 whether it's required for discrimination purposes?

13 Q. And when you say this decision on whether or not
14 to maintain the exclusion was more specific to whether it
15 was discriminatory or not, was that a unique approach in
16 deciding coverage?

17 A. Yes. In my time there.

18 Q. And why do you think there was such emphasis on
19 approaching this exclusion with the question of whether
20 ADOA was required to cover these benefits?

21 A. Because it was such a grey area and had such a --
22 I mean, it was a big topic in society at the time and it
23 was a big change to things. That before we just changed
24 something in the State plan and State tax dollars we
25 wanted to make sure it was fully understood and vetted.

Kelly Sharritts - 04/22/2021

149

1 they weren't proposed in the sense that they would have
2 any questions -- any reason to be illegal to change.

3 Q. When you say it was more of a question with
4 vision or dental on what you're supposed to cover, what do
5 you mean? Supposed to why?

6 A. How often are you supposed to get your eyes
7 checked? Once every year? Once every two years? How
8 often should you go to the dentist?

9 Q. And who was making recommendations on how often
10 you should get your eyes checked or --

11 A. The insurance providers would provide their
12 recommendation. They brought it up. And since it was
13 coming from them, I think there was no question on -- They
14 wouldn't be proposing something that would not be legal to
15 change, so there wasn't a need to question if it should
16 be.

17 Q. So if insurance providers that the ADOA reached
18 out to had recommended covering a benefit, would you
19 expect that the ADOA would cover that benefit?

20 MR. CURTIS: Objection; form of the
21 question.

22 THE WITNESS: I wouldn't expect that they
23 would cover the benefit. I would expect that they
24 wouldn't question the legality of that change to the plan.

25 Q. BY MS. SHEETS: When looking at whether a benefit

Kelly Sharritts - 04/22/2021

150

1 should or should not be covered, so that second question,
2 taking legality out of the picture, does the ADOA consider
3 the best interests of the patients in making that
4 decision?

5 A. I believe they did.

6 Q. Is it standard for them to take the benefits of
7 the patients into consideration?

8 A. I believe that was always a question of, why
9 would we want to cover it or not cover it? Is it giving
10 the proper care to the employee and their member?

11 Q. In the instance of 3D mammography were you -- or
12 the ADOA taking into account the best interests of the
13 patients who would be affected?

14 A. I believe so.

15 Q. Was the ADOA also taking into account costs of
16 what it would take to cover the 3D mammography?

17 A. I believe that it was a part of the discussion.
18 And the increased cost in the 3D compared to the decreased
19 cost of cancer treatment was a clear deciding factor.

20 Q. And when considering -- After it was decided that
21 it was a grey area or the ADOA was not legally required to
22 cover transgender benefits, did the ADOA consider the best
23 interests of the patient in making the decision to
24 maintain the exclusion on transgender surgery, hormone
25 therapy, and psychological therapy?

VIDEOTAPED VIDEOCONFERENCE DEPOSITION
OF CRAIG BROWN

BE IT REMEMBERED, the Deposition Under Oath of CRAIG BROWN was taken by MR. JORDAN C. WALL, Attorney at Law, for the Plaintiff, at the offices of Hazlett Reporting & Legal Video Services at 140 Second Avenue West, Suite B, Kalispell, Montana, on Tuesday, June 22, 2021, beginning at the hour of 9:35 A.M. Reported by Stacy M. Baldwin, Registered Merit Reporter and Notary Public.

1 don't. The state did not know how to do that, and that's
2 why I took the job.

3 Q When you say "the state," are you referring to
4 the State of Arizona?

5 A Yes, I am.

6 Q And when you say that's why you took the job,
7 are you referring to your role as the director of the
8 ADOA?

9 A That's correct.

10 Q So did you take that job specifically because
11 of -- do you believe you acquired that job specifically
12 because of your expertise with respect to obtaining
13 savings?

14 A No, I don't. I think I brought that as my want
15 to do to the list. They were looking for a senior
16 manager, someone with experience, broad experience, to
17 manage, you know, the eight areas, not just procurement,
18 and I think that's why I was hired. But I'm the one that
19 had the savings agenda, largely.

20 Q So, Mr. Brown, you said you had an agenda with
21 respect to savings when you came into the role as
22 director of the ADOA; is that right?

23 A That was my -- one of my two primary focuses of
24 coming in the state, was that, and the other one was
25 building -- getting people to move back to the state

1 office area. Because people were vacating buildings, and
2 it was rundown. The area of Arizona where the state
3 government resides, we wanted to move people back,
4 rebuild state government in that area. Those were my two
5 wanna-dos as I took the job.

6 Q And just so I'm clear, how would you describe
7 that first wanna-dos with respect to savings?

8 A The first one being the procurement one or the
9 building one? Sorry.

10 Q The procurement one.

11 A Okay. I believed that the state had a large
12 budget and was spending a lot of money, and they were.
13 But I wanted to implement strategy, which I had at least
14 28 years of experience with, of getting better cost
15 reductions so that the state could use that money for
16 other things, free up money and be more efficient. And
17 that was in more line very much so with Henry Darwin's
18 lean initiative, you know, he was all driving and stuff.

19 And so, for example, the state -- I couldn't
20 believe the State of Arizona owned 7,000 cars. You know,
21 why does a state of 35,000 employees need 7,000 cars?
22 Right? So, we questioned the number of cars. They would
23 buy them willy-nilly when they needed them, and we got
24 to buying them once a year in an auction. So, we
25 developed a strategy and we had, like, 20 percent

1 reduction in car costs, for example.

2 So that's my deal. That's what I do. And
3 that's what I was trying to implement at the state,
4 across various the categories.

5 Q So, you would describe yourself as an expert in
6 corporation procurement and supply chain experience to
7 small businesses and state government, correct?

8 A That's correct.

9 Q And you would say you're an expert at helping
10 small businesses and state government achieve lower costs
11 and higher value?

12 A Yeah, with the key caveat, if they want to do
13 it. And what I mean by that is, sometimes people act
14 like they want to do it, but it requires change. So,
15 back to that car example, no, you can't have that car.
16 We're not buying that model of car anymore. We're buying
17 something else. So, it does require the user to change
18 or give in to some of the things that they, you know, may
19 want to do, put more controls around them. So, they have
20 to play.

21 Q During your time as the director of the ADOA,
22 did you find that the State of Arizona wanted to achieve
23 lower costs and higher value?

24 A It was mixed between -- there was some 23
25 agencies, large and small, biggest one being, for

1 that in member benefits, but other than that, no.

2 Q So, Mr. Brown, do you know what the original
3 rationale for the exclusion of transsexual surgery was?

4 A I do not.

5 Q Did you and Ms. Isaacson ever discuss what the
6 rationale for that exclusion was?

7 A We did not.

8 Q Did Ms. Isaacson ever discuss with you the cost
9 rationale for such an exclusion?

10 A She did not.

11 Q What about a rationale that it was viewed as
12 cosmetic?

13 A I don't think we ever talked about how we got
14 there. I think she was talking about with the claim,
15 like, what to do, that's -- our conversations were more
16 in the current space, not how we got there.

17 Q So, in sum, you don't know why the plan
18 excluded coverage for transsexual surgery in 2015,
19 correct?

20 A Correct, I do not know.

21 Q Do you know why the plan excluded coverage for
22 transsexual surgery in 2016?

23 A Because it didn't change from the prior plan.

24 Q What is the ADOA's process for considering
25 changes to the plan's coverage of benefits?

1 A There's kind of a gathering of input from the
2 governor's office and the agencies about what they're
3 hearing, what people want, what the hot points are. And
4 then there's also looking at the market, the healthcare
5 providers, TPAs, what are the new offerings, what's out
6 there, whatever.

7 It all comes together and then benefit services
8 group determines what they would like to do and provide
9 that. And I think there might even be some surveys to
10 employees about, you know, we're looking at designing
11 this, what's in, what's out, what do you think. And then
12 they go through impact budgetary process, after they do
13 some work on the finances and say this is what it's going
14 to cost, if we implement this plan. Then they work the
15 budget angle, can we increase rates, member contribution
16 rates this amount, will JLBC give us the rest, you know.

17 So, once they kind of have all that together
18 they make a proposal and say this is the plan we want to
19 submit covering all those bases.

20 Q So, let's break that down a bit, Mr. Brown. To
21 start with, I believe you said that there's a gathering
22 from the governor's office and agencies about what
23 they're hearing and what people want, what the hot points
24 are, and is also looking to the market; is that right?

25 A Yes, about -- what TPAs are telling us, you

Elizabeth Schafer, Videotaped - 04/28/2021

53

1 A. It would have to -- It would depend on what do --
2 what kind of a benefit it is. Is it really going to help
3 very many people? Just because, you know, your market
4 research shows that everyone's covering something, that
5 you're not going to cover it unless there's a reason to
6 cover it.

7 Q. Okay. So just to be a little bit more specific,
8 so I have factors that ADOA considers when deciding
9 whether or not to cover something. So we have cost;
10 right? Is cost a factor in whether or not ADOA covers
11 something?

12 A. Yes.

13 Q. Is it fair to say that generally ADOA would tend
14 to cover things that are less expensive and be more
15 skeptical -- skeptical about covering benefits that are
16 more expensive?

17 A. Again, the Department of Administration's plan is
18 a very generous plan. So it's not -- it doesn't have huge
19 holes in it like some employer benefit plans do. So they
20 weren't always looking to just add coverages. I mean,
21 it's a very generous benefit plan.

22 Q. But cost is one of the factors?

23 A. Cost --

24 Q. It may not be the only factor but just to get all
25 the -- just to get -- I want to get the cost-benefit

Elizabeth Schafer, Videotaped - 04/28/2021

54

1 analysis on the table and understand how ADOA decides
2 whether or not to cover something.

3 So I understand that costs may not be the
4 only factor but I just want to understand, is it a factor
5 that ADOA considers when deciding whether or not to cover
6 something?

7 A. Yes.

8 Q. Okay. Other than cost I think you mentioned
9 trend. So ADOA wants to be competitive and if the trend
10 is there's a new benefit and other providers are starting
11 to cover that benefit, and the trend is to cover, in order
12 to be competitive, ADOA would at least consider the trend
13 of coverage; correct?

14 A. Yes.

15 Q. Okay. And I think you mentioned something about
16 the actual need. So another factor that ADOA would
17 consider would be whether or not the benefit was something
18 that actually benefited members of the plan; is that
19 right?

20 A. Sounds correct, yes.

21 Q. So in other words, ADOA would consider the
22 medical necessity of the proposed benefit.

23 MR. CURTIS: Objection; form of the
24 question.

25 MR. GARBACZ: You can answer, Ms. Schafer.

Elizabeth Schafer, Videotaped - 04/28/2021

55

1 THE WITNESS: Yes.

2 Q. BY MR. GARBACZ: Okay. So so far I have cost,
3 and I'm -- I'm generalizing but I'm trying to make sure I
4 have everything on the table here. So we have cost, we
5 have trend. So cost, ADOA covers things generally when
6 they are less expensive. Trend, ADOA covers things
7 generally when other providers are starting to cover that
8 benefit. We have medical necessity. Generally ADOA
9 covers things that are medically necessary. What other
10 factors would weigh into the equation?

11 A. The only thing I can think of is like return on
12 investment so that you can prove that, you know, covering
13 certain types of claims might ultimately -- but again,
14 that's cost.

15 Q. So for example, if you covered a specific benefit
16 and that covering that benefit prevented you from having
17 to cover other medical conditions down the line, you would
18 take that into consideration?

19 A. Correct.

20 Q. Okay. So I have cost, trend, medical necessity,
21 and return on investment. Other than those four factors,
22 in your 11 years of working at the ADOA can you think of
23 any other factors that ADOA would take into consideration
24 when deciding whether or not to cover a new proposed
25 benefit?

Elizabeth Schafer, Videotaped - 04/28/2021

83

1 Q. So sitting here today you do not know whether 3D
2 mammography was considered an expensive benefit to the
3 ADOA?

4 A. My assumption is it's probably more expensive
5 than a 2D, but I don't think it was hugely more expensive
6 but I do not know. I've never looked at the claim.

7 Q. So to your knowledge did cost weigh into the
8 decision-making at all?

9 A. Cost usually weighed into most decisions at ADOA.
10 So I would say it probably did.

11 Q. What about trend; was the trend to cover 3D
12 mammography?

13 A. It was becoming more common in the industry, yes.

14 Q. And do you think that that might have had an
15 influence on the ADOA's decision?

16 A. Possibly, yes.

17 Q. But you're not sure?

18 A. No.

19 Q. Okay. Medical necessity; do you think or is it
20 your understanding that a 3D mammography can be medically
21 necessary?

22 A. Yes.

23 Q. And did the fact that a 3D mammography can be
24 medically necessary weigh into the decision-making, to
25 your knowledge?

Elizabeth Schafer, Videotaped - 04/28/2021

101

1 was considering changes in -- in the plan that would
2 affect drugs?

3 A. Yeah.

4 Q. Can you think of any other instances where the
5 ADOA reached out to MedImpact regarding a change to the
6 plan?

7 A. Not specifically. I know we did it.

8 Q. Okay. If you look at the -- the email from you
9 to Erin Russell, so the second email down, you are
10 reaching out to MedImpact for information and then in the
11 last sentence you say [as read]: Do you have any idea of
12 potential costs to a plan for making any necessary
13 changes?

14 Do you see that?

15 A. I do.

16 Q. Why were you reaching out about cost?

17 A. Because every change pretty much has to have a
18 cost analysis done.

19 Q. Would you say that was standard procedure to have
20 a cost analysis done?

21 A. Well, for most changes. I mean, there are some
22 changes you have to make because, you know, we still had
23 to do a cost analysis. I mean, the change that I always
24 think of is covering children to the age of 26. So we had
25 no choice but we had to add them. But, yeah, somebody had

Elizabeth Schafer, Videotaped - 04/28/2021

102

1 to calculate how much was that going to cost the plan a
2 year.

3 Q. So you had no choice to cover -- what -- What was
4 it exactly that you had no choice?

5 A. When the ACA passed and they added coverage till
6 you were the age of 26 for dependents.

7 Q. So you had to cover that as part of the ACA?

8 A. Correct.

9 Q. But you still did a cost analysis?

10 A. I can't swear on a Bible but I'm pretty sure --
11 Yes. I -- No, actually I can. I know we knew how much
12 that was going to cost the plan.

13 Q. And the purpose of that cost analysis was not to
14 figure out whether or not you were going to cover the
15 benefit, because you had to cover the benefit; right?

16 A. Correct.

17 Q. So the reason you did the -- the reason ADOA did
18 the cost analysis was to understand what the cost
19 implications would be for this new benefit that it was
20 required to cover.

21 A. Right. And we would have to make a determination
22 on like, do we need to increase premiums?

23 Q. So ADOA did a cost analysis with respect to
24 transgender reassignment; is that right?

25 A. Yes.

Elizabeth Schafer, Videotaped - 04/28/2021

181

1 A. I don't remember.

2 Q. Did Kelly Sharritts ever express any views as to
3 whether gender reassignment surgery should be covered
4 under the plan?

5 A. Not that I remember.

6 Q. Did Kelly Sharritts ever express any views about
7 transgender individuals generally?

8 A. Not that I remember.

9 Q. Let's go to Marie Isaacson. Do you ever remember
10 Marie Isaacson expressing any political views in your time
11 at the ADOA?

12 A. No.

13 Q. Do you remember Ms. Isaacson ever expressing any
14 personal or political views about whether transgender
15 benefits should be covered?

16 A. No.

17 Q. Do you remember Ms. Isaacson ever expressing any
18 personal or political views about transgender individuals
19 in general?

20 A. No.

21 Q. If you had to guess would you say that
22 Ms. Isaacson was politically liberal? Yes or no?

23 MR. CURTIS: Objection; form of the
24 question.

25 THE WITNESS: I know her husband is a

Elizabeth Schafer, Videotaped - 04/28/2021

184

1 A. Based on discussions we had.

2 Q. What specifically about those discussions made
3 you think he was conservative?

4 A. I -- I just remember a conversation where NPR he
5 told me was a liberal media organization.

6 Q. Okay. And other than this comment about NPR, was
7 there any other reason why you think Mr. Meisner was
8 conservative?

9 A. I can't remember any specifics.

10 Q. Did Mr. Meisner ever express any political
11 views -- any personal or political views about whether
12 transgender benefits should be covered?

13 A. No.

14 Q. Did he ever express any views about the cost of
15 them?

16 A. No.

17 Q. So in your knowledge -- to your knowledge,
18 Mr. Meisner never expressed any opinion one way or another
19 about gender reassignment surgery?

20 A. Correct.

21 Q. Okay. Let's go to Scott Bender. Did Mr. Bender
22 ever express any political views in your time of knowing
23 him either at the ADOA or outside of the ADOA?

24 A. I don't remember him having any political
25 conversation.

Elizabeth Schafer, Videotaped - 04/28/2021

185

1 Q. And do you remember him ever having or expressing
2 an opinion about transgender benefits?

3 A. No.

4 Q. You never remember him ever expressing an opinion
5 one way or another about whether gender reassignment
6 surgery should be covered?

7 A. Correct.

8 Q. Let's go to Yvette Medina. Did Yvette Medina
9 ever express any political views in your time of knowing
10 her?

11 A. Yes.

12 Q. I'm sorry?

13 A. Yes.

14 Q. And what were those views?

15 A. We worked together for ten years, so you're
16 talking about a myriad of different topics. Just whatever
17 happens to be in the news that day.

18 Q. Did you get the sense that Ms. Medina was
19 conservative?

20 A. She's tricky. She's very middle of the road.

21 Q. When it came to social issues was Ms. Medina more
22 conservative or more liberal?

23 A. You know, she was -- you can't peg that down.

24 Q. Did she, and by she I mean Yvette Medina, ever
25 express any personal or political views about transgender

Elizabeth Schafer, Videotaped - 04/28/2021

186

1 benefits?

2 A. No.

3 Q. Did Ms. Medina ever express a view one way or
4 another regarding whether gender reassignment surgery
5 should be covered under the plan?

6 A. No.

7 Q. Let's talk about the governor's office. In your
8 view is the Arizona governor's office generally
9 conservative or liberal?

10 MR. CURTIS: Objection; form of the
11 question.

12 THE WITNESS: They are -- What was the exact
13 wording you used?

14 Q. BY MR. GARBACZ: Sorry. Let me rephrase.

15 Is the Arizona governor's office
16 conservative in your view?

17 A. Yes.

18 MR. CURTIS: Objection; form of the
19 question.

20 THE WITNESS: Yes.

21 Q. BY MR. GARBACZ: And why do you say that?

22 A. Because of the environment we live in today.

23 Q. Would you say that Arizona governor's office is
24 conservative when it comes to social issues?

25 A. I'd say they're conservative no matter what the

Elizabeth Schafer, Videotaped - 04/28/2021

209

1 it from their plans, they are removing it from their fully
2 insured plans?

3 A. Correct.

4 Q. We talked quite a bit about medical necessity.
5 What's -- If someone just asks you if something is
6 medically necessary, what -- what does that mean to you as
7 someone who's worked in employee benefits?

8 A. I -- Personally I am thankful it's not my
9 decision to make usually. And that's another thing we
10 need the medical plans for, is to determine the
11 appropriate procedures for treatment of certain things,
12 diseases and such.

13 Q. Okay. I guess in one context if I go to a doctor
14 who says it's required for you to have this surgery, I
15 suppose you could say that that doctor told me it's
16 medically necessary; correct?

17 A. Correct.

18 Q. But then in a plan is -- is that what medical
19 necessity means or does medical necessity mean something
20 else in a plan?

21 A. Yeah, that -- they it would not meet the
22 definition of being medically necessary just because a
23 doctor says you need to do something.

24 Q. Okay. And -- and why is that?

25 A. Because doctors don't always have the same ideas

Elizabeth Schafer, Videotaped - 04/28/2021

210

1 on the treatment of diseases and treatments, and sometimes
2 their motivation is selfish and they want you to like get
3 a surgery for your back because that will reward them, not
4 necessarily make it so you can walk better.

5 Q. Okay. Well, what -- what if, for example, I go
6 to the doctor and he tells me that I have high cholesterol
7 and that I need to take medication and he tells me that I
8 need some name-brand prescription? Is that medically
9 necessary because the doctor tells me so?

10 A. No.

11 Q. And you were talking before that maybe just
12 because a doctor says so, it's not medically necessary
13 under the plan. Is that correct?

14 A. Correct.

15 Q. What if the plan comes to me and says, okay, we
16 see that you have high cholesterol and that you need
17 medication. Here is an equally effective generic that's
18 much -- much cheaper? Could a plan tell me that?

19 A. Yes.

20 Q. Okay. And so by the plan standards the
21 name-brand prescription for cholesterol would not be
22 medically necessary?

23 A. Correct.

24 Q. Because there's another -- another treatment that
25 would address the -- the circumstance?

Elizabeth Schafer, Videotaped - 04/28/2021

215

1 right?

2 A. No, I do not.

3 Q. Okay. The -- the -- the last set of questions I
4 had is, I believe you testified earlier that since you
5 left ADOA you've remained in some contact with Michael
6 Meisner. Is that right?

7 A. I -- I have contacted him a couple times.

8 Q. Have you ever talked with him about this case?

9 A. Never.

10 MR. YOST: That's all the questions I have.

11 MR. GARBACZ: I just have a few follow-up
12 questions, so we'll keep this pretty brief.

13

14 FURTHER EXAMINATION

15 BY MR. GARBACZ:

16 Q. Ms. Schafer, you're not a medical expert, are
17 you?

18 A. No, I am not.

19 Q. And you're not an expert on what is considered
20 medically necessary, are you?

21 A. No, I am not.

22 Q. And when it comes to what is medically necessary
23 for purposes of the ADOA's healthcare plan, the best place
24 to look is probably the plan document itself which defines
25 medically necessary; right?

Elizabeth Schafer, Videotaped - 04/28/2021

216

1 A. Not necessarily.

2 Q. And why is that?

3 A. Because medically necessary, there are -- there
4 are guidelines that -- that all plans have to follow for
5 every single condition that's out there in the world.
6 There are medical procedures and guidelines that these
7 companies have to follow. And because I've been out of
8 this for a couple years I don't remember what those set of
9 rules are. But every -- You know, whether you twist an
10 ankle or you have -- you know, you have ovarian cancer,
11 everything has a list of medically appropriate procedures
12 that -- and that's why you would only contract with a
13 vendor that agrees to administer their medical decisions
14 based on these -- these criteria.

15 Q. So it's generally the vendor, the third-party
16 administrator who determines what is medically necessary?

17 A. Well, it's actually a -- it's not the vendor
18 themselves in most cases, it's -- And I'm sorry, I feel
19 like I haven't done my homework for this assignment. But
20 there are -- there are rules out there and I want to --
21 and I can't remember what they're called. But they are
22 basic guidelines for disease management and they -- they
23 usually all follow the basic criteria. There might be
24 small tweaks, but for the most part that's what you're --
25 you know, that's the expertise you're paying for.

1 know, too, if we're covering something and there are some
2 changes, they would tell us. Like, our vendors are very
3 good about letting us know what is happening in the
4 industry as far as coverage is concerned.

11:38:22 5 Q. You mentioned that the vendors who, it sounds
6 like, are very on it would mention to you, especially if
7 you were not in line or -- excuse me, especially if you
8 were not covering a certain benefit that was being
9 covered by others. Why would that be?

11:38:45 10 A. As -- just as a general information, because we
11 are -- because we are self-funded. If they're covering
12 something, that doesn't necessarily mean we have to cover
13 it, but we do look for their guidance on that, just to
14 let us know.

11:39:02 15 Q. When you say you look for their guidance on
16 that, what do you mean?

17 A. You know, if there's changes that are happening
18 to coverages, they would at least tell us. And, you
19 know, you showed the change log, that's where they would
11:39:22 20 kind of let us know when there's something happening on
21 their end that they would normally do, or even a process,
22 not even necessarily a benefit coverage; if there's
23 something that's happening in the market that they
24 normally do, they inform us to help us, you know, make
11:39:37 25 better decisions and knowing whether we are going to

Yvette Medina, Videotaped - 02/18/2021

85

1 follow.

2 Q. When vendors raise this type of issue where
3 there's a benefit that is largely covered, but it's not
4 yet covered under your plan, how is that usually
11:40:10 5 resolved?

6 A. Usually we will take that into concern --
7 consideration and, actually, it depends, really, on -- we
8 take the information and we ask -- if one vendor just
9 tells us something, then we ask all four of ours to see
11:40:34 10 if it is truly across the board on coverage. So, you
11 know, if one vendor came to us and said, "We are covering
12 this," and the other three are not, we try and figure out
13 why aren't the other three, and why is only one vendor
14 covering it, and then we will just take everybody's
11:40:53 15 coverage guidelines and policies and review them to make
16 sure that -- why is one person an outlier.

17 So we don't want to be -- you know, not that we
18 don't want to be an outlier, but we don't want to cover
19 something if not everybody is covering it, or it could be
11:41:10 20 that we might cover something. So we just take their
21 recommendations and review them, but that doesn't
22 necessarily mean that we are going to follow their
23 recommendation.

24 Q. That makes sense. So if there's an instance
11:41:28 25 where all four did cover something that was not currently

Yvette Medina, Videotaped - 02/18/2021

119

1 specifics, the plans you used when they're thinking about
2 covering transgender reassignment surgery, and I want to
3 take a step back and talk about the evolution of the
4 transgender surgery exclusion over the course of your
01:41:21 5 time at ADOA.

6 So in 2015, around the time of the e-mails that
7 we were looking at, Exhibit 2, September of 2015, was
8 that the first time that it came to your attention that
9 the transgender exclusion might be removed from the plan?

01:42:03 10 A. That was the first time that we had to do
11 research on transgender -- it wasn't to exclude something
12 from the plan, it was to do the research on it.

13 Q. And the first time that you remembered doing
14 research on the transgender benefits portion of the plan
01:42:30 15 was around 2015; is that right?

16 A. Right.

17 Q. And when you sent out these e-mails to vendors
18 asking what their coverage was going to be, what
19 responses did you get back from those vendors?

01:42:56 20 A. I would say they were -- they responded in
21 letting me know whether it's covered on their end and how
22 their book of -- book of business, meaning other
23 companies were, what decided whether they were going to
24 cover it. And from what I remember, that it was not a
01:43:21 25 standard coverage at that time.

Yvette Medina, Videotaped - 02/18/2021

120

1 Q. So at that time, around 2015, from the
2 responses you received from vendors, it didn't seem like
3 it was standard to cover transgender surgery?

4 A. Right.

01:43:42 5 Q. Who did you report that information to at the
6 ADOA?

7 A. That would have been reported to
8 Marie (inaudible) --

9 THE REPORTER: I'm sorry, who?

01:44:14 10 THE WITNESS: Marie Isaacson. Sorry.

11 BY MS. SHEETS:

12 Q. At the time, she was the director of BSD for
13 ADOA?

14 A. Yes.

01:44:21 15 Q. And why would you be reporting that information
16 to her?

17 A. We shared the information with the director at
18 the time that we know, especially if we're doing
19 research.

01:44:46 20 Q. Do you know -- let me rephrase.

21 What was Marie Isaacson's reaction to the
22 information that most vendors were reporting not
23 including coverage for transgender surgery?

24 A. A reaction? I don't know her reaction, but she
01:45:16 25 just, I guess, would -- I don't know what you mean by her

FOREWARD

The Arizona Department of Administration (“ADOA”) offers health, dental, life, and disability insurance as well as medical and dependent care flexible spending accounts to the State of Arizona (“State”) employees and Retirees. These combined group of benefits offered is referred to as Benefit Options. This report provides a broad overview of the Benefit Options program, and meets the requirements of the A.R.S. §38-652 (G) and A.R.S. §38-658 (B).

The data shown is presented for the period January 1, 2016 through December 31, 2016. The Active and Retiree plans were concurrent for this period.

Any questions relating to the contents of this report should be addressed to:

Report Background

This document reports the financial status of the Employee Health Insurance Trust Fund pursuant to A.R.S. §38-652 (G), which reads:

The department of administration shall annually report the financial status of the trust account to officers and employees who have paid premiums under one of the insurance plans from which monies were received for deposit in the trust account since the inception of the health and accident coverage program or since submission of the last such report, whichever is later.

The Annual Report also reports the performance standards for the health plans pursuant to A.R.S. §38-658 (B), which reads:

On or before October 1 of each year, the director of the department of administration shall report to the joint legislative budget committee on the performance standards of health plans, including indemnity health insurance, hospital and medical service plans, dental plans and health maintenance organizations.

Benefit Services Division accounts for the Benefit Options program in two different funds. The Special Employee Health Fund, also known as Fund 3015 of the Health Insurance Trust Fund (“HITF”) encompasses the medical and dental programs and the appropriated expenditures for ADOA, Benefit Services Division operations. The ERE/Benefits Administration Fund, of Fund 3035, is primarily a “pass through” fund for other benefits including, vision, life, and disability insurance as well as flexible spending accounts.

The benefits offered are either self-insured or fully-insured. For year 2016, the medical and dental PPO plans were self-insured, whereas the dental HMO, vision, life and disability insurance plans were fully-insured.

The State’s self-insured medical plan began on October 1, 2004. The State contracts with the medical and pharmacy vendors to provide network access and related discounts, claim adjudication and payment, and medical management including utilization management, case management and disease management. The State is responsible for the full cost of all claims and programs offered by the vendors.

The State’s self-insured dental PPO began on January 1, 2013.

Schedules of premiums received and accounted for in Fund 3015, distributions by enrollments, incurred and paid medical/drug claims, and expenses related to the medical and dental plans are included within this Annual Report. Also included is a summary of premiums collected and paid for the life insurance, disability insurance, vision insurance, and flexible spending accounts for Fund 3035.

quick

All data provided herein is for Plan Year (“PY”) 2016 running January 1, 2016 through December 31, 2016.

Please note statistics will vary from previous annual reports due to the late receipt of program data following the completion of the previous annual report. Further, the Benefit Services Division has moved to using a new data-mining platform called MedInsight to extract the data which further explains some of the variances in reported statistics. In no case does the variation represent a substantive change in trend.

Executive Summary

During PY 2016, ADOA offered a comprehensive insurance package through Benefit Options to approximately 134,000 members consisting of Active state and university employees, Retirees and their qualified dependents. The benefits offered in the package include medical, pharmaceutical, dental, flexible spending, vision, wellness, an employee assistance program (EAP), life and disability insurance.

For PY 2016 the sum of health and dental premiums collected was \$804M with total plan expenses and transfers of \$893.3M. Expenses include claims incurred in 2016 and prior plan years paid in PY 2016.

Health Plan

- The average annual plan expense, including claims, administrative costs and fees, per member was \$6,255
 - Average Active member expense was \$6,051; average Retiree member expense was \$8,958
- The medical claims expense was \$547.4M, excluding IBNR liability
 - The leading diagnosis category by cost remains to be the musculoskeletal system at 13% of total medical spend
 - Claims indicate that members are seeking appropriate level of care by seeking the majority of care from physicians or specialists
 - 4,059 physician visits per 1,000 members (slightly lower than prior years)
 - 209 urgent care visits per 1,000 members (slightly lower than prior years)
 - 215 emergency room visits per 1,000 members (slightly higher than prior years)
- The pharmacy claims expense was \$181.8M
 - The leading therapeutic drug class by cost was diabetes at 12% of total pharmaceutical spend
 - Over 1.4M prescriptions were filled in PY 2016
 - Active employees filled an average of 9 prescriptions per year while Retirees filled an average of 29

Wellness Program

- Administered over 14,842 flu vaccines through 405 worksite or public events
- Administered over 7,871 screenings through 89 statewide worksite events resulting in 517 referrals to physicians for various health issues, which is a 34% increase in referrals over the prior year
- Paid out over \$400k in incentive pay to 2,039 employees participating in the HIP program

Performance Measures

Financial guarantees are in place to manage the performance of the contracted vendors. Most vendors met the majority or all of the agreed-upon performance measures. However, estimated penalties of approximately \$360K will be collected in PY 2017 from vendors failing to meet agreed upon PY 2016 performance targets in customer service, claims processing, appeals, reporting,

survey, and network management. During PY 2016, \$385K of performance penalties were collected related to the PY 2015 performance period.

Health Insurance Trust Fund Review & Summary

PY 2016 expenses were covered by revenues collected and the unrestricted reserve.

Figure 1 is a cash statement of receipts received and expenses paid during PY 2016 that relate to PY 2016 as well as prior plan years.

ADOA Health Plan is the self-insured medical program and includes Aetna, Blue Cross Blue Shield (“BCBS”) of Arizona, Cigna, and United Healthcare (UHC) networks. State and university Active employees and Retirees choose coverage from one of the self-insured networks. BCBS NAU is a fully-insured option available only to NAU Active employees and Retirees.

Effective January 1, 2014, all Medicare eligible participants covered under the State of Arizona Benefit Services Division health plans were transitioned from the Medicare Part D Drug Subsidy program to a Medicare Employer Group Prescription Drug Plan (“EGWP”). The EGWP program is a prescription drug plan that combines a standard Medicare Part D plan with additional

Figure 1: Health Insurance Trust Fund Summary

prescription drug coverage provided by the Benefit Services Division health plan. The EGWP program achieved savings of \$11.5M in PY 2016.

Benefit Services Division holds reserves for paying claims that have been incurred but not reported (“IBNR”) and for a contingency to cover any insufficiencies that may develop, such as actual medical trend exceeding assumed medical trend during rate setting, unplanned shifts in plan membership, unexpected catastrophic claims, and changes in provider reimbursement rates that may occur during each plan year.

Medical Plan Enrollment

Benefits Services Division offers medical coverage to the following employees and their dependents:

- Eligible state employees and university staff, officers, and elected officials
- State Retirees receiving pension benefits through any of the State retirement systems
- State employees or university staff accepted for long-term disability benefits
- State employees or university staff eligible for COBRA benefits

The three types of medical plans offered to eligible participants are the Exclusive Provider Organization (EPO), the Preferred Provider Organization (PPO) and the High Deductible Health Plan (HDHP) with Health Savings Account (HSA).

The EPO Plan

Within the EPO plan, services must be obtained from an in-network provider; out-of-network services are only covered in emergency situations. The employee pays the monthly premium and any required copay at the time of service. Employees who select the EPO plan may choose from four networks: Aetna, BCBS of Arizona, Cigna or UHC.

The PPO Plan

Within the PPO plan, services may be obtained from an in- or out-of-network provider. There is a separate in- and out-of-network deductible that must be met before copays or coinsurance (percent of the cost) are allowed. The employee pays the monthly premium and at the time of service pays 100% of the allowed amount of service until the deductible is met. After the deductible is met, the employee pays copays if the provider is in-network and co-insurance if the provider is out-of-network until the out of pocket maximum (OOP) is met. Once the OOP is met the plan pays 100% of services for the remaining plan year, with a few exceptions, e.g. pharmacy copays. Employees who select the PPO plan may choose from four networks: Aetna, BCBS of Arizona, Cigna or UHC. Employees at NAU also have the option of participating in their fully-insured BCBS NAU plan.

The HDHP with HSA Plan

Within the HDHP, services may be obtained from both in- and out-of-network providers. There is a separate in- and out-of-network deductible that must be met before coinsurance is allowed. The employee pays the monthly premium and at the time of service pays 100% of the allowed amount of service (except for qualified preventative services that are covered 100% by the plan) until the deductible is met. After the deductible is met, the employee pays co-insurance up to the out of pocket maximum at which time the plan pays 100% of any additional costs for the year.

Employees who enroll in the HDHP and are under the age of 65 are eligible to open an HSA. This account allows employees to make pre-tax contributions into the account and withdraw the monies to pay for healthcare related expenses. When the employee opens the HSA with the State HDHP, the State makes bi-weekly deposits to the account.

The HDHP is only available to Active employees and under the Aetna network.

The figure below shows how enrollment was distributed by plan and network between active, retired, university, and COBRA members. The subscriber references the employee and the member references the employee plus dependents.

Figure 2: Average Monthly Enrollment by Plan & Network

Medical Premiums

The tables below show the medical premium by plan and coverage tier per pay period for Active employees and Retirees. Retirees have two different tier structures: 1) those who are not enrolled in Medicare and have no dependents enrolled in Medicare and 2) those who either are enrolled in Medicare themselves or have a dependent who is enrolled in Medicare.

Active Medical Premiums per Pay Period (26 pay periods)*					
Plan	Tier	Employee Premium	State Premium	Total Premium	State HSA Contribution
EPO	Employee only	\$18.46	\$253.85	\$272.31	-
	Employee + adult	\$54.92	\$521.54	\$576.46	-
	Employee + child	\$46.62	\$338.77	\$385.38	-
	Family	\$102.00	\$571.38	\$673.38	-
PPO	Employee only	\$47.08	\$258.00	\$305.08	-
	Employee + adult	\$99.23	\$545.54	\$644.77	-
	Employee + child	\$66.46	\$365.08	\$431.54	-
	Family	\$115.85	\$636.46	\$752.31	-
HDHP	Employee only	\$9.23	\$171.69	\$180.92	\$27.69
	Employee + adult	\$27.69	\$355.85	\$383.54	\$55.38

	Retiree +1	\$2,009	Retiree +1 (Both Medicare)	\$1,576
			Retiree +1 (One Medicare)	\$1,740
	Family	\$2,197	Family (Two Medicare)	\$1,980

Figure 4: Retiree Medical Premiums

Medical Premium vs. Plan Cost

The 2016 contribution strategy for the self-insured medical plan resulted in employees paying 12% of the average monthly premium while the state paid the remaining 88%. This ratio remains unchanged from PY 2015. The overall premium revenue collected was not sufficient to cover expenses in PY 2016 and the fund was not structurally balanced. However, the fund had sufficient carry-over balance from prior years to cover all expenses in the fund in PY 2016.

The figure below shows how the average monthly premium compared to the average monthly plan cost for Active employees and Retirees and their dependents (Active and Retiree members). Pursuant to A.R.S. §38.651.01 (B), Retiree and Active medical expenses shall be grouped together to “obtain health and accident coverage at favorable rates.” This requirement results in lower Retiree premiums and higher active premiums than what their experiences would otherwise dictate.

Figure 5: Average Monthly Medical Premium vs Expense

Expenses for Self-Insured Medical Plans

The figures below show the distribution of claims and expenses incurred in PY 2016 and the average annual cost to insure each type of subscriber/member.

2016 Incurred and Paid Self-funded Medical Expenses by Active, Retiree, and Plan						
Expenses	Overall	Active	Retiree	EPO	PPO	HDHP
Medical Claims	\$547,440,001	\$503,423,754	\$44,016,247	\$503,886,978	\$39,503,952	\$4,049,071

Figure 7: Self-Insured Expenses by Plan for Actives and Retirees

Medical Expenses Associated with Medical Diagnoses

The tables below show the trend in cost by diagnosis for Actives and Retirees. For Actives, the first five categories make up approximately 45.0% (\$264.2M) of the total PY 2016 medical spend. Further, the top five medical categories for Actives have decreased by 2.7% (\$7M) since PY 2015.

Circulatory diagnosis group has experienced the largest percentage growth for the Active population in PY 2016 over PY 2015 with 14.1% increase while the Neoplasms treatment group has experienced the largest drop from PY 2015 to PY 2016 of 9.6% in the top ten categories.

For Retirees, spending on the top five categories has increased in PY 2016 over PY 2015 by 11.84% (\$2.7M). Thus, the increase in Retiree spend is increasing the amount that the Active employees subsidize the Retiree premiums. The top five categories make up approximately 48.6% (\$25.1M) of the total PY 2016 Retiree medical spend. Musculoskeletal System/Connective Tissue treatment group continues as the largest spend category for both the Active and Retiree populations. The highest percentage growth for the Retiree population can be seen in the Nervous System and Sensory Organs diagnosis group with a 70.4% increase in expenditures in PY 2016 over PY 2015.

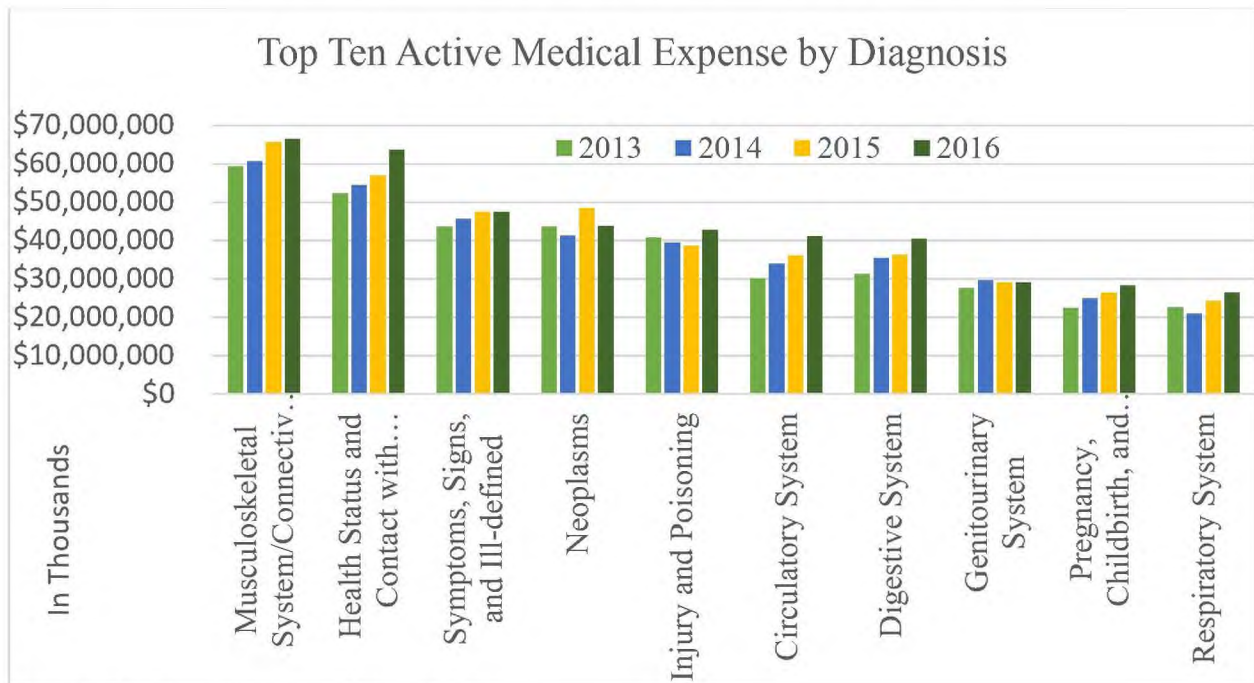

Figure 8: Top Ten Active Medical Expense by Diagnosis

Figure 9: Top Ten Retiree Medical Expense by Diagnosis

Hospital Care

Inpatient hospital care represents a significant portion of total medical expenses. The tables below show the Hospital Admissions per 1,000 members and average length of stay. Retirees are admitted more often and longer than active employees which is in line with their higher overall costs. When comparing plans, PPO members are admitted more often than EPO members which are admitted more often than HDHP members. This is all in line with the average costs of these members in each plan. The length of stay is similar between the EPO and PPO, however, the active employees in the HDHP tend to have a shorter length of stay.

The number of hospital admissions is holding steady; however, the length of stay has seen a slight increase.

Figure 10: Hospital Admissions per 1,000 Members

The tables below represent the PY 2016 cost share of the inpatient stays.

Figure 11: Average Inpatient Length of Stay

There is greater cost sharing with the Retirees because approximately two-thirds of Retirees have Medicare paying as primary for their claims. Overall, the Plan paid approximately 98% (\$136.9M of \$139.6M total) of Active in-patient costs and 15% (\$10.1M of \$66.2M total) of Retiree in-patient costs during 2016. This cost sharing experience has been about the same over the last four years. The chart below indicates that retirees cost slightly less than actives, however, the cost per admission does include the cost of skilled nursing facilities. Retirees more often than not require additional medical care following hospital admission and therefore cost more on a per member per month basis. Retirees' greater utilization of skilled nursing facilities drives down the average cost per hospital admission. However, on a per member per month basis, allowed hospital costs for retirees are substantially higher than for actives.

Figure 12: Average Cost per Admission - Active & Retiree

* Includes copay, co-insurance, Medicare, and other insurance

Figure 13: Allowed PMPM Per Hospital Admission - Active & Retiree

* Includes copay, co-insurance, Medicare, and other insurance

When looking at the cost by plan, there is greater cost share for the EPO and PPO than the HDHP due to Retirees in the EPO and PPO plans utilizing Medicare as the primary payer and not eligible for the HDHP. Overall, the Plan paid approximately 87% (\$135.3M of \$155.1M total) of EPO, 87% (\$10.5M of \$12.0M total) of PPO and 95% (\$1.2M of \$1.3M total) of HDHP inpatient costs during PY 2016 which is consistent with the prior three years network claims.

Figure 14: Average Cost per Admission - EPO, PPO, & HDHP

* Includes copay, co-insurance, Medicare, and other insurance

Place of Service

The figures below show the total cost by place of care for Active and Retirees over the past three years. Increasing medical costs consistent with the industry trend as well as a slight increase in both Active and Retiree membership are the main causes of the increase in costs for most service settings.

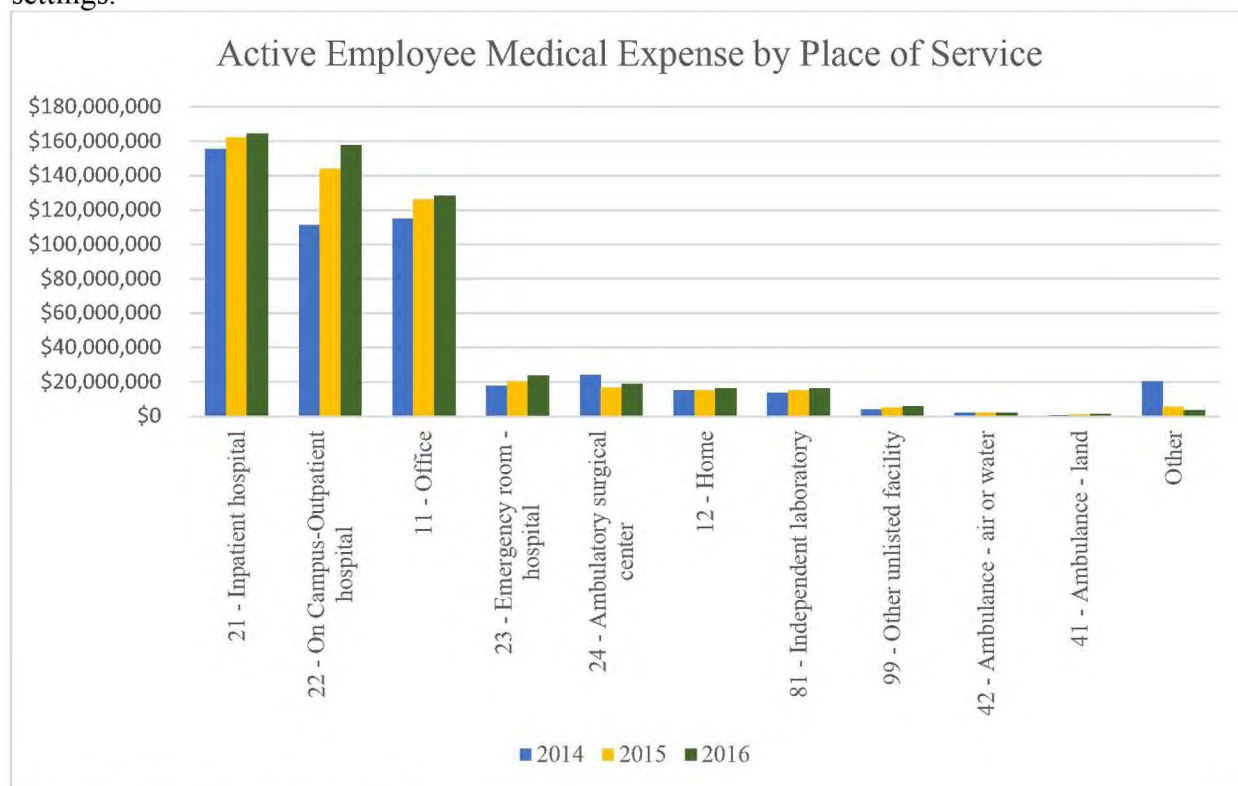

Figure 15: Medical Expense by Place of Service – Actives

Figure 16: Medical Expense by Place of Service - Retirees

Emergency

During PY 2016 there were approximately 215 emergency room visits per 1,000 members of the self-funded plan. The average plan cost per visit was \$1,224 (inclusive of both facility and professional costs). This is consistent with the prior two years ranging between 217 and 219 in utilization and between \$1,147 and \$1,161 in costs.

Urgent Care Visits

During PY 2016 there were approximately 209 urgent care visits per 1,000 members of the self-funded plan. The average plan costs per urgent care visit was \$117. Utilization has increased from 181 in 2014 to 203 in 2015 and then to 209 in 2016. Costs have increased from \$112 in PY 2014 to \$117 in PY 2016.

Physician Visits

During PY 2016 there were approximately 4,059 physician visits per 1,000 members of the self-funded plan (or each member of the plan visited a physician's office approximately four times on average). The average plan costs per office visit in PY 2016 was \$99. Utilization is slightly higher than the prior two years ranging from 3,952 in PY 2014 to 3,956 in PY 2015. Costs have increased over the last three years from \$94 in PY 2014, to \$95 in PY 2015 and to \$99 in PY 2016.

Annual Prescription Use

The table below show the average number of prescriptions filled by Active and Retiree members, including those that did not utilize the pharmacy benefit at all during the year. This shows a slight positive downward trend for the retiree population; meaning as new people are coming on the plan, they are utilizing the pharmacy benefit at a lower rate than those already on the plan. The Active population’s utilization has been steady between PY 2014 and PY 2016 at an average of 9.4 filled prescriptions per year.

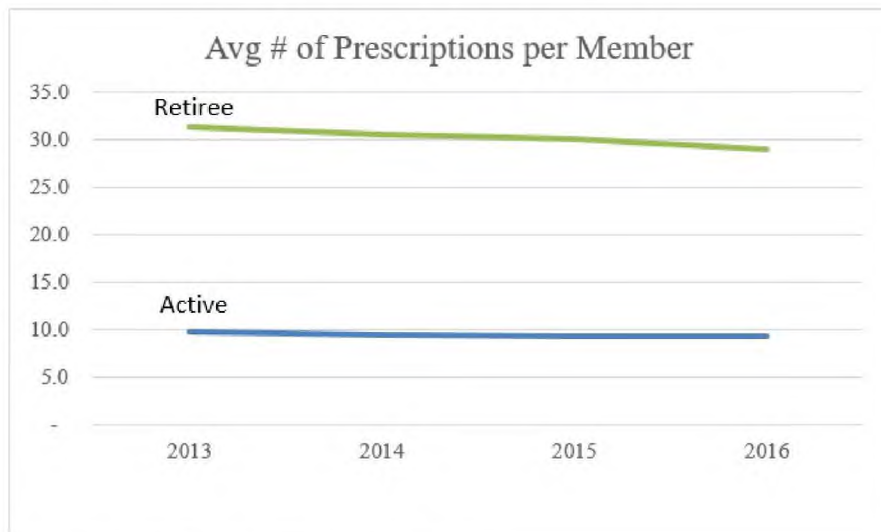

Figure 17: Average # of Prescriptions by Member

When examining the utilization of the pharmacy benefit, it shows those utilizing the pharmacy benefit are overall maintaining or even decreasing the number of prescriptions filled but the cost per utilizing member is steadily increasing. This indicates an increasing overall cost in the pharmacy benefit.

Figure 18: Pharmacy Cost and Count by Utilizer

Generic and Brand-Name Prescription Utilization

The table below shows a positive trend in the utilization of the lower cost drugs. Generic drugs tend to have the lower overall cost to the plan, preferred have a higher cost to the plan and non-preferred tend to have the highest cost to the plan. The trend shown below indicates a slight increase in the utilization of the generic drugs with a slight decrease in preferred and non-preferred drugs and that generic drugs make up an increasing count of total drugs (just under 83% in PY 2016).

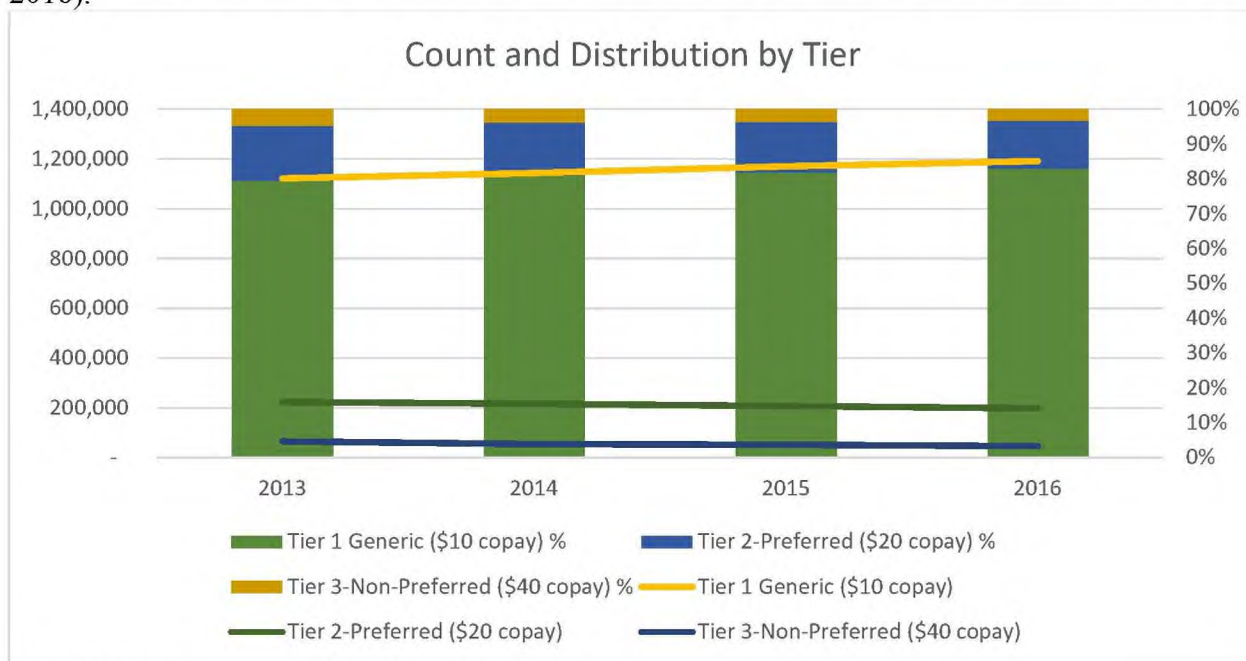

Figure 19: Pharmacy Count and Distribution by Tier

Prescription Use by Therapeutic Class

The graph below shows spend by therapeutic class by year. In over half of top ten classes, expenses have increased which is driving the overall increase in pharmaceutical spend. The top ten classes make up approximately 53.3% (\$96.9M) of the total spend (\$181.8M) in PY 2016 which is slightly up from 51.8% in PY 2015. Diabetes and inflammatory disease appear to be the highest cost drivers.

Figure 20: Spend by Top 10 Therapeutic Class by Year

Prescription Use by Type of Drug

The graph below shows spend for top ten drug by year. In almost all of the top ten drugs, expenses have increased which is driving the overall increase in pharmaceutical spend. The top ten drugs make up approximately 15.4% (\$28M) of the total \$181.8M drug spend in PY 2016 which is slightly up from the prior year of 14.8%. The top two drugs in 2016 are Humira Pen and Enbrel (both are drugs used to treat inflammation). The top three drugs make up more than half (\$14.7M) of the spend for the top ten drugs (\$28M).

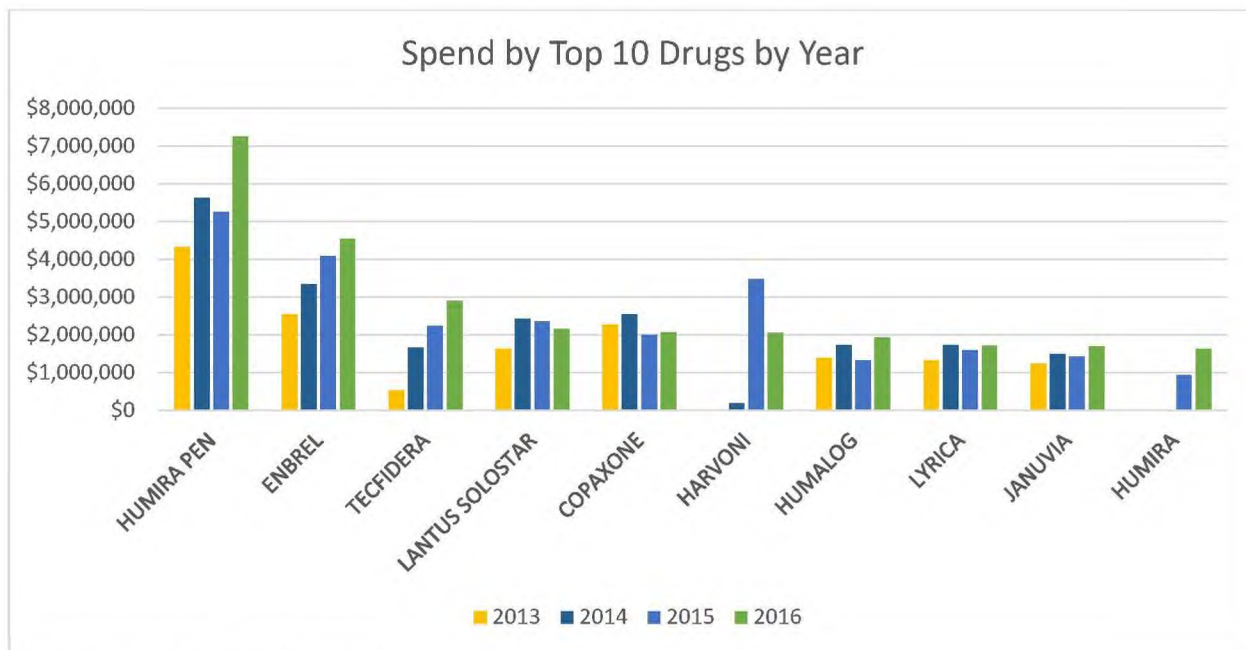

Figure 21: Spend by Top 10 Drugs by Year

Dental Plan Enrollment

Benefits Services Division offers two different types of dental plans: a fully-insured Dental Health Maintenance Organization (DHMO) plan administered by Total Dental Administrators and a self-insured Dental Preferred Provider Organization (DPPO) plan administered by Delta Dental.

DHMO Plan

Within the DHMO plan, services must be obtained from a participating dental provider (PDP). There is no annual deductible or out of pocket maximum. The plan coverage maximums include a \$200 maximum reimbursement for non-PDP emergency services, \$50 for emergency services less member cost share for the service and a \$1,500 per person lifetime maximum for orthodontia. This plan is administered by Total Dental Administrators.

DPPO Plan

Within the DPPO plan, services may be obtained from any dentist and deductibles and out of pocket maximum apply. Benefits may be based on reasonable and customary charges. The plan coverage maximums include a \$2,000 maximum per person per year and a \$1,500 per person lifetime maximum for orthodontia. This plan is administered by Delta Dental.

The figure below shows how enrollment was distributed by plan and network between active, retired, university, and COBRA members. The subscriber references the employee and the member references the employee plus dependents.

Average Monthly Dental Enrollment by Plan					
		2016		2015	
Network	Plan Type	Subscribers	Members	Subscribers	Members

Wellness

Benefits Services Division provides wellness programs and services to Active State employees. Members have access to preventive health screenings, health management and health education courses, annual flu vaccines, online lifestyle management programs, onsite seminars, and Employee Assistance Program (EAP) benefits.

The Health Impact Program (HIP) offers an incentive based employee wellness program for benefits eligible State of Arizona employees, and was first launched October 1, 2014 through September 30, 2015. In 2016, the program began in January and ran through October 31, 2016. The mission of HIP is to promote prevention as the first line of defense against chronic disease and encourage employees to participate in disease management so they can manage pre-existing conditions and enjoy greater total health and well-being.

Employees who successfully completed the program by engaging in a variety of wellness activities while accumulating and logging progress towards an end goal of 500 points, were eligible to receive up to a \$200 incentive payout at the of the year.

Engagement

The PY 2016 data graph below shows that of the 60,000 eligible members, there were 2,440 new employees in addition to the 7,955 employees registered in 2015, totaling 10,395 registered or

17% of the eligible population. 4,091 employees of those registered, completed the online Healthy Assessment which translates to a 39% completion rate.

Figure 27: Healthy Living Registrations and Completions

Screening Utilization

The chart below shows the total utilization of health screening benefits during the PY 2016 and the number of at-risk employees referred to follow-up care.

PY 2016 Health Screenings			
	Events	Participant	Referrals
Mini Health Screening*	89	3,417	
Osteoporosis Screening		1,490	361
Prostate Specific Antigen (PSA)**		500	18
Hemoglobin A1C **		884	83
Mobile Onsite Mammography	70	1,091	27
Prostate Onsite Projects	30	489	28
Total	189	7,871	517

* The basic Mini Health Screening includes: full lipid panel, fasting blood glucose, blood pressure, BMI, and body composition.

** New tests offered as a package with the basic Mini Health Screening.

Figure 28: Health Screenings

The table below shows the total utilization for the PY 2016 State Wellness Annual Flu Vaccine Program held September 1 through December 31, 2016. A total of 14,842 vaccines were given to benefits Active members, Retirees and their dependents. Members had access to the flu vaccine at 405 locations throughout the state. 94% of members who received a flu vaccine did so at a worksite or open enrollment clinic. To contrast, a total of 20,142 members and their dependents received flu vaccines through the medical plan in PY 2016.

PY 2016 Flu Vaccines		
	Locations	Participants
State Agency Worksite	198	7,729
University Worksite	35	4,700
Combined Worksite (Wesley Bolin)	3	821
Open Enrollment Clinics	10	709
Public Clinics	159	883
Total	405	14,842

Figure 29: Flu Vaccines

CDC estimates flu shot savings of between \$15 and \$84 per vaccinated person, or \$2.58 per dollar spent on vaccination; a possible \$4,000 savings for every averted illness. Approximate maximum ROI of 3:1.

Incentives

The graph below shows the distribution of points of program participants comparing PY 2016 to PY 2015. 4,327 (42%) of registered participants logged points; 2,039 of the 2,053 logging 500 points earned the incentive for an estimated payout of \$407k (20% of total registered). This represents a 13.50% increase in those earning the reward from PY 2015. A 3.85% of total eligible employees earned incentive.

Figure 30: Distribution of Points

By providing the Health Impact Program (HIP) Framework and incentive component, the year over year participation metrics showed an increase in employee engagement in preventive services, screening referrals, and educational/behavior change activities.

Employee Assistance Program

The table below shows the utilization for the Employee Assistance Program (EAP) and support services offered to agencies covered under the Benefits Services Division. Total utilization for PY

2016 reached 31%, an increase from 29% in PY 2015, showing sustained high usage especially when compared to the 18.6% national standard for government entities. Benefit Services Division covered agencies continue to show utilization higher than our EAP vendor's Book of Business.

The Department of Education was added to the Benefit Services Division program effective January 1st, 2016.

PY 2016 EAP Utilization			
	Eligible Population	Users	Utilization Rate
Live Telephonic Access		2,737	7.2%
EAP		2,172	5.8%
FamilySource		126	0.3%
FinancialConnect		88	0.2%
LegalConnect		351	0.9%
Online Access		8,042	21.3%
EAP		1,639	4.3%
FamilySource		1,855	4.9%
FinancialConnect		742	2.0%
GlobalConnect		0	0.0%
Health & Wellness		1,633	4.3%

Life, Disability, Vision Insurance and Flexible Spending Accounts

Fund 3035, ERE/Benefits Administration, is used to pay Fully Insured premiums and administer State employees benefit plans other than health and dental. These include basic, supplemental, and dependent life insurance, short-term and non-ASRS long term disability insurance, vision insurance, and medical and dependent care flexible spending accounts. Basic life and non-ASRS long term disability insurance is funded solely by State agency premiums (employer premiums) while all others are funded solely by employee premiums. Fund 3035 is primarily a pass-through fund with collections funding the premiums payments. The table above is a cash statement of receipts received and expenses paid during PY 2016 that related to PY 2016 incurred revenues and expenditures as well as prior.

*Vendor administrative fees and fully insured premiums are paid 55 days in arrears per contract.

Figure 33: ERE/Benefits Administration Fund 3035 Summary

Vendor Performance Standards

Pursuant to A.R.S. § 38-658(B), “On or before October 1 of each year, the Director of the Department of Administration shall report to the Joint Legislative Budget Committee on the performance standards for health plans, including indemnity health insurance, hospital and medical service plans, dental plans, and health maintenance organizations.”

Among the terms of the self-insured health insurance contracts and other contracts the Benefit Services Division administers are several ADOA-negotiated performance measures with specific financial guarantees tied to vendor performance of the contracted services. If a vendor fails to meet any of the measures within the specified performance range, the vendor is required to submit a Corrective Action Plan detailing why the measure was missed and any actions taken to address the issue and improve performance to meet the standard of the measure. A percentage of the vendor’s annual payment, or previously agreed upon amount, is then withheld by ADOA as a performance penalty per the terms of the vendor contract. This percentage is allocated among the more critical measures of the contract.

The following is a report of the agreed-upon performance standards both met and missed by contracted vendors during PY 2016. In each case, performance penalties for measures missed are assessed per the terms of the individual vendor contract. As some performance metrics are yet to be finalized, the estimated performance penalty paid to Benefit Services Division related to PY 2016 will be approximately \$360,000.

Audit Services

The Benefit Services Division-Audit Services Unit provides assurances that add value and improve the operations of Benefit Services. Audit Services performs systematic evaluations of contract compliance, operational controls, risk management, and the implementation of best practices to support BSD objectives.

During PY 2016, four audit projects were completed to ensure the health plan vendors appropriately provided contracted services. The audit schedule for the plan year was developed using a combination of contract elements and risk analysis. An overview of the completed project results for the 2016 plan year is shown below including recommendations made, implemented recommendations*, identified savings, and health plan recovery dollars.

Recommendations	Implemented Recommendations *	Identified Savings	Recovery Dollars	Pending Recovery
3	1	\$9,719.23	\$0	\$0

Figure 34: Audit Recommendation Summary

* Implementation of recommendations may vary based on the completion of all corrective action plan directives. In many cases, directives may still be in progress and may roll over to the new plan year.

Individual audit objectives were developed with the consideration of dollar value, complexity of operations, changes in personnel or operations, loss exposure, and previous audit results. Audits were completed, but were not limited to the following functional areas:

Functional Area	Audit Methodology
Vendor operating transactions	Statement on Standards for Attestation Engagements No. 16 Audits (SSAE 16)
ADOA accuracy of shared data	Dependent Eligibility Audits (DEA)
Audit program improvement initiatives	Administrative functions and program-specific improvements

Figure 35: Audit Functional Area and Methodology

Vendor Operating Transactions

All health plan contracted vendors that pay claims are required to provide a copy of a SSAE 16, which is an independently assessed operational annual or semi-annual audit. SSAE 16 audits evaluate the internal controls of the vendor's systems utilized to process claims and identify deficiencies. Audit services reviewed the SSAE 16 reports provided by each of the vendor's external auditors. There were no instances of significant operating failure noted and no corrective action was required. In addition, audits performed by external or third party vendors are evaluated and considered for the development of the audit schedule when there is significant impact the on the health plan and contract compliance (i.e. large medical and/or pharmacy claims audit).

ADOA Accuracy of Shared Data

Dependent Eligibility audits are performed annually on the health plan's membership. The eligibility audits provide assurance that dependent eligibility is monitored effectively and the risk of claims paid on behalf of ineligible dependents is minimized. The results of the eligibility audit indicated that two ineligible dependents were enrolled in the plan. One dependent erroneously received total benefits of \$2,301.95 due to an unreported qualified life event. Appropriate documentation was not received for one dependent, however, no erroneous payments of benefits were made on the dependent's behalf. Additionally, during the Plan Year, documentation was reviewed for a member and dependent who were not included in the annual Dependent Eligibility Audit. Suspicion of inappropriate conduct by the member was based on contact from the member's agency or peers. It was determined that one dependent was not married to the member at the time of enrollment. A total of \$5,654.50 in benefits was paid in error on behalf of the dependent. Eligibility documentation and review results for members not selected for the audit, are included as Additional Information in the findings of Dependent Eligibility Audit.

Audit Program Improvement Initiatives

In addition to the regularly scheduled audits, reviews, and evaluations listed above, Audit Services assisted in performing a review of HITF members with premiums in a collections status. Claims paid during the non-payment of premium period on behalf of these members were identified and used to assist in determining the remediation of the unpaid premiums.

Audit Services continues to strive towards improvement and efficiency; the focus during the PY 2016 was to streamline administrative functions to improve audit program initiatives.

Figure 36: Special Employee Health Fund Cash Statement

Glossary of Terms

Active member(s) – An employee and their eligible dependents, as defined in the Arizona Administrative Code, who are enrolled in one of the health plan options offered by the State. (Also referred to as “actives”.)

Administrative fees – Fees paid to third-party vendors for plan administration, network rental, transplant network access fees, shared savings for negotiated discounted rates with other providers, COBRA administration, direct pay billing, additional reporting billing, State fees (MA, MI and NY), and bank reconciliation fees.

Case management – A collaborative process that facilitates recommended treatment plans to ensure that appropriate medical care is provided to disabled, ill, or injured individuals.

Claim – A provider’s demand upon the payer for payment for medical services or products.

Claim appeal – A request by an insured member for a review of the denial of coverage for a specific medical procedure contemplated or performed.

COBRA, Consolidated Omnibus Budget Reconciliation Act of 1985 – A federal law that requires an employer to allow eligible employees, retirees, and their dependents to continue their health coverage after they have terminated their employment or are no longer eligible for the health plan - COBRA enrollees must pay the total premium, in addition to an administrative fee of 2%.

Contribution strategy – A premium structure that includes both the employer’s financial contribution and the employee’s financial contribution towards the total plan cost.

Copayment – A form of medical cost-sharing in the health plan that requires the member to pay a fixed dollar amount for a medical service or prescription.

Deductible – A fixed dollar amount that a member pays during the plan year, before the health plan starts to make payments for covered medical services.

Dependent – An unmarried child or a spouse of the employee who meets the conditions established by the relevant plan description.

DHMO/Pre-Paid Dental – A dental plan that offers members dental services with no annual maximums or claim forms, and services based on a discounted rate. Total Dental is the current prepaid dental vendor.

DPPO – A dental plan, with an in-network and out-of-network coinsurance structure, that allows members to visit any dentist. There is an annual deductible, and maximum annual benefit of \$2,000 per member per year for dental services. The current administrator for the DPPO plan is Delta Dental.

Disease management – A comprehensive, ongoing, and coordinated approach to achieving desired outcomes for a population of patients. These outcomes include improving members’ clinical conditions and qualities of life as well as reducing unnecessary healthcare costs. These objectives require rigorous, protocol-based, clinical management in conjunction with intensive patient education, coaching, and monitoring.

Eligibility appeal – The process for a member to request a review of a health plan decision regarding a claimant’s qualifications for, or entitlement to, benefits under a plan.

Employee – As defined in the Arizona Administrative Code who works for the State of Arizona or a State university.

Employee Group Waiver Program (EGWP) – An employer group Medicare Prescription D drug plan.

Exclusive Provider Organization (EPO) – A health plan designed with an exclusive provider organization or network. Enrollees are limited to access in-network providers and are subject to co-pays. Any exceptions require prior authorization.

Flexible spending account (FSA) – An account that can be set up through the State’s Benefit Options program, an FSA allows an employee to set aside a portion of his/her earnings to pay for qualified medical and dependent care expenses. Money deducted from an employee’s pay and put into an FSA is not subject to payroll taxes.

Formulary – A list of preferred medications covered by the health plan. The list contains generic and brand-name drugs. The most cost-effective brand-name drugs are placed in the “preferred” category and all other brand-name drugs are placed in the “non-preferred” category.

Fully-insured – An insurance model wherein a commercial insurer collects premiums, pays claims for services, and takes the risk of revenue to expense. Benefit Options may collect the premiums for transfer to the commercial insurer.

High Deductible Health Plan (HDHP) – A health plan designed with an open access provider organization or network. Enrollees have access to in-network and out-of-network providers, and are subject to co-insurance and higher annual deductibles than traditional plans. Out-of-network providers require greater co-insurance.

Health Savings Account (HSA) – An account that allows individuals to pay for current health expenses and save for future health expenses on a tax-free basis. Only high deductible health plans are HSA-eligible.

Integrated – A health plan operation administered by one entity. Such operations include: claims processing and payment, a network of medical providers, utilization management, case management, and disease management services.

Medicare – The federal health insurance program provided to those who are age 65 and older, or those with disabilities, who are eligible for Social Security benefits. Medicare has four parts: Part A, which covers hospitalization; Part B, which covers physicians and medical providers; Part C, which expands the availability of managed care arrangements for Medicare recipients; and Part D, which provides a prescription drug benefit. Retirees signing up for ADOA insurance must enroll in Parts A and B, but not C or D.

Member – A health plan participant. This individual can be an employee, retiree, spouse, or dependent.

Network – An organization that contracts with providers (hospitals, physicians, and other health care professionals) to provide health care services to members. Contract terms include agreed upon fee arrangements for services and performance standards.

Non-integrated – A health plan with operations administered by multiple entities. These operations include claims processing and payments, a network of medical providers, and disease management services.

Payer – The entity responsible for paying a claim.

Pharmacy Benefit Manager (PBM) – An organization that provides a pharmacy network, processes and pays for all pharmacy claims, and negotiates discounts on medicines directly from the pharmaceutical manufacturers. These discounts are passed to the employer/payer in the form of rebates and reduced costs in the formulary.

Plan Year (PY) – Defined as the period of January 1 through December 31 of a given year.

Preferred Provider Organization (PPO) – A health plan designed with a preferred provider organization or network. Enrollees have access to in-network and out-of-network providers, and are subject to co-pays, or co-insurance, and annual deductibles. Out-of-network providers require greater co-pays.

Premium – The agreed-upon fees paid for medical insurance coverage. Premiums are paid by both the employer and the health plan member.

Retiree – A former State of Arizona employee, State university employee, officer, or elected official who is retired under a State-sponsored retirement plan. For reporting purposes, this term encompasses both actual retirees and their dependents.

Self-funded – An insurance program wherein Benefit Options collects premiums, pays claims, and assumes the risk of revenues to expenses.

Self-insured – A plan that is funded by the employer who is financially responsible for all medical claims and administrative expenses.

Spouse – A dependent legally married to an employee or a retiree, as defined by the Arizona Revised Statutes.

Subscriber – An employee, officer, elected official, or retiree who is eligible and enrolls in the health plan.

Third party administrator – An organization that handles all administrative functions of a health plan including: processing and paying claims, compiling and producing management reports, and providing customer service.

Utilization management – The evaluation of appropriateness and efficiency of health care services procedures and facilities according to established criteria or guidelines and under the provisions of an applicable health benefits plan.

Utilization review – A process whereby an insurer evaluates the appropriateness, necessity, and cost of services provided.

Utilizer – A member who receives a specific service.
